topic

Cambridge International A and AS Level
Hodder Education

This textbook and CD have been written for the University of Cambridge International Examinations course for International A and AS Level Geography (9696). The book covers the core syllabus and all the human and physical geography options. There is a CD includes interactive tests (one for each chapter in the book), Revision checklists, a section on Study Skills and a Glossary. Advice is given on the examination and on assessment. The text book has a strong emphasis on geographical skills, including advice on fieldwork. There is also a geographical skills section which includes maps from around the world, and covers cartographic and statistical skills. There is an international focus throughout, and the examples and case studies are taken from around the world.

Business Management Cambridge
University Press

Developed with the IB for the latest syllabus at SL and HL, this

comprehensive course book is packed with topical case studies to drive critical thought. Written by an IB team leader and workshop leader, it integrates the learner profile and includes skills development and fieldwork support, for optimal achievement.

The Geography of Transport Systems

Cambridge University Press

This Study Guide supports the new syllabus for 2009 and includes all options. Written by two Senior IB examiners, it contains all the information required for the course, presented in a concise, accessible format. The book exactly matches the structure of the new course and includes material for both Standard and Higher level. The entirely new topic, globalization, global interactions is given extra emphasis. Questions and full mark schemes are provided along with advice on internal and external assessment. The Study Guide may be used by teachers or to support the students' learning outside the classroom. It is also suitable for students and teachers whose first language is not English. New edition available now - ISBN 978-0-19-838915-6

Geography for the IB Diploma Global Interactions Oxford University Press - Children

Featuring a wealth of digital content, this concept-based Print and Enhanced Online Course Book Pack has been developed in cooperation with the IB to provide the most comprehensive support for the new DP Mathematics: analysis and approaches HL syllabus, for first teaching in September 2019.

AP Human Geography Review Book and Practice Test Questions [Updated for the New Exam Description] Cambridge

University Press

Thorough and engaging, this new book has been specifically developed for the 2011 English A: Literature syllabus at both SL and HL. With activities, student model answers and examiner commentaries, it offers a wealth of material to support students in every aspect of the new course.

HL Core Extension Cambridge University Press

Arranged in four sections, provides review exercises and past examination questions for topics in microeconomics, macroeconomics, interantional economics, and development economics. For the IB diploma Hodder Education

Develop your skills to become an inquiring learner; ensure you navigate the MYP framework with confidence using a concept-driven and assessment-focused approach to Geography, presented in global contexts. - Develop conceptual understanding with key MYP concepts and related concepts at the heart of each chapter. - Learn by asking questions for a statement of inquiry in each chapter. - Prepare for every aspect of assessment using support and tasks designed by experienced educators. - Understand how to extend your learning through research projects and interdisciplinary opportunities. - Think internationally with chapters and concepts set in global contexts.

Minimizing Risk, Maximizing Awareness Hodder Education

The International Year of Planet Earth (IYPE) was established as a means of raising worldwide public and political awareness of the vast, though frequently under-used, potential the Earth Sciences

possess for improving the quality of life of the peoples of the world and safeguarding Earth's rich and diverse environments. The International Year project was jointly initiated in 2000 by the International Union of Geological Sciences (IUGS) and the Earth Science Division of the United Nations Educational, Scientific and Cultural Organisation (UNESCO). IUGS, which is a Non-Governmental Organisation, and UNESCO, an Inter-Governmental Organisation, already shared a long record of productive cooperation in the natural sciences and their application to societal problems, including the International Geoscience Programme (IGCP) now in its fourth decade. With its main goals of raising public awareness of, and enhancing research in the Earth sciences on a global scale in both the developed and less-developed countries of the world, two operational programmes were demanded. In 2002 and 2003, the Series Editors together with Dr. Ted Nield and Dr. Henk Schalke (all four being core members of the Management Team at that time) drew up outlines of a Science and an Outreach Programme. In 2005, following the UN proclamation of 2008 as the United Nations International Year of Planet Earth, the "Year" grew into a triennium (2007–2009).

Revision Guide Student's Book**

Hodder Education

Target success in Pearson Edexcel International GCSE (9-1) Geography with this proven formula for effective, structured revision. Key content coverage is combined with exam practice questions and practical tips to create a revision guide that students can rely on to review, strengthen and test their knowledge. With My Revision Notes every student can: - Plan and manage a successful revision programme using the topic-by-topic planner - Consolidate subject knowledge by working through clear and focused content coverage - Test understanding and identify areas for improvement with regular revision tasks - Improve exam technique through practice questions and tips - Learn and use key terms for each topic

Economics for the IB Diploma Revision Guide Hodder Education

Offering an unparalleled level of assessment support, IB Prepared: Geography has been developed directly with the IB to provide the most up-to-date, authentic and authoritative guidance on DP assessment.

IB Physics Course Book Routledge

Mobility is fundamental to economic and social activities such as commuting, manufacturing, or supplying energy.

Each movement has an origin, a potential set of intermediate locations, a destination, and a nature which is linked with geographical attributes. Transport systems composed of infrastructures, modes and terminals are so embedded in the socio-economic life of individuals, institutions and corporations that they are often invisible to the consumer. This is paradoxical as the perceived

invisibility of transportation is derived from its efficiency. Understanding how mobility is linked with geography is main the purpose of this book. The third edition of *The Geography of Transport Systems* has been revised and updated to provide an overview of the spatial aspects of transportation. This text provides greater discussion of security, energy, green logistics, as well as new and updated case studies, a revised content structure, and new figures. Each chapter covers a specific conceptual dimension including networks, modes, terminals, freight transportation, urban transportation and environmental impacts. A final chapter contains core methodologies linked with transport geography such as accessibility, spatial interactions, graph theory and Geographic Information Systems for transportation (GIS-T). This book provides a comprehensive and accessible introduction to the field, with a broad overview of its concepts, methods, and areas of application. The accompanying website for this text contains a useful additional material, including digital maps, PowerPoint slides, databases, and links to further reading and websites. The website can be accessed at:

<http://people.hofstra.edu/geotrans> This text is an essential resource for undergraduates studying transport geography, as well as those interest in economic and urban geography, transport planning and engineering.

The Works of Jeremy Bentham OUP Oxford

This comprehensive and accessible book is designed for use by students following the Theory of Knowledge course in the International Baccalaureate (IB) Diploma Programme. The book is also useful for students following other critical thinking

courses. The fundamental question in Theory of Knowledge is How do you know? In exploring this question, the author encourages critical thinking across a range of subject areas and helps students to ask relevant questions, use language with care and precision, support ideas with evidence, argue coherently and make sound judgements. For the IB diploma Geography for the IB Diploma Study and Revision Guide SL and HL Core

Study Guides for CAPE have been developed and written by CXC to provide CAPE candidates in schools and colleges with resource materials to help them prepare for their exams. Matching the topics in the syllabus, the student-friendly structure and content enable students to develop their skills and confidence as they approach the examination.
