MORA CYNTHIA

From Personality to Virtue Routledge

Character plays a central role in our everyday understanding and evaluation of ourselves and one another. It informs the expectations that ground our plans and projects, our moral responses to other people's behaviour and to opportunities we ourselves face, and our political decisions concerning formal education, criminal punishment, and other aspects of social organisation. The very idea that people have persisting character traits that explain their behaviour is woven throughout the fabric of our culture. These philosophical essays clarify this idea of character, analyse its relation with the findings of experimental psychology, and draw out the implications of this for education and for criminal punishment. They bring together a range of issues in contemporary philosophy, including the nature of agency, the modelling of behavioural cognition, ethical implications of personal necessity, moral responsibility for implicit

bias, the prospects for character education, and the nature of rightful criminal punishment. The essays emphasise that character is inherently dynamic, challenging the tendency among personality psychologists and virtue ethicists alike to focus on static snapshots of traits, and they emphasise the close integration of character with the individual's social context, seeking to accommodate the situationist experimental findings within a picture of behaviour as manifesting stable character traits. The volume is intended to demonstrate the deep conceptual affinity of moral philosophy and social psychology and the consequent potential for each to benefit from the other.

Joyce Carol Oates's prize-winning story "Where Are You Going, Where Have You Been?" takes up troubling subjects that continue to occupy her in her fiction: the romantic longings and limited options of adolescent women; the tensions between mothers and daughters; the sexual victimization of women; and the American obsession with violence. Inspired by a magazine story about a serial killer, its remarkable portrait of the dreamy teenager

Connie has made it a feminist classic. Connie's life anticipates the emergence of American society from the social innocence of the fifties into the harsher contemporary realities of war, random violence, and crime. The story was the basis for the movie *Smooth Talk*, which became the subject of much feminist debate. This casebook includes an introduction by the editor, a chronology of Oates's life, and authoritative text of "Where Are You Going, Where Have You Been?" an essay by Oates on *Smooth Talk*, the original *Life* article about the serial killer, ten critical essays (including two about the film), and a bibliography. The contributors are Brenda O. Daly, Christina Marsden Gillis, Don Moser, Tom Quirk, B. Ruby Rich, R.J.R. Rockwood, Larry Rubin, Gretchen Schultz, Marie Mitchell Oleson Urbanski, Joyce M. Wegs, and Joan D. Winslow. Elaine Showalter is Avalon Foundation Professor of Humanities at Princeton University. She is the author and editor of many books on women's writing, including *Sister's Choice: Tradition and Change in American Women's Writing*. A volume in the *Women Writers: Texts and Contexts Series*. [Sessional Papers](#) Essential Papers on Character Neurosis & Treatment

Character refers to the unique aspects of behavior which make up each individual's patterns of thought, attitude, and effect. In this collection, Ruth Lax has put together the seminal papers which both define the constuence of character and its disorders and elucidate some of the persistent controversy regarding the treatment of character neurosis.

Virtues and reasons are two of the most fruitful and important concepts in contemporary moral philosophy. Many writers have commented upon the close connection between virtues and reasons, but no one has done full justice to the complexity of this connection. It is generally recognized that the virtues not only

depend upon reasons, but also sometimes provide them. The essays in this volume shed light on precisely how virtues and reasons are related to each other and what can be learned by exploring this relationship. *Virtue's Reasons* is divided into three sections, each of them devoted to a general issue regarding the relationship between virtues and reasons. The first section analyzes how the virtues may be related to, or linked with, normative reasons in ways that improve our understanding of what constitutes virtuous character and ethical agency. The second section explores the reasons moral agents have for cultivating the virtues and how the virtues impact moral responsiveness or development. The final section examines how reasons can be employed in understanding the nature of virtue, and how specific virtues, like modesty and practical wisdom, interact with reasons. This book will be of major interest to scholars working on virtue theory, the nature of moral character, and normative ethics.

Optical character recognition (OCR) is the most prominent and successful example of pattern recognition to date. There are thousands of research papers and dozens of OCR products. *Optical Character Recognition: An Illustrated Guide to the Frontier* offers a perspective on the performance of current OCR systems by illustrating and explaining actual OCR errors. The pictures and analysis provide insight into the strengths and weaknesses of current OCR systems, and a road map to future progress. *Optical Character Recognition: An Illustrated Guide to the Frontier* will pique the interest of users and developers of OCR products and desktop scanners, as well as teachers and students of pattern recognition, artificial intelligence, and information retrieval. The first chapter compares the character recognition abilities of humans and computers. The next four chapters present 280 illustrated examples of recognition errors, in a taxonomy consisting of Imaging Defects, Similar Symbols, Punctuation, and Typography. These examples were drawn from large-scale tests conducted by the authors. The final chapter discusses possible approaches for improving the accuracy of today's systems, and is followed by an annotated bibliography. *Optical Character Recognition: An Illustrated Guide to the Frontier* is suitable as a

secondary text for a graduate level course on pattern recognition, artificial intelligence, and information retrieval, and as a reference for researchers and practitioners in industry.

From the celebrated author of *The English Patient* and *In the Skin of a Lion* comes a remarkable new novel of intersecting lives that ranges across continents and time. In the 1970s in northern California, near Gold Rush country, a father and his teenage daughters, Anna and Claire, work their farm with the help of

Coop, an enigmatic young man who makes his home with them. Theirs is a makeshift family, until it is riven by an incident of violence — of both hand and heart — that sets fire to the rest of their lives. *Divisadero* takes us from the city of San Francisco to the raucous backrooms of Nevada's casinos, and eventually to the landscape of south central France. It is here, outside a small rural village, that Anna becomes immersed in the life and the world of a writer from an earlier time — Lucien Segura. His compelling story, which has its beginnings at the turn of the century, circles around "the raw truth" of Anna's own life, the one she's left behind but can never truly leave. And as the narrative moves back and forth in time and place, we discover each of the characters managing to find some foothold in a present rough-hewn from the past. Breathtakingly evoked and with unforgettable characters, *Divisadero* is a multi-layered novel about passion, loss, and the unshakable past, about the often discordant demands of family, love, and memory. It is Michael Ondaatje's most intimate and beautiful novel to date.

Sample Chapters- FOR THE BETTER, Marvin W Berkowitz, University of Missouri—St. Louis - THE OVERLOOKED INEQUITY, Eric Schaps The Journal of Character Education is the only professional journal in education devoted to character education. It is designed to cover the field—from the latest research to applied best practices. We include original research reports, editorials and conceptual articles by the best minds in our field, reviews of the latest books, and other relevant strategies and manuscripts by educators that describe best practices in teaching and learning related to character education. The Journal of Character Education has for over a decade been the sole scholarly journal focused on research, theory, measurement, and practice of character education. In this issue of the Journal of Character Education we return to something foundational and introduce something new. The foundational element is a set of six independent scholarly manuscripts by a mix of emerging and established scholars. We are pleased to introduce a new feature of the Journal of Character Education in this issue, namely a section we are calling simply "Opinion." We began the JCE with an exclusive focus on publishing scholarship because there was no scholarly journal that focused on character education. Over time we realized that we wanted to speak about practice and particularly to practitioners as well. Hence we created a section we call "Voices" to present innovations and perspectives representing the "voices" of exemplary practitioners of character education. Now we introduce the "Opinion" section that will allow us to publish perspectives from leading authorities in the field that might be more provocative. We would love to hear responses to either or both opinion articles and are working on plans to share such responses, perhaps on one of our related websites. At this point, we plan on publishing more opinion articles, and for now, by invitation. However, we are always willing to consider unsolicited articles for possible inclusion in the JCE.
