We All Have Parts! a Little Book with Big Ideas about Healing Trauma Simon and Schuster

"Marine scientist Michael J. Moore says we are all whalers, but we don't have to be. Eating fish leads to North Atlantic right whales' entanglement and death. Buying goods made around the world requires global shipping routes, which do not accurately consider right whale breeding and feeding sites, leading to collision. To explain this, Moore conveys to readers scenes from over thirty years' worth of fieldwork, performing whale necropsies for animals stranded on beaches, working as an independent researcher alongside whalers using explosive harpoons, and tracking injured pregnant whales to deliver antibiotics. Despite these sometimes disturbing experiences, Moore has written a hopeful book. He uses these stories to show we can change and to tell us how; the technology for rope-less fishing and tracking whale migrations already exist to protect both right whales and the people who depend on shipping and fishing for their livelihoods"--

American opportunity is not dead. Bestselling author and entrepreneur John Hope Bryant outlines the mindset and practices that will allow us to achieve the American Dream, no matter what our current circumstances are. Americans have lost faith in their country. With job security disappearing and fewer glimpses of a better future, it can feel like we are barely surviving, much less thriving, in today's problematic economy. Americans want the "old" America back-- the America where opportunity comes knocking at the front door. But the real problem, John Hope Bryant says, is that we're forgetting that this is still the Land of Opportunity--a site of upward mobility, a place teeming with different ways to create and grow wealth. The opportunities of today are not only greater than the obstacles, but they are greater than they have ever been. What we need, he says, is a mindset shift--a way of recalibrating to recognize that there is still a bounty of resources for establishing entrepreneurship and success in this country. The first step for us, for America, is to remember our storyline--how, coming up from nothing, we established and harnessed the invincible American Dream.

We Know All About You shows how bulk spying came of age in the nineteenth century, and supplies the first overarching narrative and interpretation of what has happened since, covering the agencies, programs, personalities, technology, leaks, criticisms and reform. Concentrating on America and Britain, it delves into the roles of credit agencies, private detectives, and phone-hacking journalists as well as government agencies like the NSA and GCHQ, and highlights malpractices such as the blacklist and illegal electronic interceptions. It demonstrates that several presidents - Franklin D. Roosevelt, Lyndon B. Johnson, Richard M. Nixon - conducted political surveillance, and how British agencies have been under a constant cloud of suspicion for similar reasons. We Know All About You continues with an account of the 1970s leaks that revealed how the FBI and CIA kept tabs on anti-Vietnam War protestors, and assesses the reform impulse that began in America and spread to Britain. The end of the Cold War further undermined confidence in the need for surveillance, but it returned with a vengeance after 9/11. The book shows how reformers challenged that new expansionism, assesses the political effectiveness of the Snowden revelations, and offers an appraisal of legislative initiatives on both sides of the Atlantic.

Micro-stories and character sketches of individuals ranging from Pinkerton detective James McParlan to recent whistleblowers illuminate the book. We Know All About You confirms that governments have a record of abusing surveillance powers once granted, but emphasizes that problems arising from private sector surveillance have been particularly neglected.

The melting pot is no more. Where not very long ago we sought assimilation, we now pursue multiculturalism. Nowhere has this transformation been more evident than in the public schools, where a traditional Eurocentric curriculum has yielded to diversity--and, often, to confrontation and confusion. In a book that brings clarity and reason to this highly charged issue, Nathan Glazer explores these sweeping changes. He offers an incisive

account of why we all--advocates and skeptics alike--have become multiculturalists, and what this means for national unity, civil society, and the education of our youth. Focusing particularly on the impact in public schools, Glazer dissects the four issues uppermost in the minds of people on both sides of the multicultural fence: Whose "truth" do we recognize in the curriculum? Will an emphasis on ethnic roots undermine or strengthen our national unity in the face of international disorder? Will attention to social injustice, past and present, increase or decrease civil disharmony and strife? Does a multicultural curriculum enhance learning, by engaging students' interest and by raising students' self-esteem, or does it teach irrelevance at best and fantasy at worst? Glazer argues cogently that multiculturalism arose from the failure of mainstream society to assimilate African Americans; anger and frustration at their continuing separation gave black Americans the impetus for rejecting traditions that excluded them. But, willingly or not, "we are all multiculturalists now," Glazer asserts, and his book gives us the clearest picture yet of what there is to know, to fear, and to ask of ourselves in this new identity.

A couple years back, I was at the Phoenix airport bar. It was empty except for one heavy-set, gray bearded, grizzled guy who looked like he just rode his donkey into town after a long day of panning for silver in them thar hills. He ordered a Jack Daniels straight up, and that's when I overheard the young guy with the earring behind the bar asking him if he had ID. At first the old sea captain just laughed. But the guy with the twinkle in his ear asked again. At this point it became apparent that he was serious. Dan Haggerty's dad fired back, "You've got to be kidding me, son." The bartender replied, "New policy. Everyone has to show their ID." Then I watched Burl Ives reluctantly reach into his dungarees and pull out his military identification card from World War II. It's a sad and eerie harbinger of our times that the Oprah-watching, crystal-rubbing, Whole Foods-shopping moms and their whipped attorney husbands have taken the ability to reason away from the poor schlub who makes the Bloody Marys. What we used to settle with common sense or a fist, we now settle with hand sanitizer and lawyers. Adam Carolla has had enough of this insanity and he's here to help us get our collective balls back. In *Fifty Years We'll All Be Chicks* is Adam's comedic gospel of modern America. He rips into the absurdity of the culture that demonized the peanut butter and jelly sandwich, turned the nation's bathrooms into a lawless free-for-all of urine and fecal matter, and put its citizens at the mercy of a bunch of minimum wagers with axes to grind. Peppered between complaints Carolla

shares candid anecdotes from his day to day life as well as his past—Sunday football at Jimmy Kimmel's house, his attempts to raise his kids in a society that he mostly disagrees with, his big showbiz break, and much, much more. Brilliantly showcasing Adam's spot-on sense of humor, this book cements his status as a cultural commentator/comedian/complainer extraordinaire.
