The New Economics of Amartya Sen OUP Oxford
Essays examine barriers to economic growth, the struggle for economic equality, and the economic relations between the Third World and Western countries
Evolution of Economic Ideas Anchor
Amartya Sen has made deep and lasting contributions to the academic disciplines of economics, philosophy, and the social sciences more broadly. He has engaged in policy dialogue and public debate, advancing the cause of a human development focused policy agenda, and a tolerant and democratic polity. This argumentative Indian has made the case for the poorest of the poor, and for plurality in cultural perspective. It is not surprising that he has won the highest awards, ranging from the Nobel Prize in Economics to the Bharat Ratna, India's highest civilian honor. This public recognition has gone hand in hand with the affection and admiration that Amartya's friends and students hold

for him. This volume of essays, written in honor of his 75th birthday by his students and peers, covers the range of contributions that Sen has made to knowledge. They are written by some of the world's leading economists, philosophers and social scientists, and address topics such as ethics, welfare economics, poverty, gender, human development, society and politics. This first volume covers the topics of Ethics, Normative Economics and Welfare; Agency, Aggregation and Social Choice; Poverty, Capabilities and Measurement; and Identity, Collective Action and Public Economics. It is a fitting tribute to Sen's own contributions to the discourse on Ethics, Welfare and Measurement. Contributors include: Sabina Alkire, Paul Anand, Sudhir Anand, Kwame Anthony Appiah, A. B. Atkinson, Walter Bossert, Francois Bourguignon, John Broome, Satya R. Chakravarty, Rajat Deb, Bhaskar Dutta, James E. Foster, Wulf Gaertner, Indranil K. Ghosh, Peter Hammond, Christopher Handy, Christopher Harris, Satish K. Jain, Isaac Levi, Oliver Linton, S. R. Osmani, Prasanta K.

Liveright Publishing
Resources, Values and Development contains many of Amartya Sen's path-breaking contributions to development economics, including papers on resource allocation in nonwage systems, shadow pricing, employment policy, welfare economics, poverty assessment, gender-based inequality, and hunger and famines. *Resources, Values, and Development* Wiley-Blackwell
In this classic text, first published in 1973, Amartya Sen relates the theory of welfare economics to the study of economic inequality. He presents a systematic treatment of the conceptual framework as well as the practical problems of measurement of inequality. In his

masterful analysis, Sen assesses various approaches to measuring inequality and delineates the causes and effects of economic disparities. Containing the four lectures from the original edition as well as a new introduction, this timeless study is essential reading for economists, philosophers, and social scientists. In a substantial new annexe, Amartya Sen, jointly with James Foster, critically surveys the literature that followed the publication of this book, and also evaluates the main analytical issues in the appraisal of economic inequality and poverty. *Amartya Sen and Welfare Economics* International Monetary Fund

By the winner of the 1988 Nobel Prize in Economics, an essential and paradigm-altering framework for understanding economic development--for both rich and poor--in the twenty-first century. Freedom, Sen argues, is both the end and most efficient means of sustaining economic life and the key to securing the general welfare of the world's entire population. Releasing the idea of individual freedom from association with any

particular historical, intellectual, political, or religious tradition, Sen clearly demonstrates its current applicability and possibilities. In the new global economy, where, despite unprecedented increases in overall opulence, the contemporary world denies elementary freedoms to vast numbers--perhaps even the majority of people--he concludes, it is still possible to practically and optimistically retain a sense of social accountability. *Development as Freedom* is essential reading. *Readings in Human Development* Oxford University Press

This paper highlights that 10 new members joined the European Union on May 1, 2004, in the biggest enlargement of the community since its inception. However, the core economic concern is the weak growth performance of Europe—and particularly of the 12 countries at the epicenter of European integration that use the euro as their common currency—relative to the rest of the world and especially the United States. The paper highlights that underlying this concern are the

problems of sagging long-term trends in the growth of productivity, and the use of labor resources. *Theoretical Insights and Empirical Applications* Cambridge University Press

Resources, Values and Development contains many of Amartya Sen's path-breaking contributions to development economics, including papers on resource allocation in nonwage systems, shadow pricing, employment policy, welfare economics, poverty assessment, gender-based inequality, and hunger and famines. *Amartya Sen* Springer Nature

Contributed articles on debates regarding how to evaluate economic development and quality of life of people with new social indicators. *On Ethics and Economics* Routledge

Amartya Sen uses his 1999 work *Development as Freedom* to evaluate the processes and outcomes of economic development. Having come to the conclusion that development is best summed up as the expansion of freedom, Sen examines traditional definitions and understandings of the

term. He says people tend to think of freedoms as economic (the freedom to enter into market exchanges) or political (the freedom to vote and be an active citizen), and tries to understand why the definition has been so narrow hitherto. He concludes that an evaluation of true freedom must necessarily include the freedom to access social services such as healthcare, sanitation and nutrition, just as much as it must acknowledge economic and political freedoms. Evaluating the relevance of the current thinking behind development, Sen concludes that the term 'freedom' cannot simply be about income. In many ways, measuring income does not account for various "unfreedoms" (manmade or natural bars to wellbeing) that hinder development. Sen's evaluation is all the more powerful for its clarity: "The freedom-centered perspective has a generic similarity to the common concern with "quality of life."

Inequality Reexamined

Deep and Deep Publications

The noted economist and philosopher Amartya Sen argues that the dictum "all people are created

equal" serves largely to deflect attention from the fact that we differ in age, gender, talents, and physical abilities as well as in material advantages and social background. He argues for concentrating on higher and more basic values: individual capabilities and freedom to achieve objectives. By concentrating on the equity and efficiency of social arrangements in promoting freedoms and capabilities of individuals, Sen adds an important new angle to arguments about such vital issues as gender inequalities, welfare policies, affirmative action, and public provision of health care and education.

The Ethics and Economics of the Capability Approach

Open Book Publishers
From Nobel Prize winner Amartya Sen, a long-awaited memoir about home, belonging, inequality, and identity, recounting a singular life devoted to betterment of humanity. The Nobel laureate Amartya Sen is one of a handful of people who may truly be called "a global intellectual" (Financial Times). A towering figure in the field of economics, Sen is perhaps best known for his work on poverty and famine, as inspired by

events in his boyhood home of West Bengal, India. But Sen has, in fact, called many places "home," including Dhaka, in modern Bangladesh; Kolkata, where he first studied economics; and Trinity College, Cambridge, where he engaged with the greatest minds of his generation. In *Home in the World*, these "homes" collectively form an unparalleled and profoundly truthful vision of twentieth- and twenty-first-century life. Here Sen, "one of the most distinguished minds of our time" (New York Review of Books), interweaves scenes from his remarkable life with candid philosophical reflections on economics, welfare, and social justice, demonstrating how his experiences—in Asia, Europe, and later America—vitaly informed his work. In exquisite prose, Sen evokes his childhood travels on the rivers of Bengal, as well as the "quiet beauty" of Dhaka. The Mandalay of Orwell and Kipling is recast as a flourishing cultural center with pagodas, palaces, and bazaars, "always humming with intriguing activities." With characteristic moral

clarity and compassion, Sen reflects on the cataclysmic events that soon tore his world asunder, from the Bengal famine of 1943 to the struggle for Indian independence against colonial tyranny—and the outbreak of political violence that accompanied the end of British rule. Witnessing these lacerating tragedies only amplified Sen's sense of social purpose. He went on to study famine and inequality, wholly reconstructing theories of social choice and development. In 1998, he was awarded the Nobel Prize for his contributions to welfare economics, which included a fuller understanding of poverty as the deprivation of human capability. Still Sen, a tireless champion of the dispossessed, remains an activist, working now as ever to empower vulnerable minorities and break down walls among warring ethnic groups. As much a book of penetrating ideas as of people and places, *Home in the World* is the ultimate "portrait of a citizen of the world" (Spectator), telling an extraordinary story of human empathy across distance and time, and

above all, of being at home in the world.

India and its Contradictions OUP Oxford

In this elegant critique, Amartya Sen argues that welfare economics can be enriched by paying more explicit attention to ethics, and that modern ethical studies can also benefit from a closer contact with economies. He argues further that even predictive and descriptive economics can be helped by making more room for welfare-economic considerations in the explanation of behaviour.

An Essay on Entitlement and Deprivation Vedams eBooks (P) Ltd

A volume of essays on aspects of Amartya Sen's hugely influential and multi-disciplinary work.

On Ethics and Economics Elsevier
Civil Paths to Peace contains the analyses and findings of the Commonwealth Commission on Respect and Understanding, established in response to the 2005 request of Commonwealth Head of Government for the Commonwealth Secretary-General to 'explore initiatives to promote mutual understanding and respect among all faiths

and communities in the Commonwealth.' This report focuses particularly on the issues of terrorism, extremism, conflict and violence, which are much in ascendancy and afflict Commonwealth countries as well as the rest of the world. It argues that cultivating respect and understanding is both important in itself and consequential in reducing violence and terrorism. It further argues that cultivated violence is generated through fomenting disrespect and fostering confrontational misunderstandings. The report looks at the mechanisms through which violence is cultivated through advocacy and recruitment, and the pre-existing inequalities, deprivations and humiliations on which those advocacies draw. These diagnoses also clear the way for methods of countering disaffection and violence. In various chapters the different connections are explored and examined to yield general policy recommendations. Accepting diversity, respecting all human beings, and understanding the richness of perspectives that people have are of

great relevance for all Commonwealth countries, and for its 1.8 billion people. They are also important for the rest of the world. The civil paths to peace are presented here for use both inside the Commonwealth and beyond its boundaries. The Commonwealth has survived and flourished, despite the hostilities associated with past colonial history, through the use of a number of far-sighted guiding principles. The Commission argues that those principles have continuing relevance today for the future of the Commonwealth--and also for the world at large.

An Uncertain Glory

Harvard University Press
This book analyses the role of public action in solving the problem of hunger in the modern world and is divided into four parts: Hunger in the modern world, Famines, Undernutrition and deprivation, and Hunger and public action.

Resources, Values and Development Oxford University Press, USA

This book focuses on the causes of starvation in general and famines in particular. The traditional analysis of famines is shown to be fundamentally defective,

and the author develops an alternative analysis.

The Philosophy of Welfare Economics of Dr. Amartya Sen and Jain Philosophy MIT Press

This book is concerned with the study of collective preference, in particular with the relationship between the objectives of social action and the preferences and aspirations of society's members. Professor Sen's approach is based on the assumption that the problem of collective choice cannot be satisfactorily discussed within the confines of economics. While collective choice forms a crucial aspect of economics, the subject pertains also to political science, the theory of the state, and to the theory of decision procedures. The author has therefore used material from these disciplines, plus philosophical aspects from ethics and the theory of justice.

Amartya Sen's Inequality Re-Examined Harvard University Press

Papers presented at the 93rd Annual Conference of the Indian Economic Association, held at Punjab University during 27-29 December 2010.
Amartya Sen's Capability

Approach Cambridge University Press

The subject of discussion in this book is the philosophy of welfare Economics. The collective choice and the subjects of freedom through development are discussed in welfare economics. Inequality is to be reduced and basal equality has to be evolved to aid human welfare. The entitlement approach is the only solution for poverty and famine. All four subjects are woven in philosophical thought by Dr. Amartya Sen for the wellbeing of people. The book is a humble attempt at dealing with the subject of human welfare through religion. Killing is rampant in one or another form. The mantra of non-violence is the most valuable message to the world. The concept of non-killing is brought to light with the ancient agamic text of ACHARANG SUTRA. The view of Mahatma Gandhi on Ahimsa (non-violence) is compared with the Jain religious principle in modern context. It is important to be tolerant and to be able to understand others view points in the present situation. This is possible through Anakantvada of Jain religion. The non-

possessiveness of materialistic items and wealth are important issues discussed in the book. The Karma (deeds) are an important factor in ones life. Karma is solely responsible for the uplift or downfall of the human

soul. Jain religion works for the wellbeing of the human soul.

Arguments for a Better World: Essays in Honor of Amartya Sen Oxford University Press, USA

Presents an analysis of

what justice is, the transcendental theory of justice and its drawbacks, and a persuasive argument for a comparative perspective on justice that can guide us in the choice between alternatives.
