A revelatory new history that explores the tantalizing and almost-realized possibility that the First World War could have ended in 1916, saving millions of lives and utterly changing the course of history. In August 1916, two years into World War I, leaders in all the warring powers faced a crisis. There were no good military options. Money, people, and food were running short. Yet roads to peace seemed daunting too, as exhausted nations, drummed forward by patriotic duty and war passion, sought meaning from their appalling sacrifices. Germany made the first move. Its government secretly asked Woodrow Wilson, President of the United States and leader of the only great power still neutral, to mediate an end to the Great War. As a token of good faith, Germany promised to withdraw from occupied Belgium. Wilson was too anxious to make peace. If he failed, he felt sure America would drift into a dreadful, wider war. Meanwhile, the French president confided to Britain's King that the Allies should accept Wilson's expected peace move and end the war. In *THE ROAD LESS TRAVELED*, Philip Zelikow recounts the five months when, behind closed doors, the future of the war, and the world, hung in the balance. It is a story of civic courage, of awful responsibility, and of how some rose to the occasion or shrank from it. "Peace is on the floor waiting to be picked up!" pleaded the German ambassador to the United States. This book shows how right he was, and how close leaders came to doing so.

A powerful story touched with family trauma, deprivation, and adversity balanced by a life of hard work and philanthropy! On the Road Less Traveled is the inspirational story of Edmund A. Hajim, an American financier and philanthropist who rises from dire childhood circumstances to achieve professional success and personal fulfillment. At age three, Hajim is kidnapped by his father, driven from St. Louis to Los Angeles, and told that his mother is dead. His father soon abandons him in order to seek employment—mostly in vain—leaving his son behind in a string of foster homes and orphanages. This establishes a pattern of neglect and desertion that continues for Hajim's entire childhood, forever leaving its mark. From one home to another, the lonely boy learns the value of self-reliance and perseverance despite his financial deprivation and the trauma of being an orphan. As time passes, Hajim displays a powerful instinct for survival and a burning drive to excel. A highly motivated student and athlete, he earns an NROTC college scholarship to the University of Rochester; serves in the United States Navy; works as an application research engineer; then

attends Harvard Business School, where he finds that the financial industry is his true calling. So begins his rapid ascent in the corporate world, which includes senior executive positions at E. F. Hutton, Lehman Brothers, and fourteen years as CEO of Furman Selz, growing the company more than tenfold. He also creates a happy and abundant family life, though he never forgets what it means to struggle. At age sixty, he is reminded of his painful past when a family secret emerges that brings the story full circle.

Golf. It's the ultimate head game. And when nothing but the best advice will do, along comes M. Scott Peck, M.D., the celebrated psychiatrist and author of the best-selling self-help book of all time, *The Road Less Traveled*. In *Golf and the Spirit*, M. Scott Peck writes a book for beginners and masters alike--and even for nongolfers. It goes beyond mechanics to explore the deeper issues, ways of successfully managing the emotional, psychological, and spiritual aspects of this most wonderful, maddening, deflating, and inspiring game. Playing side by side with M. Scott Peck on an imaginary course of his own design--complete with illustrations of each hole--you will come to see the profound truths in this seemingly simple game. Appreciate that life is not linear. Come to understand your own anger and how to heal that which gets in your way. Accept the gifts of humility. Appreciate kenosis, the process by which the self empties itself of self. Benefit from teachers. Know that in weakness often there is strength. Realize that to experience the blessings of golf and life fully, you must accept the divinity that underlies all things. Like the best-selling volumes of Harvey Penick and Michael Murphy, *Golf and the Spirit* makes a unique contribution to the literature of golf and life. It goes beyond the body to address the heart and soul of the game, creating a rare opportunity for transformation in the lives of its readers, both on and off the fairway. It seems to me the human condition is most basically that we are willful creatures living in a world that, much of the time, doesn't behave the way we want it to. We live in the tension between our will and reality. Sometimes with great effort and expertise, we can change reality or bend it to our will. At other times--also with great effort and expertise--it is we who must change by coming to accept the limitations of the world and of ourselves. How we do this--how we deal with the hazards of life--is quite akin to how we deal with the hazards of a golf course. Sooner or later golfers who stick with the game long enough will almost always come to see it as a metaphor for life. But the word metaphor fails to do justice to all that golf has to teach us. I would go even further and say that, in its own way, golf is life and, not only that, life condensed. If we choose to use it as such, I believe that golf, next to marriage and parenthood, can routinely be the greatest of life's learning opportunities.

Translated from the Danish by Walter Lowrie, David Swenson, and Alexander Dru The Danish philosopher Kierkegaard is one of the master thinkers of the modern age, a defining influence on

existentialism and on twentieth-century theology, and this brilliantly tailored selection from his vast and varied writings--made by the great English poet W.H Auden--is a perfect introduction to his work. Auden's inspired and incisive response to a thinker who had done much to shape his own beliefs is a fundamental reading of an author whose spirit remains as radical as ever more than 150 years after he wrote.

After multiple mind-bending experiences in Asia and driving 25,000 miles around Australia, the journey is brought to a blistering halt, leaving an indelible mark in the North Queensland highway, Bertha goes up in flames and Andrew loses 'everything'.... Escaping small village life, Andrew put on his backpack and set off on an epic around the world journey; packed full of exciting, hilarious, thought provoking and often cringeworthy moments. It's a candid tale of complete culture shock, delivered with self-deprecating humour that will make you laugh out loud and wince at the same time. From night-time liaisons with a Princess to brushes with the Mafia; from Elephants roaming the Streets to giant glow-in-the-dark insects; Stunning women and beautiful "ladyboys"; friendships and jealousy; daring deeds and disaster; The worst toilet in the world, several brushes with death and many lessons learned in life itself. It's a hedonistic tale of self-discovery creating life-long friendships, beautiful and beguiling, pushing moral, cultural, and societal boundaries. This book will make you laugh, gasp and wince all the while providing you an opportunity to examine your own psyche. Will it light a fire of freedom and adventure under you? Maybe or maybe not, but you will love the ride. This is the trip where Andrew found his true self. It just took twenty years to get over the hangover and realise it...

During a pivotal few months in the middle of the First World War all sides-Germany, Britain, and America-believed the war could be concluded. Peace at the end of 1916 would have saved millions of lives and changed the course of history utterly. Two years into the most terrible conflict the world had ever known, the warring powers faced a crisis. There were no good military options. Money, men, and supplies were running short on all sides. The German chancellor secretly sought President Woodrow Wilson's mediation to end the war, just as British ministers and France's president also concluded that the time was right. The Road Less Traveled describes how tantalizingly close these far-sighted statesmen came to ending the war, saving millions of lives, and avoiding the total war that dimmed hopes for a better world.Theirs was a secret battle that is only now becoming fully understood, a story of civic courage, awful responsibility, and how some leaders rose to the occasion while others shrank from it or chased other ambitions. "Peace is on the floor waiting to be picked up!" pleaded the German ambassador to the United States. This book explains both the strategies and fumbles of people facing a great crossroads of history. The Road Less Traveled reveals one of the last great mysteries of the Great War: that it simply never should have lasted so long or cost so much. span

When a meteorite lands in Surrey, the locals don't know what to make of it. But as Martians emerge and begin killing bystanders, it quickly becomes clear—England is under attack. Armed soldiers converge on the scene to ward off the invaders, but meanwhile, more Martian cylinders land on

Earth, bringing reinforcements. As war breaks out across England, the locals must fight for their lives, but life on Earth will never be the same. This is an unabridged version of one of the first fictional accounts of extraterrestrial invasion. H. G. Wells's military science fiction novel was first published in book form in 1898, and is considered a classic of English literature.

Confronting and solving problems is a painful process, which most of us attempt to avoid. Drawing heavily upon his own professional experience, Dr. M. Scott Peck, a practicing psychiatrist, suggests ways in which confronting and resolving our problems can enable us to reach a higher level of self-understanding.

'The overall purpose of human communication is - or should be - reconciliation. It should ultimately serve to lower or remove the walls of misunderstanding which unduly separate us human beings, one from another...' Although we have developed the technology to make communication more efficient and to bring people closer together, we have failed to use it to build a true global community. Dr M. Scott Peck believes that if we are to prevent civilization destroying itself, we must urgently rebuild on all levels, local, national and international and that is the first step to spiritual survival. In this radical and challenging book, he describes how the communities work, how group action can be developed on the principles of tolerance and love, and how we can start to transform world society into a true community.

The uniquely prominent role of French intellectuals in European cultural and political life following World War II is the focus of Tony Judt's newest book. He analyzes this intellectual community's most divisive conflicts: how to respond to the promise and the betrayal of Communism and how to sustain a commitment to radical ideals when confronting the hypocrisy in Stalin's Soviet Union, in the new Eastern European Communist states, and in France itself. Judt shows why this was an all-consuming moral dilemma to a generation of French men and women, how their responses were conditioned by war and occupation, and how post-war political choices have come to sit uneasily on the conscience of later generations of French intellectuals. Judt's analysis extends beyond the writings of fashionable "Existentialist" personalities such as Jean-Paul Sartre, Albert Camus, and Simone de Beauvoir to include a wide intellectual community of Catholic philosophers, non-aligned journalists, literary critics and poets, Communist and non-Communist alike. Judt treats the intellectual dilemmas of the postwar years as an unfinished history. French intellectuals have not fully come to terms with the gnawing sense of what Judt calls the "moral irresponsibility" of those years. The result, he suggests, is a legacy of bad faith and confusion that has damaged France's cultural standing, notably in newly liberated Eastern Europe, and which reflects the nation's larger difficulty in confronting its own ambivalent past.

"Confronting and solving problems is a painful process which most of us attempt to avoid. Avoiding resolution results in greater pain and an inability to grow both mentally and spiritually. Drawing heavily on his own professional experience, Dr M. Scott Peck, a psychiatrist, suggests ways in which facing our difficulties - and suffering through the changes - can enable us to reach a higher level of self-understanding. He discusses the nature of loving relationships- how to distinguish dependency from love; how to become one's own person and how to be a more sensitive parent. This is a book that can show you how to embrace reality and yet achieve serenity and a richer existence. Hugely influential, it has now sold over ten million copies - and has changed many people's lives round the globe. It may change yours."

Past Imperfect Touchstone

A horn is an instrument either for protection or destruction. The "horn" in the Horn of Africa has for so long turned inward, and on its people, thus victimizing those it was supposed to defend. The ensuing internecine bloodletting has thrown the region into an abyss out of which it is still struggling to emerge. Much of the story of this abyss is captured in social, political, economic, and literary treatises written by indigenous and international experts. Rarely, however, has there been a single volume that brings together keen analyses of the expressive arts of Djibouti, Eritrea, Ethiopia, Somalia, and Sudan. The Road Less Traveled is the first book of its kind. It brings together in the same volume essays on the literatures of the Horn of Africa written by renowned regional and international scholars. All the countries in the region, their major writers, and the genres through which the people in the Horn express themselves are given careful attention. The volume also includes essays that traverse borders, and/or transgress generic delineations/delimitations. The essays in the volume attest to a simple fact, namely, that through the arts humans weave a labyrinthine system of symbolic representations that bear witness to lives lived or imagined. And while in the Horn of Africa catastrophes may abound, the calamity that besets this region can equally be explained through its antiphony: the perseverance and cosmic, albeit cautious, optimism of its people. A horn, after all, is also a way of making music.

We have still much to learn as to the laws according to which the mind and body act on one another, and according to which one mind acts on another; but it is certain that a great part of this mutual action can be reduced to general laws, and that the more we know of such laws the greater our power to benefit others will be.

Money represents more than the paper it's printed on. It is the embodiment of your time, your talents, and your commitments. It buys the food you eat, the house you sleep in, the car you drive, and the clothes you wear. It also helps provide you with the lifestyle you want to live once you retire. You have spent a lifetime earning it, spending it, and hopefully, accumulating it. When the time comes for retirement, you want your money to provide you with a comfortable lifestyle and stable income after your working days are done. You might also have other desires, such as traveling, purchasing property, or moving to be closer to your family (or farther away). You may also want your assets to provide for your loved ones after you are gone. The truth is that it takes more than just money to fulfill those needs and desires. Your income, your plans for retirement, your future healthcare expenses, and the continued accumulation of your assets after you stop working and drawing a paycheck all rely on one thing: You.
