The Concise Encyclopedia of Applied  
Linguistics Routledge

NooJ is both a corpus processing tool and a linguistic development environment: it allows linguists to formalize several levels of linguistic phenomena: orthography and spelling, lexicons for simple words, multiword units and frozen expressions, inflectional, derivational and productive morphology, local,

structural syntax and transformational syntax. For each of these levels, NooJ provides linguists with one or more formal tools specifically designed to facilitate the description of each phenomenon, as well as parsing tools designed to be as computationally efficient as possible. This approach distinguishes NooJ from most computational linguistic tools, which provide a single formalism that should describe everything. As a corpus processing tool, NooJ allows users to apply sophisticated linguistic queries to

large corpora in order to build indices and concordances, annotate texts automatically, perform statistical analyses, etc. Nooj is freely available and linguistic modules can already be downloaded for Acadian, Arabic, Armenian, Bulgarian, Catalan, Chinese, Croatian, French, English, German, Hebrew, Greek, Hungarian, Italian, Polish, Portuguese, Spanish and Turkish. The present volume contains papers from the 2008 International Nooj conference which was held 8–10 June 2008 in Budapest. While the focus of the Budapest conference was on making Nooj compatible with other applications, the papers vary with respect to whether they regard Natural Language Processing (NLP) as a research goal or as a tool. However, they all present a

slightly different problem either in the field of NLP, or in one that can be solved using NLP, or present a new development in the tool itself. The range of problems dealt with in the volume is quite varied, which will hopefully enable the readers to find contributions that are relevant to their field of interest.

With more than 50 years of teaching experience between them, Ilse Depraetere and Chad Langford present a

grammar pitched precisely at advanced learners of English who need to understand how the English language really works without getting lost in the complex specifics. Now fully updated and revised throughout, the second edition of this book pulls from linguistic theory all the relevant notions that will enable the language student to fully grasp English grammar. After introducing form and function, the authors cover verbs, nouns, aspect and tense, modality and discourse. Readers are led through the underlying principles of language use, with the book presupposing only a basic grasp of linguistic terminology and focusing on the critical issues. Full of challenging exercises and supported by a companion website featuring an extensive answer

key, a glossary and further exercises for study, this is the reference grammar of choice for both native and non-native English speakers.

**Micah** Cambridge University Press  
One of the twelve Minor Prophets, Micah unwaveringly spoke God's message to Israel--a message filled with judgment but also laced with the promise of redemption. Micah combined poetic complexity and literary sophistication to compel his audience to respond. And now, through an exacting linguistic and literary analysis of the biblical text, coauthors Francis I. Andersen and David Noel Freedman explain what Micah meant to his contemporaries, as well as what his message means to readers today. What sets Micah apart is the attention it pays to the details of the

prophet's original text. The commentary is descriptive rather than speculative, philological rather than theological. With unusual care, the authors--two of the world's leading Bible scholars--examine the features of Micah's biblical Hebrew and prophetic discourse. They discover the use of a special kind of language, which, in its poetic composition, differs significantly from the language of classical Hebrew prose. At the zenith of their careers, masters of all relevant disciplines, Andersen and Freedman are the perfect duo to unlock the words of this challenging prophet.
