TAYLOR EATON

Cities and the Super-Rich Simon and Schuster

This comprehensive book uses a rich array of case studies from cities in Asia, Latin America, Africa, Southern Europe, and beyond to highlight the intensifying global struggle over urban space and underline gentrification as a growing and important battleground in the contemporary world.

The Report: Abu Dhabi 2010 Routledge

Hydrocarbons revenues still form the bulk of Abu Dhabi's GDP and while falling prices are a concern, the emirate has been moving steadily towards its economic diversification targets in line with Abu Dhabi Economic Vision 2030. The past 10 years has seen the non-oil sector expand strongly on the back of business-friendly government policies, as a result of which non-oil sector growth now outpaces that of the oil sector. Outside of hydrocarbons, construction and manufacturing represent the biggest GDP contributors in the emirate, with the construction sector poised to enter a period of renewed expansion and manufacturing identified as a key area for future growth, leveraging the emirate's natural resources, growing downstream capabilities and strategic location. Elsewhere Abu Dhabi's financial sector continues to assert itself and the expected 2015 launch of Abu Dhabi Global Market, the UAE's second financial free zone, is expected to boost activity in the sector. Meanwhile visitor numbers to Abu Dhabi continue to rise, with around 3.5m arrivals in 2014, up 25% on the previous year. This growth is expected to continue as major infrastructure upgrades continue apace. These include the expansion of Abu Dhabi International Airport and the development of the 1200-km wide Etihad rail project.

Forbes Manchester University Press

Using four Gulf sovereign wealth funds as case studies - Iran, Kuwait, Saudi Arabia and the UAE - this book examines and analyses the history, governance and structure, and investment strategies of the above mentioned funds, in the context of on-going debates about their transparency. The book discusses how most Gulf sovereign wealth funds were established under colonial rule, and have operated in the global financial system for many decades. With the increase of oil revenues, it goes on to look at how the funds have broadened their asset classes and their institutional development. Debate over the transparency of sovereign wealth funds has highlighted various global practices. Recently, organisational measures have been introduced for calculating possible risks from non-commercial investment incentives of funds, whose politically-driven investment strategies are viewed as potentially a major threat to the national security of their host countries. Highlighting a number of incidents that triggered the transparency debate, the book scrutinises the reaction of some of the Gulf sovereign wealth funds to these recent regulatory codes and strategies. It is a useful contribution to Development, Political Economy and Middle East Studies.

The Report: Abu Dhabi 2014 The Business Year

Taking on the key issues in urban design, *Shaping the City* examines the critical ideas that have driven these themes and debates through a study of particular cities at important periods in their development. As well as retaining crucial discussions about cities such as Los Angeles, Atlanta, Chicago, Detroit, Philadelphia, and Brasilia at particular moments in their history that exemplified the problems and themes at hand like the mega-city, the post-colonial city and New Urbanism, in this new edition the editors have introduced new case studies critical to any study of contemporary urbanism - China, Dubai, Tijuana and the wider issues of informal cities in the Global South. The book serves as both a textbook for classes in urban design, planning and theory and is also attractive to the increasing interest in urbanism by scholars in other fields. *Shaping the City* provides an essential overview of the range and variety of urbanisms and urban issues that are critical to an understanding of contemporary urbanism.

Subprimes and Real Estate Bubbles Oxford Business Group

This new collection reveals the contrasts and similarities between older, traditional Arab cities and the newer oil-stimulated cities of the Gulf in their search for development and a place in the world order.

Global Sukūk and Islamic Securitization Market BRILL

Abu Dhabi's urban development path contrasts sharply with its exuberant neighbour, Dubai. As Alamira Reem puts it, Abu Dhabi, capital of the United Arab Emirates since 1971, 'has been quietly devising its own plans ... to manifest its role and stature as a capital city'. Alamira Reem, a native Abu Dhabian and urban planner and researcher who has studied the emirate's development for more than a decade, is uniquely placed to write its urban history. Following the introduction and description of Abu Dhabi's early modern history, she focuses on three distinct periods dating from the discovery of oil in 1960, and coinciding with periods in power of the three rulers since then: Sheikh Shakhbut bin Sultan Al Nahyan (1960-1966), Sheikh Zayed bin Sultan Al Nahyan (1966-2004), and Sheikh Khalifa bin Zayed Al Nahyan (2004-). Based on archival research, key interviews and spatial mapping, she analyses the different approaches of each ruler to development; investigates the role of planning consultants, architects, developers, construction companies and government agencies; examines the emergence of comprehensive development plans and the policies underlying them; and assesses the effects of these many and varied influences on Abu Dhabi's development. She concludes that, while much still needs to be done, Abu Dhabi's progress towards becoming a global, sustainable city provides lessons for cities elsewhere.

The Report: Ras Al Khaimah 2010 Oxford Business Group

Although the emirate's economic growth can be primarily attributed to its vast hydrocarbons resources, it has also made progress diversifying into new sectors such as manufacturing, tourism, aerospace, defence, finance and logistics. In addition to its economic investments, Abu Dhabi has also made major contributions to social welfare as well as infrastructure, which has been identified as the bedrock for future growth. The government has played a key role in the expansion of the security, aerospace and defence industry over the past decade in an effort to strengthen the UAE's defence capabilities and as a means of boosting economic diversification. Despite challenges such as a high level of regional competition, most local defence and aviation firms expect to see continued expansion for years to come. The evidence suggests that the emirate has succeeded in nurturing new economic sectors and is on track to meet its goals. The oil and gas sector accounted for 56.5% of Abu Dhabi's GDP at current prices in 2012, followed by construction (9.6%), manufacturing (5.9%) and real estate (4.4%).

United Arab Emirates Land Ownership and Property Laws Handbook Volume 1 Strategic Information and Dubai Property Laws Oxford Business Group

Explains that current global economic power is steadily shifting away from the United States to foreign countries and private investors in ways that the U.S. government cannot control and the average American knows nothing about. Reprint.

The Retail Market Study 2015 of The Location Group is the one and only study of its kind worldwide. The focus of the Retail Bible are the 150 of the most notable international cities of the fashion and retail world and more than 3'000 store openings on 1,670 pages. Over 1,300 retailers, 800 shopping streets and 500 shopping centers were analyzed. The study reached more than 250,000 readers worldwide so far.

United Arab Emirates Oxford Business Group

Today is a new metropolitan age and for the first time ever more people live in cities than they do anywhere else. As cities strengthen their international and cultural influence, the global world is acted out most articulately in the world's urban hubs - through its diverse cultures, broad networks and innovative styles of governance. Looking at the city through its internal dynamics, the book examines how governance and cultural policy play out in a national and international framework.

Making a truly global contribution to the literature, editors Isar and Anheier bring together a truly international and highly-respected collection of scholars. In doing so, they skilfully steer debates beyond the city as an economic powerhouse, to cover issues that fully comprehend a city's cultural dynamics and its impact on policy including alternative economies, creativity, migration, diversity, sustainability, education and urban planning. Innovative in its approach and content, this book is ideal for students, scholars and researchers interested in sociology, urban studies, cultural studies, and public policy.

Oil and the political economy in the Middle East Springer

This Selected Issues paper focuses on the real estate market and Expo 2020 in the United Arab Emirates. It discusses the measures that could mitigate risks associated with the real estate cycle and the international experience with real estate booms and hosting large events such as World Expos, Olympic Games, and World Cup tournaments. The paper discusses the recent developments in the segments of the real estate market in Abu Dhabi and Dubai, focusing on changes in sales prices, rents, and supply in the market. It also takes stock of measures the authorities have introduced recently to reduce the potential for speculative pressure in the real estate market.

Cultures and Globalization Policy Press

This book explores the process of policymaking and implementation in the finance, energy and security sectors in the United Arab Emirates. It looks at the role of informal advisory networks in a nascent private sector, federal politics, and historical ties in foreign relations.

Abu Dhabi's Vision 2030 Springer Nature

United Arab Emirates - Yearbooks.

The Report: Abu Dhabi 2007 Routledge

Subdued oil prices prompted a trimmed federal budget for 2016 as the UAE, like other countries in the region, tightened its belt in response to falling hydrocarbons revenues. However, a sustained focus on economic diversification and targeted investment in Abu Dhabi's key non-oil sectors in recent years means the emirate is well positioned to weather the storm. Looking forward, plans for future development are mapped out in Abu Dhabi Economic Vision 2030, a comprehensive economic policy document that aims to reduce dependence on oil and gas, thereby creating a more sustainable knowledge-based economy for the emirate and its inhabitants. Aided by hydrocarbons reserves that are among the world's largest and substantial financial resources, Abu Dhabi has built up a strong foundation to become a regional leader and an increasingly important global player in a wide variety of sectors, including oil and gas, financial services, health care, aviation and renewable energy.

UAE 2022 World Scientific

This book aims to tell the Abu Dhabi story in economic development, from its past dominance in oil to its economic vision for the future. More than being an exemplar of industrial restructuring and diversification from a resource-based to a 21st century knowledge-based economy and society, Abu Dhabi emphasises its cultural legacy and tradition as an environmental advocate for green and sustainable pathways. It has as many challenges as creative responses to show that its success is

not by wealth alone. This case study unveils Abu Dhabi in particular and the rest of Arabic and GCC economic development in general. They have all attracted foreign investment and global business, typically as hydrocarbon-rich resource economies. Beyond that, the geoeconomics and geopolitics of the Middle East and North Africa, with or without the Arab Spring in 2011 is in and of itself, a rich region for multidisciplinary studies and research, not just for economics and business. With Qatar, Abu Dhabi boasts of one of the highest per capita income in the world; therein lies a reason to enquire about its success and pivotal role in the GCC and global contexts.

The Report: Malaysia 2011 - Oxford Business Group Bloomsbury Publishing

This publication sets out to shine a spotlight on the sustainability agenda, examining topics including the blue economy, hydrocarbons, green energy, transformative technology, and more. It features interviews with dozens of public- and private-sector leaders and is a key handbook for anyone looking to invest in the UAE.

The Business Year: Abu Dhabi 2020 Oxford Business Group

Emerging Asia was the fairytale story to emerge from the economic horror that engulfed much of the world in 2008 and 2009. Even at the height of the crisis key emerging Asian economies made headlines for extraordinary macro growth numbers. But the question frequently asked is whether emerging Asian nations, especially China, will be able to sustain their pace of growth. In this timely book, Asian expert Aaron Chaze asks whether the booming Asian economies have what it takes to move away from an export-led, external-trade dominated economy and truly embrace a free-market philosophy. The Asia Investor provides a solid framework for analyzing investment opportunities across the region and picking potential winners. Asia is buoyed by several trends that drive these opportunities and it is the analysis of these trends that forms the core of this book.

The Income Approach to Property Valuation The Business Year

An accessible guide to buying, selling or investing like a professional in the Saudi Real Estate market. Saudi has one of the most important real estate markets in the Middle East, but the nature of many of the transactions within it offer investors great opportunities. This book allows non real estate professionals to develop basic real estate skills to better understand the market, capitalize on opportunities, and to be aware of common market tricks and scams.

United Arab Emirates Land Ownership and Agricultural Laws Handbook - Strategic Information and Basic Regulations

Planning Abu Dhabi International Monetary Fund

The economic recovery in the U.A.E. is gaining strength, but subject to increased regional uncertainty. The government should undertake cost-benefit analysis and implement projects that have high economic return. In order to reduce government-related entities (GRE) risks, the authorities should complete restructuring of GRE debt and communicate their strategy by developing a GRE risk management framework. The central bank has taken steps in strengthening risk monitoring and the management system. The progress made by National Bureau of Statistics (NBS) in establishing macroeconomic statistics proved an important step toward developing statistical capacity.
