With its initial publication in 1983, *A Guide to the Makers of American Wooden Planes* profoundly transformed the emphasis and direction of tool collecting. After several years of meticulous research, Thomas L. Elliott has completely redesigned, revised, and expanded this fifth edition to include entries and information accumulated since the fourth edition. The heart of this guide is the alphabetical directory of plane makers and dealers. This fifth edition now includes: 4590 biographical entries; 6160 imprint illustrations; 3030 wedge outlines; and over 3000 individual ratings for judging relative scarcity and value. Also included are sections providing insights helpful in buying and selling planes, an illustrated glossary of plane terms and styles, and an extensive bibliography for further research. This book is useful to both the beginner and the advanced collector, to historians and genealogists, and to all other with an interest in the subject.

A special fiftieth anniversary edition of Kurt Vonnegut’s masterpiece, “a desperate, painfully honest attempt to confront the monstrous crimes of the twentieth century” (Time), featuring a new introduction by Kevin Powers, author of the National Book Award finalist *The Yellow Birds*. Selected by the Modern Library as one of the 100 best novels of all time *Slaughterhouse-Five*, an American classic, is one of the world’s great antiwar books. Centering on the infamous World War II firebombing of Dresden, the novel is the result of what Kurt Vonnegut described as a twenty-three-year struggle to write a book about what he had witnessed as an American prisoner of war. It combines historical fiction, science fiction, autobiography, and satire in an account of the life of Billy Pilgrim, a barber’s son turned draftee turned optometrist turned alien abductee. As Vonnegut had, Billy experiences the destruction of Dresden as a POW. Unlike Vonnegut, he experiences time travel, or coming “unstuck in time.” An instant bestseller, *Slaughterhouse-Five* made Kurt Vonnegut a cult hero in American literature, a reputation that only strengthened over time, despite his being banned and censored by some libraries and schools for content and language. But it was

precisely those elements of Vonnegut’s writing—the political edginess, the genre-bending inventiveness, the frank violence, the transgressive wit—that have inspired generations of readers not just to look differently at the world around them but to find the confidence to say something about it. Authors as wide-ranging as Norman Mailer, John Irving, Michael Crichton, Tim O’Brien, Margaret Atwood, Elizabeth Strout, David Sedaris, Jennifer Egan, and J. K. Rowling have all found inspiration in Vonnegut’s words. Jonathan Safran Foer has described Vonnegut as “the kind of writer who made people—young people especially—want to write.” George Saunders has declared Vonnegut to be “the great, urgent, passionate American writer of our century, who offers us . . . a model of the kind of compassionate thinking that might yet save us from ourselves.” Fifty years after its initial publication at the height of the Vietnam War, Vonnegut’s portrayal of political disillusionment, PTSD, and postwar anxiety feels as relevant, darkly humorous, and profoundly affecting as ever, an enduring beacon through our own era’s uncertainties. “Poignant and hilarious, threaded with compassion and, behind everything, the cataract of a thundering moral statement.”—The Boston Globe

New Englander Leonard Bailey was one of the inventive geniuses of the American Industrial Revolution. His designs and patented inventions solved problems with woodworking planes that had plagued craftsmen for centuries. His planes allowed woodworkers to transition from the age of wooden carpenter's planes to modern, metallic, fully adjustable planes suitable for any kind of woodworking. His plane designs are still in use throughout the world and are essentially unchanged from the planes he first made in the 1860's. He deserves more credit than he has received among America's great inventors. This book covers the thirty-two-year period in Leonard Bailey's life between 1852 when he began inventing, making and selling woodworking tools in Winchester, Massachusetts, through his years at the Stanley Rule & Level Company from 1869-1874, and ends in 1884 when he worked in Hartford, Connecticut, and sold his Victor Tool business to the Stanley Rule & Level Company.

In this study, Moshe Gat details how the immigration of the Jews from Iraq in effect marked the eradication of one of the oldest and most deeply-rooted Diaspora communities. He provides a background to these events and argues that both Iraqi discrimination and the actions of the Zionist underground in previous years played a part in the flight. The Denaturalization law of 1950 saw tens of thousands of Jews registering for emigration, and a bomb thrown at a synagogue in 1951 accelerated the exodus.
