North American Indians Routledge

Can there be a flaneuse, and what form might she take? This is the central question of *Streetwalking the Metropolis*, an important contribution to ongoing debates on the city and modernity in which Deborah Parsons re-draws the gendered map of urban modernism. Assessing the cultural and literary history of the concept of the flaneur, the urban observer/writer traditionally gendered as masculine, the author advances critical space for the discussion of a female 'flaneuse', focused around a range of women writers from the 1880's to World War Two. Cutting across period boundaries, this wide-ranging study offers stimulating accounts of works by writers including Amy Levy, Dorothy Richardson, Virginia Woolf, Rosamund Lehmann, Jean Rhys, Janet Flanner, Djuna Barnes, Anais Nin, Elizabeth Bowen and Doris Lessing, highlighting women's changing relationship with the

social and psychic spaces of the city, and drawing attention to the ways in which the perceptions and experiences of the street are translated into the dynamics of literary texts.

*Architecturally Speaking* is an international collection of essays by leading architects, artists and theorists of locality and space. Together these essays build to reflect not only what it might mean to 'speak architecturally' but also the innate relations between the artist's and architect's work, how they are distinct, and in inspiring ways, how they might relate through questions of built form. This book will appeal to urbanists, geographers, artists, architects, cultural historians and theorists.

*Sadhana, a Way to God* Farrar, Straus and Giroux

When I first met Lola I was living in the countryside with my

parents and brothers and sisters. Lola was lonely and ill then, but it was love at first sight, and I knew that I wanted to take care of her. A beautifully told, heart-warming story about friendship and survival, with a very surprising and satisfying ending.

**The Story of How Everything Began** Columbia University Press

This book offers the first detailed analysis of how the Surrealists utilized the tactics of documentary and how Surrealist ideas in turn influenced the development of documentary photography. The last two decades have seen the re-emergence of Surrealist photography, but with an emphasis on work made in the studio or the darkroom. This, however, is a study of what Louis Aragon called 'surrealist realism': the exploration of a real-life surreality encountered on the streets of the city. This book throws new light on Surrealism, emphasizing its connections with the everyday life of the city.

*Subway Art* OUP Oxford

Much more than a ribbon of crumbling asphalt, Route 66 is a cultural icon revered the world over for its nostalgia value—an east-west artery pointing America toward all the promise that the great West represented. But as stretches of Steinbeck's "Mother Road" were bypassed and fell into disuse, so too did most of the bustling establishments that had sprouted up from Illinois to California to cater to weary travelers and hopeful vacationers alike. Motor courts, cafes, main streets, filling stations, and greasy spoons—all are represented in this second volume of *Lost & Found* images from photographer Russell Olsen. As with its predecessor, *Route 66 Lost & Found* (2004), this new installment presents dozens of locations along Route 66's entire 2,297 miles, showing them both as in their heydays in period photographs and postcards and as they appear today. Each site is accompanied by a capsule history tracing the locale's rise and fall (and sometimes rebirth), as well as an exclusive map pointing out its location along Route 66.

**Fabrizio Ceccardi** *Esplorazione urbana. Fotografare luoghi nascosti e rendere le vostre immagini spettacolari* Mind and Places A Multidisciplinary Approach to the Design of Contemporary City

Francesco Casetti believes new media technologies are producing an exciting new era in cinema aesthetics. Whether we experience film in the theater, on our hand-held devices, in galleries and museums, onboard and in flight, or up in the clouds in the bits we download, cinema continues to alter our habits and excite our imaginations. Casetti travels from the remote corners of film history and theory to the most surprising sites on the internet and in our cities to prove the ongoing relevance of cinema. He does away with traditional notions of canon, repetition, apparatus, and spectatorship in favor of new keywords, including expansion, relocation, assemblage, and performance. The result is an innovative understanding of cinema's place in our lives and culture, along with a critical sea-change in the study of the art. The more the nature of cinema transforms, the more it discovers its own identity, and Casetti helps readers realize the galaxy of possibilities embedded in the medium.

**The Chess Set in the Mirror** Voyageur Press

This book explores the contributions of psychological, neuroscientific and philosophical perspectives to the design of contemporary cities. Pursuing an innovative and multidisciplinary approach, it addresses the need to re-launch knowledge and creativity as major cultural and institutional bases of human communities. Dwelling is a form of knowledge and re-invention of reality that involves both the tangible dimension of physical places and their mental representation. Findings in the neuroscientific field are increasingly opening stimulating perspectives on the design of spaces, and highlight how our

ability to understand other people is strongly related to our corporeity. The first part of the book focuses on the contributions of various disciplines that deal with the spatial dimension, and explores the dovetailing roles that science and art can play from a multidisciplinary perspective. In turn, the second part formulates proposals on how to promote greater integration between the aesthetic and cultural dimension in spatial design. Given its scope, the book will benefit all scholars, academics and practitioners who are involved in the process of planning, designing and building places, and will foster an international exchange of research, case studies, and theoretical reflections to confront the challenges of designing conscious places and enable the development of communities.

**The Lumière Galaxy** Routledge

René Burri's photographs are recognized the world-over as amongst the greatest of the twentieth century. From his iconic shots of Che Guevara and Brasilia, his sensitive war reportage across the globe, to his insightful portraits of such artistic figures as Pablo Picasso and Le Corbusier, Burri's visual world has shaped our perception of history and politics. Now, for the first time, he invites us to view his selection from his archive of colour photographs, taken throughout his career, and tells the stories behind the photographs.

*Genesis* Manchester University Press

An extended exploration of the authors' theories and work over the past seventeen years, in which not only their aesthetic but also their political and emotional concerns are made plain. Phaidon Press

Originally published in *Other Worlds Science Stories* as a 2-part serial in the June and September 1956 issues, this 87,500 word novel by Roger Arcot tells the story of James Canfield who found himself made young again, with a whole life before him—but as another man! It isn't easy to live somebody else's life, but Canfield adapted himself to the incredible role—until he found out about the GORKEN! Then his new life became a thing of terror that might last a hundred years, or a hundred days. He hadn't been told how long his new youth would last! And to make it worse, he was now the potential gateway into his universe of a fantastic being from ... another dimension? What WAS the Gorken? Human ... or just-IT? There was a girl, too. Was he supposed to love her, or hate her? He didn't know! And one slip was a sentence of death. And who was Picozzi—and THE ONES? How could he succeed in such an incredible masquerade! More, how could he reach into another Time and another Space, to kill a creature who was ABSOLUTE MASTER of an enslaved world three hundred years from now! This novel is reproduced as a facsimile of the original magazine publication by FICTION HOUSE PRESS.

*Three Essays* Mit Press

Steve McCurry's iconic images have made him one of the world's most popular photographers working today. Now, for the first time, he shares the stories behind stunning images taken from around the world throughout his extensive career. In the finest documentary tradition, *Untold: The Stories Behind the Photographs* delves into McCurry's personal archive to reveal never-before-seen ephemera, including journals, portraits, maps, and beautifully reproduced snapshots from various assignments. The book is organized into 14 photo stories, each brought to life by narrative text and over 100 lavish, full-color photo plates. Together, these fascinating documents create a living biography

of one of photography's greatest legends.

*Dialogues on Architecture* LetteraVentidue

In recent years we have seen a number of dramatic discoveries within the biological and related sciences. Traditional arguments such as "nature versus nurture" are rapidly disappearing because of the realization that just as we are affecting our environments, so too do these altered environments restructure our cognitive abilities and outlooks. If the biological and technological breakthroughs are promising benefits such as extended life expectancies, these same discoveries also have the potential to improve in significant ways the quality of our built environments. This poses a compelling challenge to conventional architectural theory... This is the first book to consider these new scientific and humanistic models in architectural terms. Constructed as a series of five essays around the themes of beauty, culture, emotion, the experience of architecture, and artistic play, this book draws upon a broad range of discussions taking place in philosophy, psychology, biology, neuroscience, and anthropology, and in doing so questions what implications these discussions hold for architectural design. Drawing upon a wealth of research, Mallgrave argues that we should turn our focus away from the objectification of architecture (treating design as the creation of objects) and redirect it back to those for whom we design: the people inhabiting our built environments.

**What is Ornament?** Springer Nature

A breakout bestseller in Italy, now available for American readers for the first time, *Genesis: The Story of How Everything Began* is a short, humanistic tour of the origins of the universe, earth, and life—drawing on the latest discoveries in physics to explain the seven most significant moments in the creation of the cosmos. Curiosity and wonderment about the origins of the universe are at the heart of our experience of the world. From Hesiod's *Chaos*, described in his poem about the origins of the Greek gods, *Theogony*, to today's mind-bending theories of the multiverse, humans have been consumed by the relentless pursuit of an answer to one awe inspiring question: What exactly happened during those first moments? Guido Tonelli, the acclaimed, award-winning particle physicist and a central figure in the discovery of the Higgs boson (the "God particle"), reveals the extraordinary story of our genesis—from the origins of the universe, to the emergence of life on Earth, to the birth of human language with its power to describe the world. Evoking the seven days of biblical creation, Tonelli takes us on a brisk, lively tour through the evolution of our cosmos and considers the incredible challenges scientists face in exploring its mysteries. *Genesis* both explains the fundamental physics of our universe and marvels at the profound wonder of our existence.

An encyclopedia with a twist, *The Route 66 Encyclopedia* presents alphabetical entries on Route 66 history, landmarks, personalities, and culture, from Bobby Troup's anthem "Route 66" to *The Grapes of Wrath* to the Wigwam Motel, illustrated with over 1,000 old and new, color and black-and-white photos and memorabilia. You'll learn about Jack Rittenhouse and Will Rogers as well as the contributions of lesser-known figures like Arthur Nelson and Angel Delgadillo. With references to the old (including the history of the U Drop Inn Café in Texas) and new (including a section about the recent *Cars* movie), *The Route 66 Encyclopedia* provides a sweeping look at a highway that has become more than just a road. These pages cover the history of Route 66 and the people who played a role in its transformation from highway to icon between 1926 and the present, but like the highway itself,

this work does not fit within the traditional confines of generalities or terminology. Yes, this is an encyclopedia, a reference book for all things Route 66. However, it is also a time capsule, a travel guide, a history book, a memorial, a testimonial, and a chronicle of almost a century of societal evolution.

*Mountain Light* Taschen America Llc

'What is Ornament?' is a question which doesn't need definitive answers but instead prompts a series of possible discussions. The book is organized as a reader: a collection of contributions, ranging from Vitruvius to the current day dealing, in different ways with the debate around ornament. The reader is the theoretical complement of the homonym exhibition, part of the 5th Lisbon Architecture Triennale?The Poetics of Reason?. The book reflects the narrative structure of the exhibition: looking at fragments and moldings as the occasion in which ornament is discrete and condensed into few precise points; considering columns as ambivalent structural elements; looking at cladding as a conscious project rather than the passive result; exploring patterns, intended as regularly repetitive arrangements reflecting the time and the society in which they are conceived; looking at information superstructures like texts, frescoes and screens, when they become the main instrument to compose a building; enlarging ornament to the whole urban environment, embracing the complexity of shared space and imagining it as a scene for the development of public life.00Exhibition: Lisbon Architecture Triennale, Portugal (03.10.-02.12.2019).

*Dictionary of Cognitive Science* Getty Publications

This book aims to further a debate about aspects of "playing" and "gaming" in connection with history. Reaching out to academics, professionals and students alike, it pursues a dedicated interdisciplinary approach. Rather than only focusing on how professionals could learn from academics in history, the book also ponders the question of what academics can learn from gaming and playing for their own practice, such as gamification for teaching, or using "play" as a paradigm for novel approaches into historical scholarship. "Playing" and "gaming" are thus understood as a broad cultural phenomenon that cross-pollinates the theory and practice of history and gaming alike.

**Ruins and Relics Revisited** CreateSpace

This groundbreaking volume on a boundary-stretching art form tackles unconventional approaches to photography and gives voice to forty marginalized and provocative artists from around the world. Photo Brut--a genre of Art Brut, or outsider art--spans photography, prints, photomontage, collage, and other combinations of media and techniques. This art form allows those living on the fringes of society to voice their unique perception of the world, offering unconventional approaches to issues of sexuality, identity, and reality. This visceral and intimate selection of 520 works offers profound insight into the realm of outsider art. Works focusing on private affairs address questions of sexuality, perversion, the femme fatale icon, the Madonna, and innocence. In other works, artists attempt to reappropriate and tame the world, bringing issues of modern society into sharp focus. Some artists use performance, role play, and blurred/fluid/plural identities as a mode of self-expression. Lastly, practices and rituals using pseudoscientific or magical explanations allow some artists to confront apparitions and terrifying truths, to understand mysterious forces, and to create order. This authoritative first book dedicated to the previously unpublished field is an important contribution to the history of art.
