"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

This book delves into two divergent, yet parallel themes; first is an examination of how educators can design the experiences of learning, with a focus on the learner and the end results of education; and second, how educators learn to design educational products, processes and experiences. The book seeks to understand how to design how learning occurs, both in the instructional design studio and as learning occurs throughout the world. This will change the area's semantics; at a deeper level, it will change its orientation from instructors and information to learners; and it will change how educators take advantage of new and old technologies. This book is the result of a research symposium sponsored by the Association for Educational Communications and Technology [AECT].

A "blind spot" suggests an obstructed view, or partisan perception, or a localized lack of understanding. Just as the brain "reads" the "blind spot" of the visual field by a curious process of readjustment, Shakespearean drama disorients us with moments of unmastered and unmasterable knowledge, recasting the way we see, know and think about knowing. Focusing on such moments of apparent obscurity, this volume puts methods and motives of

knowing under the spotlight, and responds both to inscribed acts of blind-sighting, and to the text or action blind-sighting the reader or spectator. While tracing the hermeneutic yield of such occlusion is its main conceptual aim, it also embodies a methodological innovation: structured as an internal dialogue, it aims to capture, and stake out a place for, a processive intellectual energy that enables a distinctive way of knowing in academic life; and to translate a sense of intellectual "community" into print.

In this lyrical, exuberant tale, acclaimed Turkish author Elif Shafak, author of *The Island of Missing Trees* (a Reese's Book Club Pick), incarnates Rumi's timeless message of love. *The Forty Rules of Love* unfolds two tantalizing parallel narratives—one contemporary and the other set in the thirteenth century, when Rumi encountered his spiritual mentor, the whirling dervish known as Shams of Tabriz—that together explore the enduring power of Rumi's work. Ella Rubenstein is forty years old and unhappily married when she takes a job as a reader for a literary agent. Her first assignment is to read and report on *Sweet Blasphemy*, a novel written by a man named Aziz Zahara. Ella is mesmerized by his tale of Shams's search for Rumi and the dervish's role in transforming the successful but unhappy cleric into a committed mystic, passionate poet, and advocate of love. She is also taken with Shams's lessons, or rules, that offer insight into an ancient philosophy based on the unity of all people and religions, and the presence of love in each and every one of us. As she reads on, she realizes that Rumi's story mirrors her own and that Zahara—like Shams—has come to set her free.

A non-stop trip into one man's land of desperate addicts, failed punk bands, and brushes with sad fame, as he sells drugs during the Seattle grunge years. In *American Junkie*, Tom Hansen maps his heroin addiction, from the promise of a young life to the prison of a mattress, from budding musician to broken down junkie, drowning in syringes and cigarette butts, shooting heroin into wounds the size of softballs, and ultimately, a ride to a hospital for a six-month stay and a painful self-discovery that cuts down to the bone. Through it all he never really loses his step, never lets go of his smarts, and always projects quintessential American reason, humor, and hope to make a story not only about drugs, but a compelling study of vulnerability and toughness.

He never heard his music, though, until cast to play a bit part in an Italian biopic filmed in Davenport. Then, after writing a newspaper review of a book about Beiderbecke, Wolfe unexpectedly received a letter from the late musician's nephew scolding him for getting a number of facts wrong. This is where *Finding Bix* begins: in Wolfe's good-faith attempt to get the facts right.

NEW YORK TIMES BESTSELLER • The first definitive history of the Mossad, Shin Bet, and the IDF's targeted killing programs, hailed by *The New York Times* as "an exceptional work, a humane book about an incendiary subject." WINNER OF THE NATIONAL JEWISH BOOK AWARD IN HISTORY NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY JENNIFER SZALAI, THE NEW YORK TIMES NAMED ONE OF THE BEST BOOKS OF THE YEAR BY *The Economist* • *The New York Times Book Review* • *BBC History Magazine* • *Mother Jones* • *Kirkus Reviews* *The Talmud* says: "If someone comes to kill you, rise up and kill him first." This instinct to take every measure, even the most aggressive, to defend the Jewish people is hardwired into Israel's DNA. From the very beginning of its statehood in 1948, protecting the nation from harm has been the responsibility of its intelligence community and armed services, and there is one weapon in their vast arsenal that they have relied upon to thwart the most serious threats: Targeted assassinations have been used countless times, on enemies large and small, sometimes in response to attacks against the Israeli people and sometimes preemptively. In this page-turning, eye-opening book, journalist and military analyst Ronen Bergman—praised by David Remnick as "arguably [Israel's] best investigative reporter"—offers a riveting inside account of the targeted killing programs: their successes, their failures, and the moral and political price exacted on the men and women who approved and carried out the missions. Bergman has gained the exceedingly rare cooperation of many current and former members of the Israeli government, including Prime Ministers Shimon Peres, Ehud Barak, Ariel Sharon, and Benjamin Netanyahu, as well as high-level figures in the country's military and intelligence services: the IDF (Israel Defense Forces), the Mossad (the world's most feared intelligence agency), Caesarea (a "Mossad within the Mossad" that carries out attacks on the highest-value targets), and the Shin Bet (an internal security service that implemented the largest targeted assassination campaign ever, in order to stop what had once appeared to be unstoppable: suicide terrorism). Including never-before-reported, behind-the-curtain accounts of key operations, and based on hundreds of on-the-record interviews and thousands of files to which Bergman has gotten exclusive access over his decades of reporting, *Rise and Kill First* brings us deep into the heart of Israel's most secret activities. Bergman traces, from statehood to the present, the gripping events and thorny ethical questions underlying Israel's targeted killing campaign, which has shaped the Israeli nation, the Middle East, and the entire world. "A remarkable feat of fearless and responsible reporting . . . important, timely, and informative."—John le Carré
