*English* Walter de Gruyter GmbH & Co KG Ever wondered why there is a Heart Symbol? The symbolism within the Heart is to be understood through the fundamental formulation of our language. How through our language we can see that it (the Heart Symbol) was created by our hunter gatherer/agrarian Ancestors from their thoughtful understanding of nature. This document explains in detail how it is that the Sun the Earth and attendant Moon were the primary reason for the Heart Symbol and perceived as the incunabula of everthing. Collocations as a Language Resource Robin Pavitt This book presents an innovative exploration of linguistic prefabrication in the travel advertising discourse from a functional perspective. Most of the previous studies on prefabricated language have adopted a structural, systematic point of view. This study, however, aims at exploring its functions in discourse. The material examined here is the discourse of travel advertising, which has become one of the candidates for 'late modern discourse par excellence' and rarely been discussed before. The study covers a wide range of topics, essentially attempting to model

linguistic idiomaticity in Systemic Functional Grammar. It assesses how the two fundamental principles of language use, the 'idiom principle' and the 'open-choice principle', interact with each other to construct English texts. As a counterweight to the traditional structural approach to collocations and idiomatic expressions, this study investigates the 'phraseology' of the register of travel advertising, and explores prefabrication and conventionalization in language use and human behavior. It seeks to answer the age-old question of whether human beings are 'primarily like buses, which travel along regular routes' or 'like taxis, which move about freely'. Ritualization, as sociological and anthropological theory have long since recognized, is simply characteristic of all aspects of human behavior and its contexts.

The Arms Trade Treaty:  
A  
Commentary  
Walter de Gruyter  
In contemporary linguistics, both cognitive and critical approaches to language have been elaborated in some detail. Unfortunately, the two perspectives have seldom converged, despite the potential theoretical advances such collaboration

offers. The contributions to this volume explore the convergence of cognitive and critical trends in the guise of cognitive linguistics and critical discourse analysis. The volume addresses a range of socio-political discourses in various international contexts, including discourses on nation, education, immigration, and war. One single integrated model is not presented, but

rather, a number of methodologies are developed and assessed across the chapters. The application of established cognitive linguistic theories, including conceptual metaphor theory, conceptual blending theory and frame semantics, are discussed, as well as developing theories, such as metaphor power theory and discourse space theory. The book is of value to anyone

interested in the interaction between language, mind, and society, including both students and scholars of cognitive linguistics and critical discourse analysis.

**Metaphors of Confinement**

Oxford University Press  
That English has no diminutives is a common myth. The present study shows, however, that English does possess diminutives, and not only

<p>analytic but also synthetic diminutive markers. Analytic markers include, first and foremost, little, as well as other adjectives from the same word field, whereas the inventory of synthetic markers comprises suffixes as, for instance, -ie, -ette, -let, -kin, -een, -s, -er, -poo and -pegs. These markers are examined from a grammatical and a pragmatic perspective in an integrative</p>	<p>formal-functional framework. The grammatical perspective involves phonological, morphological and semantic features, while the pragmatic perspective involves pragmalinguistic as well as sociopragmatic features on the levels of the speech act and larger interactive units in dialogue. The findings reveal that English diminutive suffixes are, in fact, among the most productive suffixes of the</p>	<p>English language. While the suffixes share a number of features, each has developed its own profile, specifically regarding semantic and pragmatic features. In everyday conversation, there is a division of labour between the synthetic and the analytic type of formation concerning the communicative functions of diminutives and their distribution in discourse. The choice of</p>
---	---	---

<p>formal device and its function depend crucially on pragmatic factors, notably on the illocution, the interactive status, the realisation strategy, and the politeness value of the utterances in which diminutives are employed, and also on the relationship between the interlocutors. <i>Going Global through Social Sciences and Humanities: A Systems and ICT Perspective</i> Routledge</p>	<p>This volume in honour of Ingrid Meyer is a tribute to her work in the interrelated fields of lexicography, terminology and translation. One key thing shared by these fields is that they all deal with text. Accordingly, the essays in this collection are united by the fact that they too are all "text-based" in some way. In the majority of essays, electronic corpora serve as the textual basis for</p>	<p>investigations. Chapters focusing on electronic corpora include a description of a tool that can be used to help build specialized corpora in a semi-automatic fashion; corpus-based investigations of terminological knowledge patterns, terminological implantation, lexicographic information and translation solutions; comparisons of corpora to conventional resources</p>
---	---	---

such as dictionaries; and analyses of corpus processing tools such as translation memory systems. In several essays, notably those dealing with historical or literary documents, the texts in question are specific manuscripts that have been studied with a view to learning more about lexicographic and translation practice. The volume is rounded out with a chapter

on audiovisual translation that takes a non-conventional view of text, where "text" includes film. *Buyer's guide* Wipf and Stock Publishers This book is the first of the two-volume collection of papers on formulaic language. The collection is among the first ones in the field. The book draws attention to the ritualized, repetitive side of language, which to some estimates make up over 50% of spoken

and written text. While in the linguistic literature, the creative and innovative aspects of language have been amply highlighted, conventionalized, pre-fabricated, "off-the-shelf" expressions have been paid less attention – an imbalance that this book attempts to remedy. The first of the two volumes addresses the very concept of formulaic language and provides studies that explore the grammatical

and semantic properties of formulae, their stylistic distribution within languages, and their evolution in the course of language history. Since most of the papers are readily accessible to readers with only basic familiarity with linguistics, besides being a resource in linguistic research, the book may be used in courses on discourse structure, pragmatics, semantics,

language acquisition, and syntax, as well as being a resource in linguistic research.

**Formulaic Language**

Cambridge Scholars Publishing  
This is the first history of dictionaries of English for foreign learners, from their beginnings in Japan and East Asia in the 1920s to the present day. Anthony Cowie describes the evolution of the major titles, and their fight for dominance of

what soon became an enormous market. He shows how developments in lexical and grammatical theory crucially affected the content and structure of ELT dictionaries.

A Reference Guide for English Studies

Springer  
This volume seeks to illustrate the fundamental role of language in political

action, focusing on the war in Iraq. It combines quantitative methods, based on a sophisticated modular corpus that was queried through special software with the aim of identifying regularly occurring lexical and semantic patterns, with classical discourse analysis, which seeks to investigate naturally occurring language in the context in which it is

produced. Interpreting the field of politics quite widely, to include news reporting and a quasi-judicial inquiry into the behavior of politicians and journalists, discourses in the USA and the UK are considered. The central purpose of the volume is to gain insights not just into language, and the ways in which we can investigate it through a corpus, but also into the ways in which political action is realized

through  
discourse.  
Academic  
Writing in  
Context John  
Benjamins  
Publishing  
Company  
Metaphors of  
Confinement:  
The Prison in  
Fact, Fiction,  
and Fantasy  
offers a  
historical  
survey of  
imaginings of  
the prison as  
expressed in  
carceral  
metaphors in  
a range of  
texts about  
imprisonment  
from Antiquity  
to the present  
as well as  
non-penal  
situations  
described as  
confining or  
restrictive.

These  
imaginings  
coalesce into  
a 'carceral  
imaginary'  
that  
determines  
the way we  
think about  
prisons, just  
as social  
debates about  
punishment  
and criminals  
feed into the  
way carceral  
imaginary  
develops over  
time.  
Examining not  
only English-  
language  
prose fiction  
but also  
poetry and  
drama from  
the Middle  
Ages to  
postcolonial,  
particularly  
African,  
literature, the

book  
juxtaposes  
literary and  
non-literary  
contexts and  
contrasts  
fictional and  
nonfictional  
representation  
s of  
(im)prison(me  
nt) and  
discussions  
about the  
prison as  
institution and  
experiential  
reality. It  
comments on  
present-day  
trends of  
punitivity and  
foregrounds  
the ethical  
dimensions of  
penal  
punishment.  
The main  
argument  
concerns the  
continuity of  
carceral

metaphors through the centuries despite historical developments that included major shifts in policy (such as the invention of the penitentiary). The study looks at selected carceral metaphors, often from two complementary perspectives, such as the home as prison or the prison as home, or the factory as prison and the prison as factory. The case studies present

particularly relevant genres and texts that employ these metaphors, often from a historical perspective that analyses development through different periods. *Corpus-Assisted Discourse Studies on the Iraq Conflict* Cambridge University Press Wilkie Collins is the only leading Victorian novelist whose letters have not been published. This two-volume

edition will thus fill a gaping hole in any assessment of one of the nineteenth century's most loved novelists. It is also extremely timely. Two recent biographies have re-assessed his private life and his literary achievements. His best known novels, *The Woman in White* and *The Moonstone*, continue to feature on television, and most of his thirty-odd novels are in print. This

authorized edition covers more than 2,000 of Collins' letters. *A functional and cognitive study in English phraseology* Routledge Drawing on the difficult-to-access pamphlets, reports, periodical literature and political tracts, this five-volume set reproduces in facsimile a large number of neglected sources relating to rural life in the latter half of the nineteenth century. It is of interest to

scholars in nineteenth-century studies and to all social historians. **British Book News** Walter de Gruyter This volume aims to arrive at a fine-grained and grammar-based understanding of the notions of (inter-)subjectivity and (inter-)subjectification in their application to grammaticalization research. In terms of linguistic theory, position is taken vis-à-vis existing

approaches to (inter-)subjectification which are either too narrow or too general by addressing two questions: (i) what is the relation between (inter-)subjectivity and pragmatics, and (ii) on what grounds can subjective and intersubjective meanings be distinguished? In the descriptive sections of the volume, these theoretical considerations are confronted with extensive analytical, and

often also quantitative, study of empirical data mainly from English but also from Romance languages. The focus in these case studies is on the analytical and diachronic relations between subjectivity and intersubjectivity, with particular emphasis on the question how linguistic syntagms may shift towards the expression of meanings of which the hearer is an essential part. The domains

covered include adverbials and modals, but also the noun phrase, to date a relatively under-researched area in grammaticalization studies. Together these three areas ensure broad verification of existing hypotheses about the relative order in which subjectification and intersubjectification take place. This volume is mainly of interest to researchers

and graduate students with a special interest in subjectification, intersubjectification and grammaticalization, and with a general interest in language change. The volume will also be welcomed by functional linguists (in a broad sense), since it is the first to bring eclectic functionalists' reflections to bear so explicitly on grammaticalization.

The United  
Nations Arms  
Trade Treaty  
became  
binding  
international  
law in late  
2014, and  
although the  
text of the  
treaty is a  
relatively  
concise  
framework for  
assessing  
whether to  
authorize or  
deny  
proposed  
conventional  
weapons  
transfers by  
States Parties,  
there exists  
controversy as

to the  
meaning of  
certain key  
provisions.  
Furthermore,  
the treaty  
requires a  
national  
regulatory  
body to  
authorize  
proposed  
transfers of  
conventional  
weapons  
covered by  
the treaty, but  
does not  
detail how  
such a body  
should be  
established  
and how it  
should  
effectively  
function. The  
Arms Trade  
Treaty: A  
Commentary  
explains in  
detail each of  
the treaty

provisions, the  
parameters  
for  
prohibitions or  
the denial of  
transfers,  
international  
cooperation  
and  
assistance,  
and  
implementatio  
n obligations  
and  
mechanisms.  
As states  
ratify and  
implement the  
Treaty over  
the next few  
years, the  
commentary  
provides  
invaluable  
guidance to  
government  
officials,  
commentators  
, and scholars  
on the  
meaning of its  
contentious

provisions. This volume describes in detail which weapons are covered by the treaty and explains the different forms of transfer that the Arms Trade Treaty regulates. It covers international human rights, trade, disarmament, humanitarian law, criminal law, and state-to-state use of force, as well as the application of the treaty to non-state actors.

1838-1865

Routledge  
This is the

new edition of Linguistics: An Introduction. It is a bestselling introductory textbook for all students of linguistics and language studies. This reworked edition features: -new chapters on sign languages, writing, and text and discourse - coverage of writing in electronic media - revised and updated chapters on languages of the world and psycholinguistics Firmly based around

taught courses and catering to student needs, it addresses all the topics that a student will need in their study of language. With key terms, further reading, questions at the end of each chapter, exercises and key paragraphs in stand-out boxes, this is a firmly pedagogic text that takes difficult concepts and explains them in an easy to understand way. It features

examples taken from a range of languages across the world. Global in its scope and comprehensive in its coverage, this is the textbook of choice for linguistics students. The book comes with a large Companion Website, also extensively revised and expanded. For lecturers and instructors, a comprehensive Answer Book is also available to go along with the questions throughout the chapters. Reform, Mission and Pastoral Renewal in African Catholicism Since Vatican II Cambridge Scholars Publishing This book presents contributions submitted to the 2nd international conference Going Global through Social Sciences and Humanities (GGSSH 2019) held in Tomsk, Russia on 27–28 February 2019. The conference focused on such issues as interdisciplinary pedagogy, language teaching and learning, cultural studies and linguistics, particularly highlighting global academic integration and professional development for research. As such, the event provided a platform for discussions and sharing publication activities, to help Russian academics to take first steps toward global research. Showcasing the ongoing

Russian research in focus areas, this book is of interest to a diverse academic audience working in social sciences and humanities, particularly those from the post-Soviet countries. Subjectification, Intersubjectification and Grammaticalization Springer Science & Business Media  
The Languages of Politics/La politique et ses langues provides a multifaceted

view of major approaches to the study of political discourse from an interdisciplinary perspective. To date, most contributions to the analysis of political discourse have come from the fields of rhetoric, (critical) discourse analysis, cognitive linguistics, pragmatics, lexicology, lexicography, and, more recently, multimodal discourse analysis. The papers in this volume build their

investigations on these perspectives, and provide new and diversified insights into this vast area of research. Besides considering multiple approaches, the book also adds to the current debate on the languages of politics by combining a range of theoretical and methodological considerations, and by featuring contributions in both English and French. **Bookseller**

Walter de Gruyter This handbook provides an up-to-date survey of corpus linguistics. Spoken, written, or multimodal corpora serve as the basis for quantitative and qualitative research on many questions of linguistic interest. The volume comprises 61 articles by internationally renowned experts. They sketch the history of corpus linguistics and	its relationship with neighboring disciplines, show its potential, discuss its problems, and describe various methods of collecting, annotating, and searching corpora, as well as processing corpus data. Key features: up-to-date and complete handbook includes both an overview and detailed discussions gathers together a great number of experts <u>Readers'</u> <u>Guide</u>	Springer This volume contains perspectives from a collection of cognitive scientists on the psychological, philosophical, and educational issues surrounding the meanings of words and how these meanings are learned and accessed. It features chapters covering the nature and structure of word meaning, how new word meanings are acquired in childhood and
