A groundbreaking look at marriage, one of the most basic and universal of all human institutions, which reveals the emotional, physical, economic, and sexual benefits that marriage brings to individuals and society as a whole. The Case for Marriage is a critically important intervention in the national debate about the future of family. Based on the authoritative research of family sociologist Linda J. Waite, journalist Maggie Gallagher, and a number of other scholars, this book's findings dramatically contradict the anti-marriage myths that have become the common sense of most Americans. Today a broad consensus holds that marriage is a bad deal for women, that divorce is better for children when parents are unhappy, and that marriage is essentially a private choice, not a public institution. Waite and Gallagher flatly contradict these assumptions, arguing instead that by a broad range of indices, marriage is actually better for you than being single or divorced- physically, materially, and spiritually. They contend that married people live longer, have better health, earn more money, accumulate more wealth, feel more fulfillment in their lives, enjoy more satisfying sexual relationships, and have happier and more successful children than those who remain single, cohabit, or get divorced. The Case for Marriage combines clearheaded analysis, penetrating cultural criticism, and practical advice for strengthening the institution of marriage, and provides clear, essential guidelines for reestablishing marriage as the foundation for a healthy and happy society. "A compelling defense of a sacred union. The Case for Marriage is well written and well argued, empirically rigorous and learned, practical and commonsensical." -- William J. Bennett, author of *The Book of Virtues* "Makes the absolutely critical point that marriage has been misrepresented and misunderstood." -- The Wall Street Journal www.broadwaybooks.com

Culture of the Selfie is an in-depth art-historical overview of self-

portraiture, using a set of theories from visual studies, narratology, media studies, psychotherapy, and political principles. Collecting information from various fields, juxtaposing them on the historical time-line of artworks, the book focuses on space in self-portraits, shared between the person self-portraying and the viewer. What is the missing information of the transparent relationship to the self and what kind of world appears behind each selfie? As the 'world behind one's back' is gradually taking larger place in the visual field, the book dwells on a capacity of selfies to master reality, the inter-mediate way and, in a measure, oneself.

Chinese Medicine constantly refers back to its sources in order to initiate the new. Its source code is in the Han Dynasty medical classics, and in this handbook esteemed practitioner and educator Professor Z'ev Rosenberg shares the knowledge from his study of these classic texts and his experiences treating difficult cases. In the tradition of the scholar-physician commentaries, Z'ev Rosenberg comments on the Simple Questions that introduce the core principles of the Inner Canon; explaining how these inform his methodology of diagnosis and advising on how biomedical diseases can be retranslated into sophisticated Chinese medical diagnoses including patterns of differentiation, sequential diagnosis, synchronicity, season, climate and environment. He discusses how Chinese medicine can use unique diagnostic

parameters to rebalance the landscape and chronobiology of the body and address the greatest clinical challenges of our time, including the contemporary epidemic of autoimmune disorders.

The 3rd Edition of Literacy & Learning in the Content Areas helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping/webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, primary sources, biographies, essays, poetry, and online content, communities, and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.

ULYSSES James Joyce's novel Ulysses is said to be one of the most important works in Modernist literature. It details Leopold Bloom's passage through Dublin on an ordinary day: June 16, 1904. Causing controversy, obscenity trials and heated debates, Ulysses is a pioneering work that brims with puns, parodies, allusions, stream-of-consciousness writing and clever structuring. Modern Library ranked it as number one on its list of the twentieth century's 100 greatest English-language novels and Martin Amis called it one of the greatest novels ever written. ULYSSES Ulysses is a modernist novel by Irish writer James Joyce. It is considered to be one of the most important works of modernist literature, and has been called "a demonstration and summation of the entire

movement". Ulysses chronicles the peripatetic appointments and encounters of Leopold Bloom in Dublin in the course of an ordinary day, 16 June 1904. Ulysses is the Latinised name of Odysseus, the hero of Homer's epic poem Odyssey, and the novel establishes a series of parallels between its characters and events and those of the poem (the correspondence of Leopold Bloom to Odysseus, Molly Bloom to Penelope, and Stephen Dedalus to Telemachus). Joyce divided Ulysses into 18 chapters or "episodes". At first glance much of the book may appear unstructured and chaotic; Joyce once said that he had "put in so many enigmas and puzzles that it will keep the professors busy for centuries arguing over what I meant", which would earn the novel "immortality". James Joyce (1882-1941) was an Irish novelist and poet, considered to be one of the most influential writers in the modernist avant-garde of the early 20th century. Joyce is best known for Ulysses, the short-story collection Dubliners, and the novels A Portrait of the Artist as a Young Man and Finnegans Wake. ULYSSES As the day begins, Stephen Dedalus is displeased with his friend and remains aloof. A little later, he teaches history at Garrett Deasy's boys' school. ULYSSES Leopold Bloom begins his day by preparing breakfast for his wife, Molly Bloom. He serves it to her in bed along with the mail. ULYSSES As their day unfolds, Joyce paints for us a picture of not only what's happening outside but also what's happening inside their minds. ULYSSES Drawing on the characters, motifs and symbols of Homer's Odyssey, James Joyce's Ulysses is a remarkable modernist novel. It has lived through various criticisms and controversies and has undergone several theatre, film and television adaptations. It continues to remain a literary masterpiece. ULYSSES

Women, Business and the Law 2021 is the seventh in a series of annual studies measuring the laws and regulations that affect women's economic opportunity in 190 economies. The project presents eight indicators structured around women's interactions with the law as they move through their lives and careers: Mobility, Workplace, Pay, Marriage, Parenthood, Entrepreneurship, Assets, and Pension. This year's report updates all indicators as of October 1, 2020 and builds evidence of the links between legal gender equality and women's economic inclusion. By examining the economic decisions women make throughout their working lives, as well as the pace of reform over the past 50 years, Women, Business and the Law 2021 makes an important contribution to research and policy discussions about the state of women's economic empowerment. Prepared during a global pandemic that threatens progress toward gender equality, this edition also includes important findings on government responses to COVID-19 and pilot research related to childcare and women's access to justice.

Universal basic income. A 15-hour workweek. Open borders. Does it sound too good to be true? One of Europe's leading young thinkers shows how we can build an ideal world today. "A more politically radical Malcolm Gladwell." --New York Times After working all day at jobs we often dislike, we buy things we don't need. Rutger Bregman, a Dutch historian, reminds us it needn't

be this way-and in some places it isn't. Rutger Bregman's TED Talk about universal basic income seemed impossibly radical when he delivered it in 2014. A quarter of a million views later, the subject of that video is being seriously considered by leading economists and government leaders the world over. It's just one of the many utopian ideas that Bregman proves is possible today. Utopia for Realists is one of those rare books that takes you by surprise and challenges what you think can happen. From a Canadian city that once completely eradicated poverty, to Richard Nixon's near implementation of a basic income for millions of Americans, Bregman takes us on a journey through history, and beyond the traditional left-right divides, as he champions ideas whose time have come. Every progressive milestone of civilization-from the end of slavery to the beginning of democracy-was once considered a utopian fantasy. Bregman's book, both challenging and bracing, demonstrates that new utopian ideas, like the elimination of poverty and the creation of the fifteen-hour workweek, can become a reality in our lifetime. Being unrealistic and unreasonable can in fact make the impossible inevitable, and it is the only way to build the ideal world.
