RESIDENTIAL CONSTRUCTION ACADEMY: HOUSE WIRING, 3E offers a concrete approach to teaching the most current electrical wiring practices in use in the housing industry. Like all books in the RCA series, House Wiring is based on the Skills Standards approved by NAHB's Home Builders Institute. The NAHB/HBI Skills Standards were developed by a board of industry and academic experts. Popular topics such as alternative energy systems and green coverage including sustainable building practices as they apply to house wiring are included in this new edition. This text is also updated to include the latest 2011 Electrical Code. An increased number of procedures help students better understand common house wiring practices along with additional end of the chapter review questions to help reinforce material covered and improve critical thinking skills. Teaching aids such as a From Experience section which addresses common residential wiring practices and scenarios and Caution boxes that emphasize the on-going importance of safety helps the student retain and apply what they have learned. An English and Spanish glossary is also included. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

"HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content. *Residential Construction Academy: Facilities Maintenance: Maintaining, Repairing, and Remodeling* Cpwr - The Center for Construction Research and Training

For beginning to intermediate courses in construction estimating in two- and four-year construction management programs. A step-by-step, hands-on introduction to commercial and residential estimating Construction Estimating with Excel, 3/e, introduces readers to the fundamental principles of estimating using drawing sets, real-world exercises, and examples. The book moves step-by-step through the estimating process, discussing the art of estimating, the quantity takeoff, how to put costs to the estimate, and how to finalize the bid. As students progress through the text they are shown how Microsoft Excel can be used to improve the estimating process. Because it introduces spreadsheets as a way of increasing estimating productivity and accuracy, the book can help both beginning and experienced estimators improve their skills. The Third Edition gives students a broader understanding of construction estimating with a new chapter discussing the role that estimating plays in different project delivery methods and in the design process and how to use data from RSMeans. To bring the book up to date, the material and equipment costs and labor rates have been updated to reflect current costs, and the discussion of Excel (including the figures) is based on Excel 2016. Additionally, content throughout the book has been updated to align to ACCE and ABET student learning outcomes. Student resources are available on the companion website www.pearsonhighered.com/careersresources/.
