After failing to learn a new language on five separate occasions, I taught myself to speak Spanish like a native in just six months by watching movies and TV shows, listening to music, and reading books and comics like Harry Potter and Garfield. This simple, easy-to-learn technique, that even the most linguistically-challenged can master literally overnight, is used by many of the most respected and skilled polyglots and language teachers in the world, and it's never really been laid out, explained, and demonstrated in full, point-by-point, step-by-step detail until now. When characters in a movie or TV show are speaking the dialogue, unless it's set in a previous period like the 1800s or something, they speak normal, everyday language. So if you wanted to learn Spanish, the type of normal everyday Spanish that native speakers use every day, aka "conversational Spanish"... Don't you think that Spanish-language TV shows, movies, music, and books might be a good source to learn from...if only you knew how? Not only that, but it would be fun, wouldn't it? Far better than learning the language from some boring, dry textbook or workbook that, even worse, is teaching outdated, formal, "non-conversational" Spanish (look at the dialogue in one sometime: do people actually talk like that? No). The basic technique is obvious: consume popular Spanish-language media and try to learn what they're saying by looking up what you don't understand. Sure. But the issue is twofold: 1) The problems you will inevitably run into (how do I apply what I've learned? how do I ensure I'm not misunderstanding the meaning and thereby learning something incorrect? where do I look things up? what if it's not in the dictionary and Google Translate isn't cutting it? etc.), and... 2) How do we do things as efficiently as possible? If you're a beginner you're going to have to sort out how to do this all on your own, how to solve any problems you might run into on your own, while probably doing many things less effectively and slower than is necessary. I've already learned all this stuff the hard way, I've made many of the mistakes you would if you went this alone, let me just save you a ton of time, trouble, and possibly money by teaching you what I already know from experience. Has this basic technique been used for centuries by language students and teachers alike? Yes, there are records dating back to the 18th century of language teachers using popular media in the language they're teaching to help their students learn it. I'm not claiming to have invented it. What I've done here is, after having used and refined the technique myself for several years, distilled it down to a system that's easy to learn, and which is taught in a format that's organized, easy to understand, and which takes advantage of all the latest technology, such as the all the various resources available on the internet now.

It's true that some people spend years studying Spanish before they finally get around to speaking the language. But here's a better idea. Skip the years of study and jump right to the speaking part. Sound crazy? No, it's language hacking. Unlike most traditional language courses that try to teach you the rules of Spanish, #LanguageHacking shows you how to learn and speak Italian through proven memory techniques, unconventional shortcuts and conversation strategies perfected by one of the world's greatest language learners, Benny Lewis, aka the Irish Polyglot. Using the language hacks -shortcuts that make learning simple - that Benny mastered while learning his 11 languages and his 'speak from the start' method, you will crack the language code and exponentially increase your language abilities so that you can get fluent faster. It's not magic. It's not a language gene. It's not something only "other people" can do. It's about being smart with how you learn, learning what's indispensable, skipping what's not, and using what you've learned to have real conversations in Spanish from day one. The Method #LanguageHacking takes a modern approach to language learning, blending the power of online social collaboration with

traditional methods. It focuses on the conversations that learners need to master right away, rather than presenting language in order of difficulty like most courses. This means that you can have conversations immediately, not after years of study. Each of the 10 units culminates with a speaking 'mission' that prepares you to use the language you've learned to talk about yourself. Through the language hacker online learner community, you can share your personalized speaking 'missions' with other learners - getting and giving feedback and extending your learning beyond the pages of the book . You don't need to go abroad to learn a language any more.

The Way of The Linguist, A language learning odyssey. It is now a cliché that the world is a smaller place. We think nothing of jumping on a plane to travel to another country or continent. The most exotic locations are now destinations for mass tourism. Small business people are dealing across frontiers and language barriers like never before. The Internet brings different languages and cultures to our finger-tips. English, the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication. But historically periods of cultural and economic domination have never lasted forever. Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures? As citizens of this shrunken world, would we not be better off if we were able to speak a few languages other than our own? The answer is obviously yes. Certainly Steve Kaufmann thinks so, and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia. Why do not more people do the same? In his book The Way of The Linguist, A language learning odyssey, Steve offers some answers. Steve feels anyone can learn a language if they want to. He

points out some of the obstacles that hold people back. Drawing on his adventures in Europe and Asia, as a student and businessman, he describes the rewards that come from knowing languages. He relates his evolution as a language learner, abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency. Many people have taken on the challenge of language learning but have been frustrated by their lack of success. This book offers detailed advice on the kind of study practices that will achieve language breakthroughs. Steve has developed a language learning system available online at: www.thelinguist.com.

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method

that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Gitars Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
