 I found the depreciation to barely budge. They still smell new at this point! Also, manufacturers typically call an RV a 2019 model when it's sold in 2018, for example, so it's tough to know how much use an RV actually had when it's listed as being two years old. The gross numbers don't tell us the complete picture here.

 Having never owned an RV before when we started in 2005, we had no idea what we needed in the way of RV insurance. We quickly learned that RV insurance is much like automobile insurance except that full-timers on forums and websites were recommending something called Full-timer Coverage AND Total Loss Replacement Coverage - coverages that are not offered for autos.
 RV Insurance - Understanding the Coverages
 Answer: The RV lights operate on your 12-VDC Coach battery. Your Hot Water Heater operates on either Propane or 110-VAC. Your RV Fridge, if it is one of the standard 2-Way Fridge units will operate on propane or 110-VAC. But the Fridge uses the 12-VDC to power its control panel. The breaker for your Hot Water Heater is a 110-VAC breaker.

 If you used the RV in your business, such as driving tour groups, using the Standard Mileage rate might make sense, but not when you are renting the RV. Yes, the IRS gives RV's a "depreciatable" life of 5 years. If you are not able to take the full loss in a year, the loss is carried-forward until you can.
