*The Encompassing Epistle* Routledge  
Translated from the original Arabic by  
William Alexander Greenhill.

*Al-Biruni* American University in Cairo  
Press

This slim volume presents a practical introduction to the essential beliefs, practices, and moral rectifications mentioned in the Sacred Law. The primary text is Ahmed ibn Zayn al-Habashi's *Al-Risalah al-Jami'ah* which has been a popular introductory text during the last four centuries. The text is read by students in the Middle East, Southeast Asia and, recently, North America and Europe. This edition includes the Arabic text, its translation, and notes drawn from the translator's other works. Readers of this text will learn the essential creed, acts of worship, and moral behavior that are considered personal obligations for all Muslims. They will also learn why these particular things are important. The notes are designed to equip students for personal practice and to prepare them for more advanced studies.

**Ibn al-Jazzār's Zād al-musāfir wa-qūt al-ḥāḍir, Provisions for the Traveller and Nourishment for the Sedentary, Book 7 (7-30)** Brill Academic Pub  
Originally published: Ithaca, N.Y.: Cornell Southeast Asia Program Publications, 1970.

*The Case in Indonesia* Oxford University Press

This vivid and detailed biography strips away centuries of distortion and myth and presents a balanced view of the man

whose religion continues to dramatically affect the course of history.

### **The Improvement of Human Reason**

Oxford University Press

These studies represent the major contributions to the history of Islamic technology during the second half of the 20th century beside Donald Hill's separate publications on the mechanical devices of Pseudo-Apollonios, the Banu Musa and al-Jazari. A gifted linguist who was trained as a historian of Islamic civilisation, and also a professional engineer, Hill achieved his goal of setting his subject on a solid basis. The papers reprinted here include his early studies of the trebuchet and the camel and horse, several overviews of different aspects of Islamic technology, articles on specific topics such as the Cairo Nilometer and al-Biruni's geared luni-solar device, and the first notice of an extremely important Andalusian treatise on mechanical devices discovered in 1975.

### **Educating for Character** Equinox Publishing

"Imagine it is the seventh century. As most of Europe continues its descent into a long period of intellectually dormancy, a quiet yet powerful academic revolution is erupting in another corner of the world. Over the next centuries, the geniuses of Muslim society will thrust the boundaries of knowledge forward to such a degree that their innovations still shape civilizations to this day. The staggering achievements of these men and women influenced the development of modern mathematics, science, engineering, and medicine. 1001 Inventions: The Enduring Legacy of Muslim Civilization sheds new light on this golden era that was once

lost to so many, and celebrates the heritage that we all share"--P. [4] of cover.

Voyage Through Time Abjad Book  
Designers & Builders

*From Jail to Jail* is the political autobiography of a central though enigmatic figure of the Indonesian Revolution. Variouslly labeled a communist, Trotskyite, and nationalist, Tan Malaka managed, during the several decades of his political activity, to run afoul of nearly every political group and faction involved in the Indonesian struggle for independence. Malaka was elected Chairman of the Indonesian Communist Party (PKI) in 1921 and barely five years later opposed the PKI-led uprising in Indonesia. He openly opposed Sukarno's support for negotiations with the Dutch, yet Sukarno issued a decree in 1963 recognizing Tan Malaka as a hero of national independence. During his several decades of political activity he spent periods of exile and hiding in nearly every country in Southeast Asia. *From Jail to Jail* is one of the few known autobiographies by an Asian Marxist of the 1930's and 1940's.

**Persatuan Islam** Kazi Publications  
1001 Inventions  
The Enduring Legacy of Muslim Civilization  
National Geographic Books

*From Philo to al-Jazari - from Alexandria to Diyar Bakr* National Geographic Books  
Indonesian Islam is often portrayed as being intrinsically moderate by virtue of the role that mystical Sufism played in shaping its traditions. According to Western observers--from Dutch colonial administrators and orientalist scholars to modern anthropologists such as the late Clifford Geertz--Indonesia's peaceful interpretation of Islam has been perpetually under threat from outside by

more violent, intolerant Islamic traditions that were originally imposed by conquering Arab armies. *The Makings of Indonesian Islam* challenges this widely accepted narrative, offering a more balanced assessment of the intellectual and cultural history of the most populous Muslim nation on Earth. Michael Laffan traces how the popular image of Indonesian Islam was shaped by encounters between colonial Dutch scholars and reformist Islamic thinkers. He shows how Dutch religious preoccupations sometimes echoed Muslim concerns about the relationship between faith and the state, and how Dutch-Islamic discourse throughout the long centuries of European colonialism helped give rise to Indonesia's distinctive national and religious culture. *The Makings of Indonesian Islam* presents Islamic and colonial history as an integrated whole, revealing the ways our understanding of Indonesian Islam, both past and present, came to be.

The Principles of the Creed Macmillan  
International Higher Education  
In the "Principles of the Creed" (Kitab Qawa'id al-'aqa'id), the second of the forty books of the Revival of the Religious Sciences (Ihya' 'ulum al-din), Abu Hamid al-Ghazali explains the fundamental beliefs of Islam, those that concern faith in God, His revelation, His messengers, and the hereafter. The scope of these beliefs includes the nature of God, Muhammad's status as a prophet, the virtues of the Companions, the events related to the resurrection and judgment, and the nature of faith itself. This presentation of beliefs goes beyond a list of creedal statements; al-Ghazali cites the scriptural foundations in the Qur'an and hadith, refers to transmitted reports from the Companions and others from the

righteous predecessors, and supports these beliefs with rational arguments."

*Aqrābādhīn* Ohio University Press

This newly revised book explores proven strategies for overcoming the limitations of the traditional classroom, including a wealth of technology tools for inquiry, collaboration, and global connection to support this new vision of instructional design. The book follows the arc of a project, providing guided opportunities to direct and reflect educators own learning and professional development. In the expanded second edition, educators will find new examples of the latest tools, assessment strategies and promising practices that are poised to shape education in the future.

A Translation of Ibn Rushd's (Averroës) Famous Treatise Fasul-al-Maqal

International Society for Technology in Education

Islamic schools, especially madrasahs, have been viewed as sites of indoctrination for Muslim students and militants. Some educators and parents in the United States have also regarded introductory courses on Islam in some public schools as indoctrinatory. But what do we mean by "indoctrination"? And is Islamic education indoctrinatory? This book critically discusses the concept of indoctrination in the context of Islamic education. It explains that indoctrination occurs when a person holds to a type of beliefs known as control beliefs that result in ideological totalism. Using Indonesia as an illustrative case study, the book expounds on the conditions for an indoctrinatory tradition to exist and thrive. Examples include the Islamic school co-founded by Abu Bakar Ba'asyir and the militant organisation Jemaah Islamiyah. The book further proposes ways to counter and avoid indoctrination through formal, non-formal, and informal

education. It argues for the creation and promotion of educative traditions that are underpinned by religious pluralism, strong rationality, and strong autonomy. Examples of such educative Muslim traditions in Indonesia will be highlighted. Combining philosophical inquiry with empirical research, this book is a timely contribution to the study of contemporary and often controversial issues in Islamic education.

Icon Books Ltd

Vol. 2: Published for the first time in English alphabetical order, vol. 2 (of the 5 original volumes) of "Canon of Medicine" (Law of Natural Healing), is an essential addition to the history of medicine as it holds a treasure of information on natural pharmaceuticals used for over 1000 years to heal various diseases and disorders. Fully color illustrated with a 150 page, 7000 word index of the healing properties of each of the entries, the text itself is an alphabetical listing of the natural pharmaceuticals of the simple compounds. By simple compounds, Avicenna includes the individual plants, herbs, animals and minerals that have healing properties. Avicenna lists 800 tested natural pharmaceuticals including plant, animal and mineral substances. The compiler has included the Latin, Persian and Arabic names of the drugs along with artistic renderings of the drugs as illustrations as well as Avicenna's Tables or Grid for each entry that describes the individual, specific qualities of simple drugs.

*The Global 2000 Report to the President*  
BRILL

Biografi sejarah kehidupan Nabi Muhammad SAW utusan Allah SWT yang terakhir dan sekaligus penutup para Nabi, dalam bahasa Inggris bersumberkan dari Kitab Suci Al-Quran

dan Al-Hadist. The advent of the Prophet Muhammad (SAW) changed the face of the history of mankind in a manner that this world has never seen before. Since the first man and prophet Adam (AS) was sent down to Earth, Allah sent many prophets and messengers to guide mankind to the Truth and to the Straight Path. Soon after the deaths of these prophets, their followers deviated from the teachings and corrupted the religion of Allah. He rejuvenated the Truth as taught by the previous prophets and messengers, and re-established the Law of Allah on Earth through the teachings of the Qur'an and the practice of the Sunnah. At the time of the birth of the Prophet Muhammad (SAW), two great prophetic religions were practiced in the environs of Arabia - namely Judaism and Christianity. Both of these religions were born from the basic teachings of Islam as taught by Musa (AS) and Isa (AS). However, the original teachings were lost, and these religions were born.

**An Encyclopedia of Events, People, and Phenomena** Cambridge University Press

From a beginning in an Egyptian Delta town and the port of Alexandria to the scenic vistas of sunny southern California, Ahmed Zewail takes us on a voyage through time his own life and the split-second world of the femtosecond. In this engaging exposé of his life and work until his receipt of the Nobel Prize in 1999, Zewail explores in non-technical language the landscape of molecules glimpsed on the scale of one quadrillionth of a second: the femtosecond, 0. 000 000 000 000 001 second. Zewail enriches the journey into the strange territory of femtochemistry with insightful analogies and illustrations to aid both the general reader and the scientifically inclined. He likewise draws

lessons from his life story so far, and he meditates on the impact the revolution in science has had on our modern world in both developed and developing countries. He suggests a concrete course of action for the world of the have-nots, and ends the book with hope for Egypt in developing the nation's greatest natural resource its youth to build a more promising future, and for America to develop a new vision domestically and internationally.

**Entering the Twenty-first Century : a Report** Sarup & Sons

Calls for renewed moral education in America's schools, offering dozens of programs schools can adopt to teach students respect, responsibility, hard work, and other values that should not be left to parents to teach.

**Critical Edition of the Arabic Text with English Translation, and Critical Edition of Moses ibn Tibbon's Hebrew Translation (Şedat ha-Derakhim)** Blurb

General Description: Al-Ghazzali describes the concept of intention in great detail, its true nature and how the intention of the believer is better than his deed. He explores whisperings of the self, evil inspiration and bad thoughts and then those deeds that change according to intention and how the admirable servant does what he does for the sake of God. In regard to sincerity, he describes its true nature and then goes on to describe truthfulness.

**Al-Risalah Al-Jami'ah Wa Al-Tadhkirah Al-Nafi'ah** Routledge

Combining a scholar's command of fact with a narrator's ease of style, the noted scholar H.A.R. Gibb presents an historic survey of Islam, from the days of the prophet, through the religion's spread in Asia and Africa, to its confrontation with the modern world.

*The New World of Islam* Harper Collins  
 The planet as seen by its inhabitants In two millenia, our knowledge of the planet and its natural laws and forces has undergone remarkable changes-- from the religious belief of earth as the center of the universe to the modern astronomers' view that it is a mere speck in the cosmos. Now a first-of-its-kind reference work charts this remarkable intellectual progression in our evolving perception of the earth by surveying the history of geology, geography, geophysics, oceanography, meteorology, space science, and many other fields. Covers human understanding of the Earth in various times and cultures The Encyclopedia traces our understanding of the earth and its functioning throughout history, summarizing historical explanations of earthly occurrences, including explanations with no scientific basis. It presents the latest facts and theories, explains how our understanding of the earth has evolved, and shows why many outrageous and fanciful earlier ideas were accepted in their time. The coverage explores the physical phenomena that inform our knowledge, starting at the earth's core and extending outward through the mantle, crust, oceans, and atmosphere to the magnetosphere and beyond. Charts the evolution of our perceptions The primary focus of the Encyclopedia is the history of the study of the earth. It also discusses the institutions that

advanced and shaped science and probes the interplay between science, practical applications, and social and political forces. The result is a unified historical overview of the earth across a wide canvas of time and place, from antiquity to the space age. Its wide-ranging articles summarize subjects as diverse as geography and imperialism, environmentalism, computers and meteorology, ozone formation theories since 1800, scientific rocketry, the Scopes trial, and much more. Special Features Shows how diverse disciplines, from geology to space science, fit together in a coherent view of the earth  
 \* Explains earlier ideas and theories in the context of the beliefs and scientific knowledge of their time  
 \* Spotlights important institutions that have shaped the history of science  
 \* Explores relationships between science, practical applications, and sociopolitical concerns  
 \* Provides a subject index and an index of scientists with birth/death dates  
*The Makings of Indonesian Islam* Harvard University Press  
 From Musa al-Khwarizmi who developed algebra in 9th century Baghdad to al-Jazari, a 13th-century Turkish engineer whose achievements include the crank, the camshaft and the reciprocating piston, *Science and Islam* tells the story of one of history's most misunderstood yet rich and fertile periods in science: the extraordinary Islamic scientific revolution between 700 and 1400 CE.
