# Compound Interest Tables And Seven Place Logarithms Parts I And Iv Of Tables Of Applied Mathematics Bound In One Volume

---

The American Mathematical Monthly

Compound Interest Tables and Seven Place Logarithms

Both Simple and Compound, on All Sums from 1 Cent to \$10,000, and from One Day to Six Years. Also, Some Very Valuable Tables

Simple and Compound Interest ... on All Sums from 1 Day to 6 Years at 5, 6, 7, 8, 9 and 10 Per Cent ...

Smith's Interest Tables, at Five, Six, Seven and Three-tenths, Eight, Eight and One-half, Ten and Twelve Per Cent. Per Annum

Compound Interest and Insurance Tables and Seven Place Logarithms

Coffin's Interest Tables at One-Half One, Two, Three, Three-and-One-Half, Four, Four-and-One-Half, Five, Six, Seven, Eight and Ten Per-Cent, Per Annum, Showing the Interest on Any Amount From \$1. 00 to \$10, 000

Julian's Interest Tables

Universal Interest Tables at 4, 5, 6, 7, 8, and 10 Per Cent

The Ultimate Accountants' Reference Including GAAP, IRS & SEC Regulations, Leases, and More

Also Containing a Perennial Time-Table, Tab

Palmer Ready Interest Tables ...

Showing the Interest on Any Amount from \$1. 00 to \$10, 000 (Classic Reprint)

Porter and Coates' Interest Tables at One-Half, One, Two, Three, Three-And-One-Half, Four, Four-And-One-Half, Five, Six, Seven, Eight and Ten Per Cent Per Annum

A Bibliography of Social and Political Economy, Law and Education

At 3, 4, 5, 6, 7, 8, 9, and 10l. Per Cent. Per Ann. Also Tables of Compound Interest at the Same Rates. ... By John Smart, ...

Practical Tables Series

Showing the Interest on Any Sum from 1 to 100,000 Dollars, for from 1 Day to 1 Year, at 6,7,8,9, and 10 Per Cent. Per Annum, on the Basis of 360 Days Per Annum; and at 7 and 10 Per Cent. Per Annum for from 1 to 150 Days, on the Basis of 365 Days Per Annum, and Arranged for the Averaging of Accounts. A New Method of Arrangement, Greatly Facilitating Calculation and Diminishing Liability to Error. To which are Added Time, Sterling Exchange, Compound Interest, Present Worth and Due Date Tables

A Reader's Guide to the Choice of the Best Available Books (about 50,000) in Every Department of Science, Art and Literature, with the Dates of the First and Last Editions, and the Price, Size and Publisher's Name of Each Book

Improved Interest Tables, at Five Per Cent. for Every Day in the Year ...  
 Also Containing a Perennial Time-table, Tables of Values of Foreign Money  
 Actuarial Tables for Examination Purposes  
 Porter & Coates' Interest Tables of One-half, One, Two, Three, Three-and-one-half,  
 Four, Four-and-one-half, Five, Six, Seven, Eight and Ten Per Cent. Per Annum  
 Being the Sections Relating to Those Subjects in The Best Books, and The Reader's  
 Guide  
 Catalogue of the Library of Congress ; Index of Subjects, in Two Volumes  
 Smith's Interest Tables at Five, Six, Seven, ... Per Cent. Per Annum, Showing the  
 Interest on Any Sum from \$1.00 to \$10,000, from One Day to Five Years  
 At 3, 3 1/2, 4, 4 1/2, 5, 6, 7, 8, 9, 10, &c. to 50 Per Cent. Interest Compounded  
 Annually ...  
 Containing an Accurate Calculation of Interest, at 5, 6, 7, 8, 9, and 10 Per-cent, Both  
 Simple and Compound, on All Sums from 1 Cent to \$10,000, and from One Day to Six  
 Years ...

**The American Mathematical Monthly**  
 Forgotten Books  
 The perfect daily answer book for the  
 practicing accountant. The Ultimate  
 Accountants' Reference offers a single-  
 source tool of best practices and control  
 systems related to accounting

regulations for all aspects of financial  
 statements, accounting management  
 reports, and management of the  
 accounting department. In addition,  
 you'll gain insight into financing options,  
 pension plans, risk management,  
 mergers and acquisitions, and taxation  
 topics. Order your copy today!  
**Compound Interest Tables and  
 Seven Place Logarithms** Forgotten  
 Books  
 Practical Table Series, No. 8: Compound  
 Interest Functions focuses on compound  
 interest tables that are applied to

mathematical problems concerned with loans, annuities, mortgages, leases, and different forms of investment. This book provides the compound interest functions on  $1/16$  to  $2 \frac{7}{16}$  per cent at interval  $1/16$  per cent;  $2 \frac{1}{2}$  to  $4 \frac{7}{8}$  per cent at interval  $1/8$  per cent; and  $5$  to  $10$  per cent at interval  $1/4$  per cent. The tables on  $i/i(p)$  and force of interest  $\delta$ , and 10-figure logarithms are also included. The rest of this publication's content are devoted to notes on the mathematics of compound interest, providing guidance through the mathematical complexities of the more elementary parts of this subject. Some of the topics discussed include the definitions; effective and nominal rate of interest; present value and compound discount; continuous conversion of interest; annuities—definitions and symbols; interpolation using second differences; yield on a bond; and short history of tables of compound interest. This text is a good source to students, as well as individuals who have not had the opportunity to study the theory on compound interest functions.

*Both Simple and Compound, on All Sums from 1 Cent to \$10,000, and from One Day to Six Years. Also, Some Very Valuable Tables* London S. Sonnenschein 1891.

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and

possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

*Simple and Compound Interest ... on All Sums from 1 Day to 6 Years at 5, 6, 7, 8, 9 and 10 Per Cent ...* London, Ont. : W. Bryce

Excerpt from Improved Interest Tables: Containing an Accurate Calculation of Simple and Compound Interest on All Sums From 10 to \$10,000.00, and From 1 Day to 6 Years at 5, 6, 7, 8, 9 and 10 Per Cent The principle or amount on which interest is to be reckoned will be found at the head of the column above the wavy line. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

*Compound Interest and Insurance Tables and Seven Place Logarithms* Forgotten Books

Excerpt from Porter and Coates' Interest Tables at One-Half, One, Two, Three, Three-and-One-Half, Four, Four-and-One-Half, Five, Six, Seven, Eight and Ten Per Cent Per Annum: Showing the Interest on Any Amount From \$1. 00 to \$10, 000

The tables are arranged with a view of affording a more convenient medium for ascertaining simple and compound interest, the day of maturity of notes, and the number of days, months, or years between two different dates. The rates of 1 and of per cent., together with the table showing the interest upon one dollar for one hundred days, the interest in this table being calculated to five places of decimals, afford a ready means of ascertaining interest at any rate per cent. Attention to the following explanations and examples will enable any person to compute interest, etc., with as much ease as the most experienced accountants. To ascertain the interest on any sum, turn to the page in the tables at the top of which the given sum is found. In the left-hand column of the page will be found the time - years, months, and days. Run your finger down this column to the time for which you wish to find the interest, then across the page to the column at the top of which the required rate per cent. is given, and there you find the interest required. If the interest is to be found for years, months, and days, find it for each separately and add - the sum will be the interest sought. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. *Coffin's Interest Tables at One-Half One, Two, Three, Three-and-One-Half, Four, Four-and-One-Half, Five, Six, Seven, Eight and Ten Per-Cent, Per Annum, Showing the Interest on Any Amount From \$1. 00 to \$10, 000* John Wiley & Sons

Excerpt from Coffin's Interest Tables at One-Half One, Two, Three, Three-and-One-Half, Four, Four-and-One-Half, Five, Six, Seven, Eight and Ten Per-Cent, Per Annum, Showing the Interest on Any Amount From \$1. 00 to \$10, 000: Also Containing a Perennial Time-Table, Tables of Values of Foreign Money, the Interest Laws of All the States, Rates of Postage, Business Forms and Business Laws in Daily Use The tables in this volume have been prepared in the belief, founded upon careful inquiries among business-men generally, that of the great number of interest tables now in use none contain calculations of interest at the lower per cents. Which are now necessarily used. The tables are arranged with a view of affording a more convenient medium for ascertaining simple and compound interest, the day of maturity of notes, and the number of days, months, or years between two different dates. The rates of 1 and of per cent., together with the table showing the interest upon one dollar for one hundred days, the interest in this table being calculated to five places of decimals, afford a ready means of ascertaining interest at any rate per cent. Attention to the following explanations and examples will enable any person to compute interest, etc., with as much ease as the most experienced accountants.
