“Each of these little books is witty and dramatic and creates a sense of time, place, and character....I cannot think of a better way to introduce oneself and one’s friends to Western civilization.”—Katherine A. Powers, Boston Globe. “Well-written, clear and informed, they have a breezy wit about them....I find them hard to stop reading.”—Richard Bernstein, New York Times. “Witty, illuminating, and

blessedly concise.”—Jim Holt, Wall Street Journal. These brief and enlightening explorations of our greatest thinkers bring their ideas to life in entertaining and accessible fashion. Philosophical thought is deciphered and made comprehensive and interesting to almost everyone. Far from being a novelty, each book is a highly refined appraisal of the philosopher and his work, authoritative and clearly presented.

Al-Kindi emerges as a philosopher who attempted to present, interpret, and supplement past philosophies as parts of

an essentially unified tradition that would make for a viable philosophy in Islamic society. He assumes a place at or near the beginning of a philosophical current—based on transmission of studies from late Greek thought—that remained vital in the Islamic world for several centuries. Alfred L. Ivry presents a reevaluation of al-Kindi's relationships with the powerful group of theologians, Mu'tazilah. The commentary defines and interprets terms used by al-Kindi, identifies original Arabic and Greek sources, and analyzes the most recent critical research related to each allusion. Complete bibliography and index of Aristotelian sources.

An Essay Concerning Human Understanding Gramercy

Catherine Zuckert examines the work of five key philosophical figures from the nineteenth and twentieth centuries through the lens of their own decidedly postmodern readings of Plato. She argues that Nietzsche, Heidegger,

Gadamer, Strauss, and Derrida, convinced that modern rationalism had exhausted its possibilities, all turned to Plato in order to rediscover the original character of philosophy and to reconceive the Western tradition as a whole. Zuckert's artful juxtaposition of these seemingly disparate bodies of thought furnishes a synoptic view, not merely of these individual thinkers, but of the broad postmodern landscape as well. The result is a brilliantly conceived work that offers an innovative perspective on the relation between the Western philosophical tradition and the evolving postmodern enterprise.

Although Abu Hamid Muhammad al-Ghazali lived a relatively short life (1058-1111), he established himself as

one of the most important thinkers in the history of Islam. *The Incoherence of the Philosophers*, written after more than a decade of travel and ascetic contemplation, contends that while such Muslim philosophers as Avicenna boasted of unassailable arguments on matters of theology and metaphysics, they could not deliver on their claims; moreover, many of their assertions represented disguised heresy and unbelief. Despite its attempted refutation by the twelfth-century philosopher Ibn Rushd, al-Ghazali's work remains widely read and influential.

The object of the present work is mainly to serve as a text book for students of History of Religions or Historical Phenomenology of Religion at the University level. This book intended also for the use of those who wish to become acquainted in a systematic and critical manner with the main themes of the History of Religions, and of other persons who are either concerned in the education of youth or whose work it may be to present scientifically accurate conclusions with regard to the various

subjects of the History of Religions. There exist excellent text books which treat of particular religions or which contain chapters on individual religions without studying them comparatively or phenomenologically. There are very few text books that attempt to present the main themes of the History of Religions in such a way as to explain the signification of the religious phenomena that are found in various religions by means of the historical-comparative method.

A History of God Courier Corporation
A page-turning novel that is also an exploration of the great philosophical concepts of Western thought, Jostein Gaarder's *Sophie's World* has fired the imagination of readers all over the world, with more than twenty million copies in

print. One day fourteen-year-old Sophie Amundsen comes home from school to find in her mailbox two notes, with one question on each: "Who are you?" and "Where does the world come from?" From that irresistible beginning, Sophie becomes obsessed with questions that take her far beyond what she knows of her Norwegian village. Through those letters, she enrolls in a kind of correspondence course, covering Socrates to Sartre, with a mysterious philosopher, while receiving letters addressed to another girl. Who is Hilde? And why does her mail keep turning up? To unravel this riddle, Sophie must use the philosophy she is learning—but the truth turns out to be far more complicated than she could have imagined.

This concise and authoritative guide provides a complete survey of Islamic history and thought from its formative period to the present day. It examines the unique elements which have combined to form Islam, in particular the Qu'ran and the influence of Muhammad, and traces the ways in which these sources have interacted historically to create Muslim theology and law, as well

as the alternative visions of Islam found in Shi'ism and Sufism. Combining core source materials with coverage of current scholarship and of recent events in the Islamic world, Andrew Rippin introduces this hugely diverse and widespread religion in a succinct, challenging and refreshing way. Using a distinctive critical approach which promotes engagement with key issues, from fundamentalism and women's rights to problems of identity and modernity, it is ideal for students seeking to understand Muslims and their faith. The improved and expanded third edition now contains brand new sections on twenty-first century developments, from the Taliban to Jihad and Al Qaeda, and includes updated references throughout.

The Laws is Plato's last, longest, and perhaps, most famous work. It presents a conversation on political philosophy between three elderly men: an unnamed Athenian, a Spartan named Megillus, and a Cretan named Clinias. They worked to create a constitution for Magnesia, a new Cretan colony that would make all of its citizens happy and virtuous. In this work, Plato combines political philosophy with applied legislation, going into great detail concerning what laws and procedures should be in the state. For example, they consider whether

drunkenness should be allowed in the city, how citizens should hunt, and how to punish suicide. The principles of this book have entered the legislation of many modern countries and provoke a great interest of philosophers even in the 21st century.
