KARTER TALAN

Developing Advanced Literacy in First and Second Languages Springer Nature

This volume presents a systematic approach to developing advanced English language competence at tertiary level. It includes the reflections of experienced language teachers and teacher-researchers in the English Language Competence programme at the University of Vienna and provides examples of good practice, amalgamating teaching expertise and research with aspects of curriculum design and programme management. The book addresses a growing academic and professional interest in understanding advanced language learning and use. To date, research has tended to investigate advanced proficiency from a specific theoretical viewpoint, for example cognition, psycholinguistic processing strategies, or the assumption of a critical period or the age factor. In contrast, this work examines advanced proficiency from a curricular and instructional perspective by providing a profile of advanced-level language development in a specific institutional context. It brings together three areas of language education: curriculum design, pedagogical practice, and research. Within this triangle, advanced English language education is the focus or, conversely, advanced English language education provides the lens through which links between curriculum design, teaching, and research can be established.

English Language and the Medical Profession: Instructing and Assessing the Communication Skills of International Physicians Tata McGraw-Hill Education

This book is a useful guide for the teaching fraternity, administrators and education technology professionals to make good use of AI across outcome-based technical education (OBTE) ecosystem and infuse innovations and affordable digital technologies to traditional pedagogic processes to make teaching-learning more independent of human factor (teacher/student quality), time and place and at the same time more impactful and enjoyable for the learners. Providing access to the digital media and learning tools (even to the extent of mobile apps) to the students would allow them to keep pace with innovations in learning technologies, learn according to their own pace and improve their understanding level and have instantaneous feedback and evaluation. The book explores these new challenges and scope of using computational intelligence in educational technology. The book also addresses how based on the data collected from the outcome of conventional educational system, intelligent diagnostic and feedback system is developed which will change the teaching strategies and corresponding teaching-learning process. The book covers a wider framework of digital pedagogy and its intelligent applications on various sectors of education system.

The Global Future of English Studies presents a succinct, carefully documented assessment of the current state and future trajectory of English studies around the world. Compiles data on student enrollments, faculty hiring, and financing in English studies around the world including China, home to more English majors than the U.S. and U.K. combined. Rejects prevailing narratives of contraction and decline that dominate histories of the discipline. Stresses English studies' expansion within a rapidly expanding global academic apparatus, and the new challenges and opportunities such sudden and dispersive growth presents. Essential reading for anyone interested in studying or teaching English in higher education.

Today, acquiring English language skills has become so essential, especially for those who are looking for new jobs in reputed organizations as well as for the practising professionals. Many engineering students, even though they have adequate knowledge of their subject, are unable to express themselves well in English. Taking this into account, engineering colleges/institutes have introduced exclusive English Language Laboratories where students are drilled in the practical aspects of the English language. This compact and comprehensive book is a step-by-step practical guide to students, telling them how to prepare technical reports and how to acquire the basic communication skills—listening, speaking, reading and writing. The book deals with conversation, situational dialogues and role plays, and Group Discussions (GDs). It also gives detailed discussion about Interviews—step-by-step preparation, practical and psychological preparation, the dos and don'ts for interview—besides dealing with different kinds of interviews: telephonic, videoconferencing, and others. In addition, the text stresses the importance of researching the organization, and salary negotiations. Finally, the book shows the students how to make powerpoint presentations (PPTs), the structure of presentation and using audio visuals. This activity based, skill-oriented, learner centred book is designed according to the WBUT syllabus on Technical Report Writing and Language Laboratory Practice for the B.Tech. students. However, it would be equally useful for B.Tech./B.E. students across the country. **DISTINGUISHING FEATURES :** A practical and student friendly text, the stress being on the functional aspects of the language and various activities for acquiring the language. Gives the Methodology of conducting activities such as GDs, Interviews and Presentation. Provides model GD topics and the step-by-step process of making PPTs. Clearly spells out all the details, right from preparing a good job application, researching the company (including its financial health), to preparing the job portfolio, to wearing the proper dress, handling questions, and negotiating salary. Provides an extensive list of probable questions along with their answers to prepare students for mock interviews. Also gives well-crafted questions at the end of each lesson.

This book addresses the linguistic challenges faced by diverse populations of students at the secondary and post-secondary levels as they engage in academic tasks requiring advanced levels of reading and writing. Learning to use language in ways that meet academic expectations is a challenge for students who have had little exposure and opportunity to use such language outside of school. Although much is known about emergent literacy in the early years of schooling, much less has been written about the development of advanced literacy as students move into secondary education and beyond. *Developing Advanced Literacy in First and Second Languages: Meaning With Power*: *brings together work on first and second language acquisition and emphasizes the importance of developing advanced literacy in the first language, such as Spanish for bilingual students, as well as English; *spans a range of theoretical orientations and analytic approaches, drawing on work in systemic functional linguistics, genre theory, and sociocultural perspectives; *addresses the content areas of science, history, and language arts; *provides specific information about genres and grammatical features in these content areas; and *presents suggestions for teacher education. What unites the contributors to this volume is their shared commitment to a view of literacy that emphasizes both the social contexts and the linguistic challenges. The chapters collected in this volume contribute in important ways to research and pedagogy on advanced

literacy development for the multilingual and multicultural students in today's classrooms. This book is particularly useful for researchers and students in language and education, applied linguistics, and others concerned with issues and challenges of advanced literacy development in first and second languages.

Annual Report on English and American Studies Bookboon

This volume brings conversational analysis into the study of second language pragmatics as an analytic paradigm. A well-regarded team of researchers addresses a difficult area for the interlanguage pragmatics research community--the balance between experimental method and the use of conversational data. Institutional talk provides authentic and consequential talk. The goal of the book is to demonstrate how the investigation of institutional talk balances the researcher's need for comparable and replicable interactions with the need to observe authentic outcomes. The chapters present empirical studies based on quantitative and qualitative analyses, which are carefully illustrated by the real-world variables that each institution controls. The chapters span a range of institutions, including the university writing center, hotels, secondary schools, and employment offices. The variables examined include the traditional ILP variables, such as status, directness, and social distance, as well as new concepts like trust, authority, equality and discourse style.
