No Go-live without testing! But how do you make sure that your tests are comprehensive and deliver valid results?

This complete guide to test planning and test execution answers all of your questions. Not only will you learn the basics for a test strategy and a test methodology that fits the requirements of your solution, you will also understand functionality and usage of all the tools SAP and their partners provide for testing: Extensive, practical chapters on the most important tools, SAP Solution Manager and eCATT, as well as substantial

introductions to TDMS, HP Quality Center, and SAP LoadRunner show exactly how to perform functional and performance tests. In addition, for each tool you'll find a real-life project report from a renowned SAP customer.

SAPUI5 SAP PRESS

Learn every aspect of SAP S/4HANA and develop the skills needed to migrate from SAP ECC Key Features Gain insight into the implementation and configuration of SAP S/4HANA Design business processes with SAP Central Finance Learn the available SAP S/4HANA deployment options in depth Book Description SAP S/4HANA implementation, migration, and Central Finance are the key

projects being employed across the globe, with millions of consultants working day and night to implement them. Mastering SAP S/4HANA 1709 - Strategies for Implementation and Migration will allow you to gain a virtual implementation experience, and you can follow the steps to configure the learning system as per your requirements. This book focuses on several topics; each topic is covered in detail to make you a successful SAP S/4HANA professional. You will begin by understanding SAP HANA and then move toward S/4HANA and the deployment options available to customers, including what suits various

customer needs. You will then understand the impact of S/4HANA on General Ledger, Asset Accounting, and Profitability Analysis; SAP notes will also be listed when needed. As you progress through the book, you explore premigration, migration, and post-migration steps including the Near Zero Downtime strategy and learn how to implement Central Finance with and without MDG using SLT. In the concluding chapters, greenfield implementations using SAP Activate methodology will also be covered. By the end of this book, you will have learned to successfully implement SAP S/4HANA projects that are customized for your business needs. What you will learn

Understand SAP HANA and SAP S/4HANA
 Implement SAP S/4HANA as a greenfield implementation with SAP Activate methodology
 Discover the hidden challenges in SAP Central Finance
 Migrate from ECC to S/4HANA successfully in a non-disrupted roadmap
 Explore the change from Classic Asset Accounting to New Asset Accounting
 Learn to configure General Ledger, Profitability Analysis, and Controlling
 Apply the Near Zero Downtime strategy to migration projects
 Walk through Customer Vendor Integration (CVI)
 Who this book is for
 Mastering SAP S/4HANA 1709: Strategies for Implementation and

Migration is for project managers, solution architects, and consultants who are planning to implement SAP S/4HANA for ERP solutions and are in the process of implementing it or are currently upgrading/migrating to it.

 SAP PRESS
 Learn to code in ABAP, SAP's programming language
 This book explains ABAP in simple terms, and provides the guidance you need to become fluent in basic ABAP.
 Once you understand the basics, you'll write your first application, and then learn about more advanced language concepts.
 Step-by-step instructions, sample

code, and hands-on exercises help ensure that you can apply the skills you learn to real-life scenarios. With the help of this book you can take your coding to the next level.

Programming Basics
Become familiar with the very basics of ABAP, from syntax, string manipulation, and object creation, to code formatting, data types, and application development.

Programming Tools
Discover the tools at your disposal including the ABAP editor in Eclipse, updated programming features in the new release, and more. **Sample Code**
Follow along with step-by-step instructions and full sample code, and become familiar with the intricacies of ABAP as you create your very first

programs. Highlights:
ABAP basics
Flow control
Debugging
Creating tables
Defining objects
Data storage in standard memory
Modularization
Table syntax
Lock objects
Pretty print

Take a deep dive into SAP Fiori and discover Fiori architecture, Fiori landscape installation, Fiori standard

applications, Fiori Launchpad configuration, tools for developing Fiori applications and extending standard Fiori applications. You will learn: Fiori architecture and its applications Setting up a Fiori landscape and Fiori Launchpad Configuring, customizing and enhancing standard Fiori applications Developing Fiori native applications for mobile Internet of Things-based custom Fiori applications with the HANA cloud platform Bince Mathew, a SAP mobility expert working for an MNC in Germany, shows you how SAP Fiori, based on HTML5 technology, addresses the most widely and frequently used SAP transactions like purchase order

approvals, sales order creation, information lookup, and self-service tasks. This set of HTML5 apps provides a very simple and accessible experience across desktops, tablets, and smartphones. Prerequisites and steps for setting up a Fiori landscape and Launchpad Fiori standard application configuration Extending and customizing standard Fiori applications Developing custom Fiori applications from scratch Building custom Fiori applications for Internet Of Things using HANA cloud Fiori apps with cordova and kapsel plugins Warehouse Management with SAP EWM SAP PRESS How do you run your

warehouse with SAP S/4HANA? This comprehensive guide has the answers! Begin by setting up your embedded Extended Warehouse Management (EWM) system using organizational structures and master data. Then master your essential processes such as goods issue and receipt, putaway, picking, and taking inventory. Bring everything together with information on advanced tasks like cross-docking, value-added services, kitting, and integration with SAP TM and SAP GTS!--
[Implementing SAP S/4HANA Finance](#) SAP PRESS

Over the last few years, financial statement scandals, cases of fraud and corruption, data

protection violations, and other legal violations have led to numerous liability cases, damages claims, and losses of reputation. As a reaction to these developments, several regulations have been issued: Corporate Governance, the Sarbanes-Oxley Act, IFRS, Basel II and III, Solvency II and BilMoG, to name just a few. In this book, compliance is understood as the process, mapped not only in an internal control system, that is intended to guarantee conformity with legal requirements but also with internal policies and enterprise objectives (in particular, efficiency and profitability). The current literature primarily confines itself to mapping controls in

SAP ERP and auditing SAP systems. Maxim Chuprunov not only addresses this subject but extends the aim of internal controls from legal compliance to include efficiency and profitability and then well beyond, because a basic understanding of the processes involved in IT-supported compliance management processes are not delivered along with the software. Starting with the requirements for compliance (Part I), he not only answers compliance-relevant questions in the form of an audit guide for an SAP ERP system and in the form of risks and control descriptions (Part II), but also shows how to automate the compliance management process based on SAP GRC

(Part III). He thus addresses the current need for solutions for implementing an integrated GRC system in an organization, especially focusing on the continuous control monitoring topics. Maxim Chuprunov mainly targets compliance experts, auditors, SAP project managers and consultants responsible for GRC products as readers for his book. They will find indispensable information for their daily work from the first to the last page. In addition, MBA, management information system students as well as senior managers like CIOs and CFOs will find a wealth of valuable information on compliance in the SAP ERP environment, on

GRC in general and its implementation in particular.
