The Zimbabwe Science News Springer

The Creative Curriculum comes alive! This videotape-winner of the 1989 Silver Apple Award at the National Educational Film and Video Festival-demonstrates how teachers set the stage for learning by creating a dynamic well-organized environment. It shows children involved in seven of the interest areas in the The Creative Curriculum and explains how they learn in each area. Everyone conducts in-service training workshops for staff and parents or who teaches early childhood education courses will find the video an indispensable tool for explainin appropriate practice.

Social Studies Syllabus for Primary Schools Springer

English 3D was designed to accelerate language development for English learners who have agility with social interactional English while lacking the advanced linguistic knowledge and skills required by complex coursework in school. English 3D propels students to higher language proficiency through a consistent series of lessons derived from research-based principles and classroom-tested practices that maximize students' verbal and written engagement with conceptually rigorous content.-- Teaching Guide Course A, Volume 1, Overview p. T10.

Linguistics and Language Behavior Abstracts Swipe Educational Solutions

This open access book is a comparative analysis of recent large scale education reforms that broadened curriculum goals to better prepare students for the 21st century. The book examines what governments actually do when they broaden curriculum goals, with attention to the details of implementation. To this end, the book examines system level reforms in six countries at various levels of development. The study includes system level reforms in jurisdictions where students achieve high levels in international assessments of basic literacies, such as Singapore and Ontario, Canada, as well as in nations where students achieve much lower levels, such as Kenya, Mexico, Punjab-Pakistan and Zimbabwe. The chapters examine system-level reforms that focus on strengthening the capacity to teach the basics, as in Ontario and Pakistan, as well as reforms that aim at building the capacity to teach a much broader set of competencies and skills, such as Kenya, Mexico, Singapore and Zimbabwe. The volume includes systems at very different levels of spending per student and

reforms at various points in the cycle of policy implementation, some just starting, some struggling to survive a governmental transition, and others that have been in place for an extended period of time. From the comparative study of these reforms, we aim to provide an understanding of how to build the capacity of education systems to teach 21st century skills at scale in diverse settings.

LLBA contains abstracts of the world's literature in linguistics and language-related research, book abstracts, book review listings, and enhanced bibliographic citations of relevant dissertations." Related disciplines such as anthropology, education, ethnology, information science, medicine, and communications are covered. Also includes some reference to papers in published conference proceedings.

Dancing Times OUP Oxford

Deryn Watson CapBIT 97, Capacity Building for Information Technologies in Education in Developing Countries, from which this publication derives, was an invited IFIP working conference sponsored by Working Groups in secondary (WG 3. 1), elementary (WG 3. 5), and vocational and professional (WG 3. 4) education under the auspices of IFIP Technical Committee for Education (TC3). The conference was held in Harare, Zimbabwe 25th - 29th August 1997. CapBIT '97 was the first time that the IFIP Technical Committee for Education had held a conference in a developing country. When the Computer Society of Zimbabwe offered to host the event, we determined that the location and conference topic reflect the importance of issues facing countries at all stages of development- especially Information Technologies (IT) development. Information Technologies have become, within a short time, one of the basic building blocks of modern industrial society. Understanding IT, and mastering basic skills and concepts of IT, are now regarded as part of the core education of all people around the world, alongside reading and writing. IT now permeates the business environment and underpins the success of modern corporations as well as providing government with cost-effective civil service systems. At the same time, the tools and technologies of IT are of value in the process of learning, and

in the organisation and management of learning institutions.

ZIMSEC Game Changer: Guaranteed Pass for 'O' and 'A' Levels" Rowman & Littlefield

"This collection engages environmental, ethical and cultural values perspectives to show how Design and Technology (D&T) Education actively contributes to the significant educational goal of attaining sustainable global futures. An international collection of authors representing all levels of education articulate how D&T research, curriculum theory, policy, and classroom practices can synergise to contribute positively to the education of children for sustainable global futures. The book offers a spectrum of theorised curriculum positions, political and policy analysis, and case studies of successful school practice. A key word in the title is that of contribution which is construed in several senses: first, of D&T as a vehicle for understanding the range of political and social values that arise with such a major educational challenge; second, of D&T as an agent of critical and practical action for students as global citizens; third, by taking global and multiple perspectives (rather than, say, Western or mono-cultural positions); and, fourth, by demonstrating D&T's capacities for working in holistic and integrative cross-curricular ways. The authors show how students can not only learn about their potential as humans-as-designers but can also develop designerly capacities that enable them to contribute meaningfully in practical ways to their communities and to wider society, that is, as global citizens who can apply design capability in ethical ways that are respectful of peoples, cultures and environments alike."

The Effectiveness of the Primary School Teacher in Zimbabwe Springer Science & Business Media

The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe. It challenges scholars to think about the role of education, its funding and the egalitarian approach to widening access to education. The nexus between education, democracy and policy change is a complex one. The book provides an illuminating account of the constantly evolving notions of national identity, language and citizenship from the Zimbabwean experience. The book discusses educational successes and challenges by examining the ideological effects of social, political and economic considerations on Zimbabwe's colonial and postcolonial education. Currently, literature on current educational challenges in Zimbabwe is lacking and there is very little published material on these ideological effects on educational development in Zimbabwe. This book is likely to be one of the first on the impact of social, political and economic meltdown on education. The book is targeted at local and international academics and scholars of history of education and comparative education, scholars of international education and development, undergraduate and graduate students, and professors who are interested in educational development in Africa, particularly Zimbabwe. Notwithstanding, the book is a valuable resource to policy makers, educational administrators and researchers and the wider community. Shizha and Kariwo's book is an important and illuminating addition on the effects of social, political and economic trajectories on education and development in Zimbabwe. It critically analyses the crucial specifics of the Zimbabwean situation by providing an in depth discourse on education at this historical juncture. The book offers new insights that may be useful for an understanding of not only the Zimbabwean case, but also education in other African countries. Rosemary Gordon, Senior Lecturer in Educational Foundations, University of Zimbabwe Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist, universal elementary education to the disarray of contemporary socioeconomic crisis; covering elementary through higher education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local deprofessionalization of teaching, this text provides a comprehensive, wide ranging and yet carefully detailed account

of education in Zimbabwe. This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe's education specifically but more widely to all who are interested in how the sociopolitical shapes education- how ideology, policy, international pressures, economic factors and shifts in values collectively forge the historical and contemporary character of a country's education. Handel Kashope Wright, Professor of Education, University of British Columbia

The Southern African Development Community Treaty-Nexus Springer Science & Business Media

As countries experience increasing cultural diversity both within and between their borders, contemporary researchers are exploring the connection between culture and children's learning and academic experiences. One important goal is to provide all children with educational experiences that are culturally sensitive, relevant, and effective in helping them reach their maximum potential and preparing them for the future. With over twenty-five contributing authors, this volume investigates the connection between culture and children's schooling and learning experiences from multidisciplinary perspectives, diverse methodologies, and cross-cultural and culture specific approaches. The common thread running through the chapters is the understanding that learning is an activity that takes place within cultural contexts. Together, the chapters highlight the forces that shape children's everyday learning experiences. Core themes address how parental beliefs and cultural ways of learning and problem-solving shape children's learning experiences and social interactions with teachers; the importance of quality early childhood education and playful learning to children's school success and development; and how the complex intersection of cultural variables with forces such as historical injustice, social and educational inequality, economic stability, and political ideologies shape children's learning. The volume honors the experiences of Indigenous, newcomer, first-generation children, and children of underrepresented communities and highlights the vital role that policy makers, teacher educators, schools, and classroom educators play in helping all children reach their academic and social potential.

Mathematics Teacher Training and Development in Africa Springer Nature

Curriculum problems are everywhere: alert observers with a practiced eye and educated mind will find it almost impossible to read a newspaper without discovering curricular issues. The media often report about educational reforms or even about curriculum wars with opposing parties fiercely debating the aims, content and organization of learning. Few people analyze these trends and discussions from a curricular conceptual framework. In addition, people sometimes think that their curriculum approaches and problems are unique and context-specific. However, international experience shows us that we can learn a

lot from curriculum issues elsewhere. This book aims to sharpen the eyes and minds of a broader audience in identifying, understanding, addressing and reflecting upon curriculum problems. It also aims to contribute to the increased exchange, discussion and reflection on all the current curriculum problems that form such a crucial part of learning worldwide.

The Presidential Commission of Inquiry Into Education and Training (Nzirasanga Commission) John Wiley & Sons

Since its establishment in 1980 the Southern African Development Community (SADC) has largely been a state driven organization, with the people of Southern Africa, though enshrined in the treaty, remaining observers in the SADC democratization and integration agenda. The Southern African Development Community Treaty-Nexus: National Constitutions, Citizen's Sovereignty, Communication, and Awareness, edited by Korwa Gombe Adar, Dorothy Mpabanga, Kebapetse Lotshwao, Thokiso Molokwane, and Norbert Musekiwa, brings in the people of Southern Africa, the key beneficiaries of the integration agenda, in the SADC democratization and integration epistemology. Using the new concepts of sadcness and sadcnization, this book operationalizes from legal, communication, and awareness perspectives, the nexus of the people of Southern Africa, democratization, and integration in the SADC region. From legal and communications lenses, the contributors argue that democratization and integration are about people (citizens), the sovereigns, and not merely the abstract actors called nation states. Using the case studies of Angola, Botswana, Madagascar, Mozambique, South Africa, and Zimbabwe, the contributors engage in this epistemology and assess, among other things, the peoples' of Southern Africa—the Southern Africa Development Community integration nexus.
