Oxford School Shakespeare

Butterworth-Heinemann

This Student Book provides a grammar-led approach with extensive exam preparation to develop independent, culturally aware students of German, ready for the exam. This book is endorsed by Cambridge International Examinations for the latest IGCSE® (0525) and International Level 1/Level 2 Certificate (0677) syllabuses. Extensive use of German reflects the style of the exams and, with specific advice and practice, it helps students use the acquired skills to their best ability. Topics on German-speaking cultures are integrated throughout to ensure students gain the cultural awareness that is at the heart of this qualification. - Develop students' ability to use German effectively - Stretch and challenge students to achieve their best grades - Ensure the progression required for further study at A-level or equivalent - Provide insight and encourage a positive attitude towards other cultures The book provides up-to-date content following a clear sequencing of topics designed specifically for teaching German at this level. It is designed to develop spontaneous, confident linguists who are able to progress to further study of German. - Teacher Resource + Audio-CDs (ISBN 9781471833076) includes all recordings and transcripts together with detailed guidance, editable vocabulary lists, cultural PowerPoints and interactive

quizzes - Grammar Workbook (ISBN 9781471833182) Vocabulary is also available online at Vocab Express, an interactive learning application Visit www.vocabexpress.co.uk/hodder for more information.

Further Mechanics HarperCollins UK
As You Like It is a popular text for study by secondary students the world over. This edition includes illustrations, preliminary notes, reading lists (including websites) and classroom notes.

Maths Progress International has been designed specifically for international students and provides seamless progression to Pearson Edexcel International GCSE Maths (9-1), as well as complete coverage of the Pearson Edexcel iLowerSecondary Award and the UK Curriculum objectives. This Student Book follows a unique mastery approach that aims to nurture confidence, build fluency, improve problem-solving skills and develop mathematical reasoning to fully prepare students for the transition to Key Stage 4 and beyond. Developed to build the skills and knowledge needed to progress to International GCSE 9-1 Mathematics for a consistent learning experience from 11-16. Designed with the international student in mind with appropriate cultural sensitivity, international contexts and written for EAL learners. Follows a mastery approach and unique unit structure that

has been shown to help to build confidence in mathematics. Matched to the iLower Secondary curriculum and the UK curriculum objectives so you can be sure you have all you need whatever curriculum you are following.

Foundation 1 Pearson Education Complete Chemistry is a revised and enlarged edition of the popular GCSE Chemistry improved to bring it totally up-to-date. This book covers all syllabuses with core material, for Double Award, and extension material, for Science: Chemistry. The breadth and depth is sufficient to stretch your students aiming for the top grades and makes it an excellent foundation for those intending to progress to advanced level chemistry. Key Points: · Now includes all the necessary topics for IGCSE · Concepts and principles of chemistry presented in a clear, straightforward style · Lively and colourful coverage of the relevance of chemistry in the real world · End of chapter testing with more challenging and structured questions · Examination style questions · Pagination remains the same as GCSE Chemistry so that the two can be used alongside each other
Edexcel International a Level Physics Lab Book Hachette UK

Further Pure Maths 1 was written to provide thorough preparation for the revised 2004 specification. Based on the first editions, this series help you to prepare for the new exams.

Cambridge International A and AS Level Mathematics Heinemann Educational Secondary Division

The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The

modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the

workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.

A Level Further Mathematics for AQA Mechanics Student Book (AS/A Level)

Hodder Education

"Written specifically for Edexcel's new IGCSE Physics (from 2009) qualification in a clear and engaging style that students will find easy to understand. This book includes a wide range of activities and exercises for self-study, as well as examination style questions and summaries to aid revision."--Publisher's description.
