Calling all developers and consultants: build the best SAP CRM system you can with this essential, one-stop guide!

Implementing Order to Cash Process in SAP Apress

Implement critical business processes with mySAP Business Suite to integrate key functions that add value to every facet of your organization Key Features Learn master data concepts and UI technologies in SAP systems Explore key functions of different sales processes, order fulfillment options, transportation planning, logistics execution

processes, and customer invoicing. Configure the Order to Cash process in SAP systems and apply it to your business needs. *Book Description* Using different SAP systems in an integrated way to gain maximum benefits while running your business is made possible by this book, which covers how to effectively implement SAP Order to Cash Process with SAP Customer Relationship Management (CRM), SAP Advanced Planning and Optimization (APO), SAP Transportation Management System (TMS), SAP Logistics Execution System (LES), and SAP Enterprise Central Component (ECC). You'll understand the integration of different systems and how to optimize the complete Order to Cash Process with mySAP Business Suite. With the help of this book, you'll learn to implement mySAP Business Suite and understand the shortcomings in your existing SAP ECC environment. As you advance through the chapters, you'll get to grips with master data attributes in different SAP environments and then shift focus to the Order to Cash cycle, including

order management in SAP CRM, order fulfillment in SAP APO, transportation planning in SAP TMS, logistics execution in SAP LES, and billing in SAP ECC. By the end of this SAP book, you'll have gained a thorough understanding of how different SAP systems work together with the Order to Cash process. What you will learn: Discover master data in different SAP environments; Find out how different sales processes, such as quotations, contracts, and order management, work in SAP CRM; Become well-versed with the steps involved in order fulfillment, such as basic and advanced ATP checks in SAP APO; Get up and running with transportation requirement and planning and freight settlement with SAP TMS; Explore warehouse management with SAP LES to ensure high transparency and predictability of processes; Understand how to process customer invoicing with SAP ECC. Who this book is for: This book is for SAP consultants, SME managers, solution architects, and key users of SAP with knowledge of end-to-end business

processes. Customers operating SAP CRM, SAP TMS, and SAP APO as part of daily operations will also benefit from this book by understanding the key capabilities and integration touchpoints. Working knowledge of SAP ECC, SAP CRM, SAP APO, SAP TMS, and SAP LES is necessary to get started with this book. *Sales and Distribution with SAP®* Shefaria Ent Incorporated. Integrated with other modules such as MM, PP, and QM, Sales and Distribution is used to handle the sales inventory control, warehousing, and back-office functions. This comprehensive reference includes all major concepts related to SAP SD functionality, technical configuration, and implementation. A complete glossary of terms has been included to help the reader understand the myriad terms associated with this SAP module. The book serves as an excellent reference for both earlier and newer versions of SAP or as a comprehensive review for certification. Topics covered include Invoicing; Distribution points; Backorder processing; Account determination; Material master; Transaction

codes; Partner procedures; Rebates and refunds; Interfaces; Condition types; Inventory issues; Administration tables and more.

Warehouse Management with SAP ERP SAP PRESS

This book offers a comprehensive introduction to SAP S/4HANA Sales and Distribution (SD). You will learn the basic fundamentals of SAP SD, with examples based on a case-study approach. Using a fictional company scenario, you will learn the fundamentals of the order-to-cash process and key flow, from sales order delivery to billing document. Explore the foundational document—the sales order. Obtain detailed information on master data and how it is used in SD. Dive into master data objects, business partners, and material masters. Review how master data is connected to sales orders and pricing. Understand sales order processing, including item categories, availability checking, dates, shipping, texts, and more. Walk through delivery processing and billing. Familiarize yourself with two of the major SD pre-sales documents – contracts

and quotations. Delve into the post-sales processes, including returns, service, and debit and credit memos. Look at transactional list reports and analytical reports. For readers who are new to SAP SD in S/4HANA, the detailed case study, practical examples, tips and screenshots quickly bring readers up to speed on the fundamentals. - Foundations of SAP SD in S/4HANA - Sales orders and document types - Master data objects, business partners and material masters - Examples and screenshots based on a case-study approach Variant Configuration with SAP Apress Ensure an efficient and orderly Warehouse Management implementation with this comprehensive guide to SAP WM in SAP ERP Learn to customize and use critical functionalities, like goods receipt and goods issue, as well as advanced technologies such as RFID, EDI, and mobile data entry. Covering everything from stock management to picking strategies, you'll master SAP WM. This new edition includes ITSmobile, connections with SAP ERP PP and QM, the warehouse activity

monitor, and more. SAP WM Processes Grasp the essentials of warehouse management, including goods receipt, goods issue, replenishment, and putaway. Then master advanced topics such as hazardous materials management, cross-docking, and value-added services. SAP WM Configuration Understand the configuration details necessary to optimize your SAP WM implementation, from storage bins to yard management. Real World Scenarios Explore concrete business cases and examples to help you put expert tips into practice in your own warehouse. Highlights: - Stock management - Goods receipt and goods issue -Replenishment - Picking strategies - Putaway strategies - Inventory management - Yard management - Electronic Data Interchange (EDI) -Radio frequency identification (RFID) -ITSmobile **SAP Billing and Revenue Innovation Management** Jones & Bartlett Publishers This guide dives into the basic SAP S/4HANA configuration settings for FSCM Credit Management. Beginners seeking to better understand the

features, as well as consultants looking for information on how to configure the system, will find the information they need. Each chapter contains specific knowledge for both business users and technical support staff. What exactly is a Business Partner and why do you need one? Explore the Business Partner master record and its relationship to the older master data model. Review settings required in the SAP customizing menu (IMG) for organizational structure and master data, as well as credit limit checking. Walk through the documented credit decision process in SAP. Review integration points with Accounts Receivable (FI-AR) and Sales and Distribution (SD) in depth. Learn more about additional functionality available including credit limit requests and credit exposure updates. - Basic configuration settings - Integration points with FI-AR and SD - Organizational structure and master data - Business Partner master record

and master data, including customer-vendor integration. Then follow click-by-click instructions to configure your key SD processes. Including SAP Fiori reports and KPIs, this is your all-in-one sales resource!

Sales and Distribution with SAP S/4HANA: Business User Guide
Espresso Tutorials GmbH

The implementation of a TMS solution is a highly complex and mission critical project. If executed correctly a good TMS can deliver a number of benefits to the organization in terms of optimization, greater efficiency, reduced errors and improved revenue through accurate invoicing. However a number of projects fail to realize these benefits for a host of reasons such as an incorrect product selection, over customization of the system and lack of detailed processes. The evaluation and selection of the right transportation management system is a very critical step in the successful implementation of a TMS product as well as ensuring that the organization is able to realize the benefits expected from the system. Transportation

Management with SAP TM 9 is a guide for CIO/CXOs evaluating options for various transportation management solutions available in the market and helps inappropriate decision making before committing investment. A proven evaluation framework and guidance provided in the book can help decision makers with product selection and help to create a business case for management approval and design a future roadmap for the organization. The book provides a comprehensive understanding of what SAP transportation management is and is useful for teams involved in TM Implementation and roll outs to ensure preparedness. The book explains end-to-end freight life cycle processes, functional system landscape, implementation challenges and post go-live precautions required to optimize investments in SAP TM. Transportation Management with SAP TM 9 also acts as a step by step implementation guide with details of configuration required to set up a TM9 system. This book also covers the upgrade of SAP TM8 to SAP TM9 which will be useful for existing clients

who are on TM 8. Nonavailability of SAP TM skilled resources is a major challenge faced by organizations and the book provides a detailed competency building plan along with skill set requirements to create a competent and trained workforce to manage transformation. The current book available in the market on SAP TM is based on Version 6 release which does not cover air freight processes. Our book covers end-to-end air freight configuration scenarios for logistic companies.
