p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} After a brainstorming session, Pontiac executives and engineers decided to slot a 389-ci V-8 into the intermediate-sized Tempest against GM rules and the GTO was created. Little did they know what a profound impact that decision would make. The GTO would become a sensation and later was recognized as the first muscle car of the 1960s. Visionaries Pete Estes, John DeLorean, and other key Pontiac executives knew the youth market was waiting for a bold, lightweight sporty car. When their staff toyed with the concept of putting the large V-8 in the car, Pontiac executives jumped on the idea to meet that perceived market demand. Pontiac had a high-performance street car that could light up its tires and outperform the vast majority of the cars on the road. It also reshaped Pontiac's image of a company producing stodgy, lumbering full-size cars into a high-performance youth brand. Pontiac expert and long-time writer David Bonaskiewicz delves deep into the GTO model and its history, bringing the equipment and options of this iconic muscle car into full focus. He reveals the hardware under the sheet metal: the V-8 engines, manual and automatic transmissions, rear differentials, interior options, color codes, and so much more. When the GTO was released in 1964, it was offered as a unique performance package to the Tempest, and high-performance enthusiasts stood up and took notice. Examined are the GTO's 4-barrel 389 with dual exhaust, 3-speed floor shifter, stiffer suspension, limited-slip differential, and heavy-duty cooling system. The 1965 GTO was restyled with more interior room being added, and the renowned 389 Tri-Power engine joined the lineup, cranking out 360 hp. By 1966, the GTO was a runaway success. Pontiac made the GTO its own model, and it featured a sleeker Coke-bottle styling. A convertible joined the hardtop, and a pillared coupe also joined the lineup. The 1967 Pontiac GTO was arguably one of most the superbly styled models ever, with a wide range of engines and high-performance hardware. All of these important upgrades,

advancements, and model evolutions are covered in exceptional detail. The GTO stands alone in the annals for muscle car history. Not only did Pontiac create a classic muscle car, it created the muscle car blueprint that other Detroit manufacturers followed in the years to come. A glossy surface overview of this iconic model does not do it justice. If you have been searching for the in-depth, nuts-and-bolts guide to GTO equipment and options, you need look no further. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

Look up to the skies through Bob Riggles eyes in this wheelstanding, must-have Mopar history book on Hemi Under Glass! While the established stock and modified brackets are long-recognized as the heart and soul of drag racing, it was the wheelstanders that more often than not put butts in the bleachers. In that category, some of the most well-known names included Bill "Maverick" Golden's Little Red Wago, Bill Shewsberrys L.A. Dart and Chuck Poole's Chuck Wagon. Although, most memorable of all was the Hurst Hemi Under Glass Plymouth Barracuda campaigned by Bob Riggles. Riggles started his career in the early 1960s as a car builder and mechanic for Hurst-Campbell and eventually ascended to pilot the Hemi Under Glass. When he left Hurst in 1969, the Hemi Under Glass franchise transferred with Riggles. He continued for six more years as the owner/driver of a succession of Hemi Under Glass renditions. In the 1990s he resurrected the concept of the original car—making four different versions (1966, 1967, 1968, and 1969)—and continued to thrill drag racing fans with his wheelstanding antics. At the time of this writing, Bob's last run with the Hemi Under Glass was in the summer of 2019. He claims to have retired (he was 83 years old at the time), but he's claimed that before! For all the success he enjoyed over his long and distinguished career, which is believed to be one of the longest in all of motorsports, he's best remembered for a run at Irwindale Raceway in early 2016 with comedian and car buff Jay Leno in the passenger seat in a video that has been viewed more than 10 million times. This is Bob's story, one that Mark Fletcher and Richard Truesdell, co-authors of the 2012 book Hurst Equipped, are honored to share. They say the story was easy to tell—given their unprecedented access not only to Bob but also to his vast archive of photos that reflect his ongoing popularity. Many of the photos in this book are seen in print for the very first time.
