Guys love movies. Especially sports movies, where every underdog has his day, every team achieves glory, and every hero gets his moment of redemption. Next to watching Monday Night Football, there's nothing more enjoyable than plopping down on the couch with the remote and a bottle of beer and firing up the special-edition DVD of Rocky, Hoosiers, Caddyshack, or any other fan favorite. Now, two nationally renowned sports media personalities take on the task of ranking the top 100 sports movies of all time, including entertaining and informative lists, special features, and contributions from over 75 top sports figures. The 100 Greatest Lies in physics is a follow-up to Ray Fleming's *The Zero-Point Universe* as he continues to explore the importance of zero-point energy to modern physics. Since before the start of this century, evidence has mounted that space is not empty. Space is filled with quantum vacuum fluctuations called zero-point energy, and this energy is a modern form of aether. Most of the physics of the past century, which led to today's standard model, fails to account for this modern aether. In relativity theory there are two types of relativity, one that includes aether and one that rejects it. Physicists

choose poorly and wrongly champion the theory that rejects the modern aether. Even though many theories like this are now known to be invalid, physicists still cling to the physics of the past. The mainstream physics of the last century is a complete disaster due to physicists' failure to incorporate zero-point energy into their explanations of forces and every day phenomena. The 100 Greatest Lies in Physics catalogs many of the most outrageous mistakes in physics in hopes that physicists will do their jobs and stop lying to everyone.

There are countless books on the market about nutrition, diet, and exercise in isolation. Optimal Aging brings these topics together as they relate to the process of aging and the diseases which so often accompany it. New York Times Bestseller A New York Times Notable Book Named one of the Best Books of the Year by the Wall Street Journal, the Economist, Foreign Affairs, and Kirkus Reviews Finalist for the National Book Critics Circle Award (Nonfiction) Shortlisted for the Cundill Prize in Historical Literature Finalist for the Los Angeles Times Book Prize (History) A San Francisco Chronicle Holiday Gift Guide Selection A New York Times Book Review Editors' Choice Selection A sweeping, "magisterial" history of the Roman Empire from one of our foremost classicists shows why

Rome remains "relevant to people many centuries later" (Atlantic). In SPQR, an instant classic, Mary Beard narrates the history of Rome "with passion and without technical jargon" and demonstrates how "a slightly shabby Iron Age village" rose to become the "undisputed hegemon of the Mediterranean" (Wall Street Journal). Hailed by critics as animating "the grand sweep and the intimate details that bring the distant past vividly to life" (Economist) in a way that makes "your hair stand on end" (Christian Science Monitor) and spanning nearly a thousand years of history, this "highly informative, highly readable" (Dallas Morning News) work examines not just how we think of ancient Rome but challenges the comfortable historical perspectives that

have existed for centuries. With its nuanced attention to class, democratic struggles, and the lives of entire groups of people omitted from the historical narrative for centuries, SPQR will to shape our view of Roman history for decades to come.

Our previous three books were well received, and we decided to write this fourth book “100 Great Personalities and their Quotations”. This book is based on my collection, over many years, of quotations from many personalities. To be easy to read, the book is divided in five Chapters, and the personalities are listed in chronological order, with the name followed by the year of birth and

the oldest age. At the end of the book there is an Addendum with some of my ideas and an Alphabetical Index of the personalities. There are included pictures from our travels to Rome, Italy, and other cities. I want to thank my wife Sophia for her continuous help. Let's remember what Cicero told us more than 2050 years ago: A home without books is a body without soul.
