This eBook is the second edition of the best-selling RYA Navigation Handbook and essential reading for anyone taking to the

water and looking for the complete guide to navigation. Navigation techniques and practices have changed dramatically over the years and today, many sailors and motor boaters regard electronic instruments as their principal means of navigation. However, traditional methods still have an important part to play, as does knowledge of aspects such as tides, lights, buoys and beacons. This ebook edition has been redesigned with that in mind; to provide the reader with a sound understanding of the principles of navigation as well as providing insight into the ways in which electronic navigation can be used to best effect, including extended chapter summaries. This book will help to ensure the development of a 'well rounded' and competent navigator. Melanie Bartlett is one of the country's leading experts on navigation. Melanie learnt to navigate as part of her professional training at Dartmouth Naval College and then since leaving the navy has become the Technical Editor of Motor Boat and Yachting magazine.

The vast majority of sailing yacht scenarios comprise a couple sailing the boat together, and needing to carry out all manoeuvres and activities themselves with no help from a back-up crew. Their boat handling, navigation, sail handling, anchoring and mooring skills all have to be carried out both efficiently and effectively, preferably with the minimum of physical effort (to conserve energy). But most sailing technique books assume a crew of 3 or 4, all willing to lend a hand. This book is therefore a first, addressing the most common sailing scenarios that anyone cruising will have to deal with, and providing clever, original, highly effective (and most importantly successfully tried and tested by the author) techniques and solutions for dealing with the huge variety of essential operations on a boat - from sail setting and reefing, to picking up mooring buoys in a variety of wind and tide situations, anchoring, berthing and leaving a pontoon shorthanded, picking up a man overboard, sailing in fog and heavy weather - and even going up the mast.

This book will be a godsend to anyone sailing single or shorthanded – including couples with young children who need to be supervised by one parent whilst the other runs the boat. Organised into techniques for different cruising scenarios, the book features step by step sequential photos showing exactly how to approach each situation and carry out the task in hand.
