- Ms. Coburn's Class Website Max has a bank account with a 5% annual growing rate and he starts off with \$10000 in his account. Use function notation to write an equation to see how much money he will have in  $x$  years. Answer  $f(x)=10000(1.05)^x$   $f(x)$  stands for the money in his account after  $x$  years.  $x$  represents the number of years he leaves his account.
