## WERNER BRADLEY

Building Age  
Taunton Press  
The art of ornamental turning in wood (and, in former days, ivory) has a long and distinguished history and it has recently experienced a renaissance among craftspeople. This is T.D. Walshaw's guide to the art, aimed not only at the experienced woodturner, but also at the novice.

**English  
Mechanic**

## and World of Science A

Standard Dictionary of the English Language, Upon Original Plans ...Household WordsHousehold WordsBuilding AgeCarpentry and BuildingThe Workshop Book With alphabetical indexes of firms and trade specialties. *Carpentry and Building* Crowood This practical, instructional book describes the construction of a model of

the Lampitt portable steam engine, which dates back to 1862, and which provided rotative power to drive threshing machines, circular saws, feed mills and other farm machinery. The construction of every component is described in precise detail and the text is supported by many helpful step-by-step photographs. In addition, useful advice is provided about obtaining materials and

about the tools that are required to equip a model-engineering workshop. Accordingly, the information provided in this fascinating book will enable the reader to construct not only the Lampitt engine but also many other engineering models in the future. When the reader has finished building 'the Lampitt' he will, in effect, have completed an

engineering apprenticeship , and will have a model engine of which he can be proud and which fully reveals the skills that he has learned. Fully illustrated with 142 step-by-step colour photographs. The Workshop Book Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately paged and not included in the consecutive numbering of the regular series.

### **Building a Portable Steam Engine**

"This may be the first and only (book) to take a hard look at the layout of the woodworker's workshop".-- "Booklist".

301color photos. 70 drawings.
