Discover a fresh perspective on the art of leading in Dr. Kevin Leman's story about a young reporter who lands the meeting of a lifetime and walks away with the keys to exceptional leadership. The Way of the Shepherd points you beyond dated trends and out-of-touch management techniques to the strategies that will make you a truly outstanding leader. When William Pentak had the once-in-a-lifetime opportunity to

interview Ted McBride, one of the most respected CEOs in America, he was shocked by what McBride was willing to share. McBride taught him the seven secrets he inherited long ago from his mentor--an eccentric but brilliant professor who passed on these time-tested management principles that, while ancient in their origin, are still applicable in today's fast-paced, high-tech world. Throughout The Way of the Shepherd, you'll learn how to infuse your work with meaning, no matter your role, title, industry, or the size of your team. Uncover the tried-and-true best practices for how

to engage, energize, and ignite your workforce by: Getting to know your team, one person at a time Relentlessly communicating your values and your mission Defining the cause for your people and showing them where they fit in Having a heart for the people that you're leading Understanding that great leadership isn't just professional, it's personal If you're ready to transform your team, create a culture of belonging, and truly learn to lead by example, it's time to discover The Way of the Shepherd.

Parliamentary Papers Pearson Australia
Filling a gap in contemporary food and

globalization scholarship, this timely book presents recent case-study research on the globalization of food systems, and the impacts for communities around the world. It covers debates on new structures and food products, as well as detailed accounts of fresh horticulture, tropical crops and livestock. Drawing together contributions of twenty-six leading international social scientists from eleven countries, this book will interest researchers in geography, development studies, agricultural economics and political science, as well as professionals in the fields of trade and food policy.

Lamb Crop AFRICAN SUN MeDIA
 Air Emissions from Animal Feeding Operations: Current Knowledge, Future Needs discusses the need for the U.S. Environmental Protection Agency to implement a new method for estimating the amount of ammonia, nitrous oxide, methane, and other pollutants emitted from livestock and poultry farms, and for determining how these emissions are dispersed in the atmosphere. The committee calls for the EPA and the U.S. Department of Agriculture to establish a joint council to coordinate and oversee

short - and long-term research to estimate emissions from animal feeding operations accurately and to develop mitigation strategies. Their recommendation was for the joint council to focus its efforts first on those pollutants that pose the greatest risk to the environment and public health. Predator Control UNC Press Books
 Emerging? (or black?) farmers are often considered a homogeneous group. While individual emerging farmers and agribusinesses in South Africa share a common history, the case studies in this book show that in fact significant differences exist among them that are often hidden beneath the averaging and aggregation typical of most analytical research. Presenting fifteen case studies of emerging agribusinesses in South Africa, this book has three main objectives: (1) to capture the human stories behind the emerging farms and agribusinesses in South Africa in order to showcase their rich diversity, historical backgrounds, current context, and future directions; (2) to highlight the best practices, opportunities, and challenges facing South Africa's emerging farmers and agribusinesses; and (3) to create a

new set of instructional materials for academics and development practitioners, or as a point of reference for other entrepreneurs, members of government, and other practitioners engaged in agriculture and agribusiness. The case study format, a relatively new tool in the field of agribusiness management, allows for a close-up view of the entrepreneurs at the heart of the businesses, providing an ideal lens through which to take a snapshot of the agribusiness landscape of South Africa today.

Monthly Catalog of United States Government Publications Storey Publishing
 Jack London (1876-1916) found fame with his wolf-dog tales and sagas of the frozen North, but Cecelia Tichi challenges the long-standing view of London as merely a mass-market producer of potboilers. A onetime child laborer, London led a life of poverty in the Gilded Age before rising to worldwide acclaim for stories, novels, and essays designed to hasten the social, economic, and political advance of America. In this major reinterpretation of London's career, Tichi examines how the beloved writer leveraged his written words as a force for the future. Tracing the arc of

London's work from the late 1800s through the 1910s, Tichi profiles the writer's allies and adversaries in the cities, on the factory floor, inside prison walls, and in the farmlands. Thoroughly exploring London's importance as an artist and as a political and public figure, Tichi brings to life a man who merits recognition as one of America's foremost public intellectuals. This enhanced e-book edition of Jack London features significant archival motion picture footage. Eight ebook enhancements take readers into the motion-picture world of Jack London's 1900s--to the very sights that impacted his bestselling writings. Readers get front row seats to the terrifying San Francisco earthquake of 1906, to the Hawaiian beachfront where London first saw the Waikiki "surf riders," to ringside where prizefighters battled for championships. These and other historic film footage clips make this an ebook for the twenty-first century.

The Increasing Risk of Floods and Tornadoes in Southern Africa Zondervan
Given the central role of the food and agriculture system in driving so many of the connected ecological, social and

economic threats and challenges we currently face, *Rethinking Food and Agriculture* reviews, reassesses and reimagines the current food and agriculture system and the narrow paradigm in which it operates. *Rethinking Food and Agriculture* explores and uncovers some of the key historical, ethical, economic, social, cultural, political, and structural drivers and root causes of unsustainability, degradation of the agricultural environment, destruction of nature, short-comings in science and knowledge systems, inequality, hunger and food insecurity, and disharmony. It reviews efforts towards 'sustainable development', and reassesses whether these efforts have been implemented with adequate responsibility, acceptable societal and environmental costs and optimal engagement to secure sustainability, equity and justice. The book highlights the many ways that farmers and their communities, civil society groups, social movements, development experts, scientists and others have been raising awareness of these issues, implementing solutions and forging 'new ways forward', for example towards paradigms of

agriculture, natural resource management and human nutrition which are more sustainable and just. *Rethinking Food and Agriculture* proposes ways to move beyond the current limited view of agro-ecological sustainability towards overall sustainability of the food and agriculture system based on the principle of 'inclusive responsibility'. Inclusive responsibility encourages ecosystem sustainability based on agro-ecological and planetary limits to sustainable resource use for production and livelihoods. Inclusive responsibility also places importance on quality of life, pluralism, equity and justice for all and emphasises the health, well-being, sovereignty, dignity and rights of producers, consumers and other stakeholders, as well as of nonhuman animals and the natural world. Explores some of the key drivers and root causes of unsustainability, degradation of the agricultural environment and destruction of nature Highlights the many ways that different stakeholders have been forging 'new ways forward' towards alternative paradigms of agriculture, human nutrition and political economy, which are more sustainable and just Proposes ways to

move beyond the current unsustainable exploitation of natural resources towards agroecological sustainability and overall sustainability of the food and agriculture system based on 'inclusive responsibility'

Working with Smallholders in Africa

Building a Sustainable BusinessA Guide to Developing a Business Plan for Farms and Rural Businesses

This volume discusses the increasing occurrence of floods and tornadoes in Southern Africa over the last few years. The book discusses existing flood and tornado management protocols, indigenous approaches to mitigate disaster risk, urban and peri-urban flooding, tornado-induced flooding and windstorms, and the challenges and vulnerabilities associated with rural and transboundary floods. The book offers planning and recovery strategies to minimise impacts from these events through sustainable means. Such means include sustainable drainage systems, waste management in harbors and beaches, community engagement in flood-prone areas, and improved food security measures in urban poor households.

An increasing number of African smallholders are moving from subsistence farming to selling at least part of their output. To shift successfully to a more commercial footing they need a lot more than the production advice traditionally provided by extension services. They need

to understand how markets work. They also need advice on postharvest handling, help with business planning and marketing, assistance with organization, information on prices, links to buyers and credit, help with contracts and standards, and many other types of assistance. These agricultural business development services are provided by a mix of private companies, NGOs, cooperatives and government agencies - in what is called a "pluralistic extension system". Farmers - and other clients such as input stores, small-scale processors and traders - get some services for free, paid for by donors or the government. Others are subsidized: the farmers pay part of the cost. For still others, the farmers must pay the full cost. That leads to questions of sustainability (what happens when the donor's money runs out?), accountability (whom do the service providers listen to: the farmers, or the source of the funds?), and inclusiveness (how to ensure that women, the poor and disadvantaged get the services they need but cannot afford?). This book describes the two dominant approaches to providing services: supply-driven (where the funder decides what

services should be offered), and market-driven (where more emphasis is put on market forces). It looks at how 12 business service providers from across Africa run their businesses. It describes the seven different "business models" that they pursue, and examines the features of each one. Based on their experiences, it proposes a new, needs-driven approach, which aims to overcome the shortcomings of both the supply-driven and the market-driven approaches by taking the needs of clients as a starting point for policy and action.

The second edition of *International Business* features 10 new in-depth case studies specially created for this edition. For undergraduate students majoring in international business or post-graduate courses in international business. *Government and Agriculture* Notion Press

The Swan name is inseparable from the history of Wyoming and the West, and when Swan made his mark in Wyoming in the 1880s, ranching was king. The largest among Alex Swan's many corporate creations, The Swan Land and Cattle

Company, Ltd., was one of the larger livestock companies to operate in the American West, and it survived long after it founder's financial debacle in the great winter of 1886-1887. At one time, the Swan was said to be the largest private landowner in Wyoming, and at its peak it was certainly one of the largest sheep companies in the country. This new work for the first time relates the life of Alex Swan, and offers a complete history of the Swan companies. Lawrence M. Woods has combed the surviving corporate records and other documents held in the United States and abroad. At the height of his financial life, Swan was said to be the richest man in Wyoming Territory, and his influence extended beyond business affairs to community service, both in Wyoming and in Iowa. Yet, after his dramatic financial collapse, there were many who ridiculed what he had done, and Swan's silence has left those criticisms on the record, without rebuttal. Swan, a leader in the Wyoming Stock Growers Association from its founding in 1873, served as its second president. Promoting the use of Hereford cattle on the high plains, he was a force in the

Wyoming ranching world, especially after his move to Cheyenne in 1874. Woods details Swan's life in the years after his separation from the Scottish-controlled Swan Land and Cattle Company, especially his activities in Ogden, Utah. The Swan companies continued operation into the mid-twentieth century. John Clay played a major role in their operation, and he figures prominently in their story. Alex Swan and the Swan Companies is an important portrait of the inner workings of the western cattle industry and its leaders. The book has a bibliography, index, and three appendices. It is bound in rich brown linen cloth and has a foil stamped spine and front cover. Western Lands and Waters Series, XXII
