**Primarily Logic** SAGE Publications

Four starred reviews greeted this new, groundbreaking classic from Deborah Wiles! Franny Chapman just wants some peace. But that's hard to get when her best friend is feuding with her, her sister has disappeared, and her uncle is fighting an old war in his head. Her saintly younger brother is no help, and the cute boy across the street only complicates things. Worst of all, everyone is walking around just waiting for a bomb to fall. It's 1962, and it seems that the whole country is living in fear. When President Kennedy goes on television to say that Russia is sending nuclear missiles to Cuba, it only gets worse. Franny doesn't know how to deal with what's going on in the world--no more than she knows with how to deal with what's going on with her family and friends. But somehow she's got to make it.

Grades 2-4 Nelson Thornes

Jake remembers the terrible days in third grade when everybody thought he was the teachers' pet. *Countdown* Teacher Created Materials

Here's an easy-to-use, quick reference guide for apps that supplement student learning. It gives suggestions for how teachers can implement each app in the classroom and for how parents can use the apps at home to extend their child's learning. This resource is correlated to the Common Core State Standards, is aligned to the interdisciplinary themes from the Partnership for 21st Century Skills, and supports core concepts of STEM instruction.

I looked and saw water rushing in from Galveston Bay on one side and from the gulf on the other. The two seas met in the middle of Broadway, swirling over the wooden paving blocks, and I couldn't help but shudder at the sight. All of Galveston appeared to be under water. Galveston, Texas, may be the booming city of the brand-new twentieth century, but to Seth, it is the end of a dream. He longs to be a carpenter like his father, but his family has moved to Galveston so he can

go to a good school. Still, the last few weeks of summer might not be so bad. Seth has a real job as a builder and the beach is within walking distance. Things seem to be looking up, until a storm warning is raised one sweltering afternoon. No one could have imagined anything like this. Giant walls of water crash in from the sea. Shingles and bricks are deadly missiles flying through the air. People not hit by flying debris are swept away by rushing water. Forget the future, Seth and his family will be lucky to survive the next twenty-four hours. *Dark Water Rising* is a 2007 Bank Street - Best Children's Book of the Year.

These resources provide invaluable support within the Key Maths series for all mathematics teachers, whether specialists or non-specialist, experienced or new to the profession.

*Glencoe Math 2016, Course 2 Student Edition* Routledge

Mingle in some math to everyday teaching! *Fast Ideas for Busy Teachers: Math* has hundreds of ideas that will fit into a hectic schedule and enliven third-grade students' exploration of mathematics. The book is organized by math skills, which makes it easy to find a topic when it's needed. Open-ended lessons allow adaptation of activities to meet students' needs. The lessons are perfect for substitutes, rainy-day activities, homework, and in-class assignments. The book

includes tips for managing a classroom, getting organized, getting to know students, and implementing behavior management. This 80-page book also includes reproducibles and aligns with Common Core State Standards, as well as state and national standards.

**Practice and Sample Test Workbook** Carson-Dellosa Publishing

Ten days before the start of kindergarten, a preschooler can not tie her shoes by herself and fears the worst.

**The ABCs of CBM, Second Edition** Oswaal Books and Learning Private Limited

It's never too early to start building thinking skills—skills that will spill over into other areas of the curriculum and into real life. Primarily Logic consists of a series of units designed to introduce logical thinking to young students. It is an excellent, easy-to-use starting point for teaching well-established forms of logical thinking. Each skill is introduced with examples, and then worksheets give students an opportunity to practice the skill. Group lessons and worksheets provide practice in: finding relationships, analogies, thinking logically using “all” and “none” statements, syllogisms, and deductive reasoning using logic puzzles. Logical thinking is both enjoyable and challenging for students as they build a sound foundation for further instruction in critical thinking. Suggestions for related activities are included in the Instructions for Teachers section. For easier logic activities for younger students, try Lollipop Logic. Grades 2-4

**Math Advantage** Routledge

The Essential Mathematics for Cambridge Secondary 1 series has been created for the international student. Written by an expert author team with an experienced examiner, it provides complete coverage of the latest Cambridge syllabus. The Student Book contains comprehensive coverage of the curriculum framework content and provides engaging exercises that promote problem solving and investigative strategies. Inclusion of summary and review sections after each topic help students retain learning, while Checkpoint-style questions assist their preparation for assessment. Learning Outcomes are provided at the start of each chapter to clearly map topics in the text to the syllabus. Numerous exercises are included, with clear progression, and problem-solving and real life applications embedded throughout. Helpful hints throughout the text guide students and remind them of the key pieces of information required.

**Jake Drake, Teacher's Pet** Simon and Schuster

Models of Teaching: Connecting Student Learning with Standards features classic and contemporary models of teaching appropriate to elementary and secondary settings. Authors Jeanine M. Dell'Olio and Tony Donk use detailed case studies to discuss 10 models of teaching and demonstrate how they can be connected to state content standards and benchmarks, as well as technology standards. This book provides readers with the theoretical and practical understandings of how to use models of teaching to both meet and exceed the growing expectations for research based instructional practices and student achievement.

This classic book will excite students' imaginations while enriching skills in logical thinking. Logic Countdown problems are easy to incorporate into lesson plans and are formatted to enhance the fullest spectrum of curriculum areas while sharpening thinking skills. Challenging and instructional, these thought-provoking books present sequential exercises in logical reasoning that include relationships, analogies, syllogisms, sequences, deductive reasoning, inference, truth-values, and logical notation. Simple grids coupled with intriguing problems evoke enthusiasm and inspire students to higher and higher levels of thinking. Each book in this series builds on concepts presented previously in the series to offer a comprehensive logic adventure for young thinkers. The skills students build by using this book are applicable to several areas of the curriculum. Academic skills used for reading, math, writing, and science all depend on the ability to perceive and define relationships and to form inferences. But, beyond the academic world, students will find logical thinking an integral part of everyday life. This is the first in a three-book series designed to sharpen children's logical thinking skills. Once students master the skills presented in this book,

they will be ready for new challenges in Logic Liftoff and Orbiting with Logic.

**MANCS-2021** Henry Holt and Company (BYR)

Prepare to be swept up by this exquisite novel that reminds us that grief and love can open the world in mystical ways. Winner of the Stonewall Book Award! Winner of the Lambda Literary Award! Caroline Murphy is a Hurricane Child. Being born during a hurricane is unlucky, and twelve-year-old Caroline has had her share of bad luck lately. She's hated and bullied by everyone in her small school on St. Thomas of the US Virgin Islands, a spirit only she can see won't stop following her, and -- worst of all -- Caroline's mother left home one day and never came back. But when a new student named Kalinda arrives, Caroline's luck begins to turn around. Kalinda, a solemn girl from Barbados with a special smile for everyone, becomes Caroline's first and only friend -- and the person for whom Caroline has begun to develop a crush. Now, Caroline must find the strength to confront her feelings for Kalinda, brave the spirit stalking her through the islands, and face the reason her mother abandoned her. Together, Caroline and Kalinda must set out in a hurricane to find Caroline's missing mother -- before Caroline loses her forever.

**Countdown to Global Catastrophe** Grey House Publishing

The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, The 2030 Spike serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.
