Student Life in a Class Society covers specific topics within the general field of social anthropology. This book discusses the social class composition and influence in the student body of the University of Edinburgh, as well as the motives of students entering the university. This book is composed of four parts, encompassing 16 chapters. The first parts deal first with the curvilinear model of organizational change in societies; research methods; social class as a factor in participation in and leadership of student organizations; spatial factors in social relations; relevance of social class in defined social situation; and cultural factors in social relations. These parts also look into the general reactions of students and their families. The remaining parts consider the concepts of student's social mobility and social motility, the students' attitude to university expansion, and the students in control and rebellion. These parts are also concerned with the structural distances and institutional socialization, as well as the research problems in education. The book can provide useful information to psychologists, teachers, students, and researchers.

In the early morning our simple breakfast was spread upon the grass west of our tepee. At the farthest point of the shade my mother sat beside her fire, toasting a savory piece of dried meat. Near her, I sat upon my feet, eating my dried meat with unleavened bread, and drinking strong black coffee. The morning meal was our quiet hour, when we two were entirely alone. At noon, several who chanced to be passing by stopped to rest, and to share our luncheon with us, for they were sure of our hospitality. My uncle, whose death my mother ever lamented, was one of our nation's bravest warriors. His name was on the lips of old men when talking of the proud feats of valor; and it was mentioned by younger men, too, in connection with deeds of gallantry. Old women praised him for his kindness toward them; young women held him up as an ideal to their sweethearts. Every one loved him, and my mother worshiped his memory. Thus it happened that even strangers were sure of welcome in our lodge, if they but asked a favor in my uncle's name. Though I heard many strange experiences related by these wayfarers, I loved best the evening meal, for that was the time old legends were told. I was always glad when the sun hung low in the west, for then my mother sent me to invite the neighboring old men and women to eat supper with us. Running all the way to the

wigwams, I halted shyly at the entrances. Sometimes I stood long moments without saying a word. It was not any fear that made me so dumb when out upon such a happy errand; nor was it that I wished to withhold the invitation, for it was all I could do to observe this very proper silence. But it was a sensing of the atmosphere, to assure myself that I should not hinder other plans. My mother used to say to me, as I was almost bounding away for the old people: "Wait a moment before you invite any one. If other plans are being discussed, do not interfere, but go elsewhere." The old folks knew the meaning of my pauses; and often they coaxed my confidence by asking, "What do you seek, little granddaughter?"

Composition research consistently demonstrates that the social context of writing determines the majority of conventions any writer must observe. Still, most universities organize the required first-year composition course as if there were an intuitive set of general writing "skills" usable across academic and work-world settings. In *College Writing and Beyond: A New Framework for University Writing Instruction*, Anne Beaufort reports on a longitudinal study comparing one student's experience in FYC, in history, in engineering, and in his post-college writing. Her data illuminate the struggle of college students to transfer what they learn about "general writing" from one context to another. Her findings suggest ultimately not that we must abolish FYC, but that we must go beyond even genre theory in reconceiving it. Accordingly, Beaufort would argue that the FYC course should abandon its hope to teach a sort of general academic discourse, and instead should systematically teach strategies of responding to contextual elements that impinge on the writing situation. Her data urge attention to issues of learning transfer, and to developmentally sound linkages in writing instruction within and across disciplines. Beaufort advocates special attention to discourse community theory, for its power to help students perceive and understand the context of writing.

Memory Quirks explores the odd phenomena that challenge and upend our traditional understanding of human memory. Theory in memory research was developed to explain basic processes such as encoding and retrieval, recognition and recall, and semantic and episodic memory. However, the peculiar memory phenomena that we all occasionally experience often contradict standard theories of memory processing. Featuring research from leading international academics, *Memory Quirks* examines such topics as déjà vu, insight and creativity in memory, memory for past meals, the presque vu phenomenon, tip-of-the-tongue states, unconscious plagiarism, and borrowed, stolen, and long-term implicit memory. It also explains why these phenomena are

important to understanding the entire spectrum of human memory. This fascinating book will appeal to undergraduate and postgraduate students, cognitive psychology and metamemory researchers, and those who wish to broaden their understanding of the complexities of memory.

Contemporary Feminist Life-Writing is the first volume to identify and analyse the 'new audacity' of recent feminist writings from life. Characterised by boldness in both style and content, willingness to explore difficult and disturbing experiences, the refusal of victimhood, and a lack of respect for traditional genre boundaries, new audacity writing takes risks with its author's and others' reputations, and even, on occasion, with the law. This book offers an examination and critical assessment of new audacity in works by Katherine Angel, Alison Bechdel, Marie Calloway, Virginie Despentes, Tracey Emin, Sheila Heti, Juliet Jacques, Chris Krauss, Jana Leo, Maggie Nelson, Vanessa Place, Paul Preciado, and Kate Zambreno. It analyses how they write about women's self-authorship, trans experiences, struggles with mental illness, sexual violence and rape, and the desire for sexual submission. It engages with recent feminist and gender scholarship, providing discussions of vulnerability, victimhood, authenticity, trauma, and affect.

The meeting Theoretical Perspectives on Autobiographical Memory was held at the Grange Hotel, Grange-over-Sands, in the Lake District region of North Western England, July 1991. The workshop was financed by a generous grant from the NATO Scientific Affairs Division under the Advanced Research Workshop programme and without this funding the meeting would not have been possible: the organisers and delegates gratefully acknowledge the support of the NATO Advanced Research Workshops programme. Thirty-five scientists from five different NATO countries attended the workshop and twenty-seven delegates presented papers. The two aims of the workshop were to bring together in one forum a number of comparatively separate approaches to autobiographical memory and to promote theory in the area generally. These aims were fulfilled in the presentations and discussions, particularly the final discussion session, in which delegates focussed on the central issues of the nature, structure, and functions of autobiographical memory and how these emerge in different research areas. The present volume contains the papers arising from the workshop. We thank Mrs. Sheila Whalley for secretarial help and Fiona Hirst and Stephen Anderson für practical assistance in coordinating registration for the workshop.

Ronald Reagan's autobiography is a work of major historical importance. Here, in his own words, is the story of his life—public and private—told in a book both frank and compellingly readable. Few presidents have accomplished more, or been so effective in changing the direction of government in ways that are both fundamental and lasting, than Ronald Reagan. Certainly no president has more dramatically raised the American spirit, or done so much to restore national strength and self-confidence. Here, then, is a truly American success story—a great and inspiring one. From modest beginnings as the son of a shoe salesman in Tampico, Illinois, Ronald Reagan achieved first a distinguished career in Hollywood and then, as governor of California and as president of the most powerful nation in the world, a career of public service unique in our history. Ronald Reagan's account of that rise is told here with all the uncompromising candor, modesty, and wit that made him perhaps the most able communicator ever to occupy the White House, and also with the sense of drama of a gifted natural storyteller. He tells us, with warmth and pride, of his early years and of the elements that made him, in later life, a leader of such stubborn integrity, courage, and clear-minded optimism. Reading the account of this childhood, we understand how his parents, struggling to make ends meet despite family problems and the rigors of the Depression, shaped his belief in the virtues of American life—the need to help others, the desire to get ahead and to get things done, the deep trust in the basic goodness, values, and sense of justice of the American people—virtues that few presidents have expressed more eloquently than Ronald Reagan. With absolute authority and a keen eye for the details and the anecdotes that humanize history, Ronald Reagan takes the reader behind the scenes of his extraordinary career, from his first political experiences as president of the Screen Actors Guild (including his first meeting with a beautiful young actress who was later to become Nancy Reagan) to such high points of his presidency as the November 1985 Geneva meeting with Mikhail Gorbachev, during which Reagan invited the Soviet leader outside for a breath of fresh air and then took him off for a walk and a man-to-man chat, without aides, that set the course for arms reduction and charted the end of the Cold War. Here he reveals what went on behind his decision to enter politics and run for the governorship of California, the speech nominating Barry Goldwater that first made Reagan a national political figure, his race for the presidency, his relations with the members of his own cabinet, and his frustrations with Congress. He gives us the details of the great themes and dramatic crises of his eight years in office, from Lebanon to Grenada, from the struggle to achieve arms control to tax reform, from Iran-Contra to the visits abroad that did so much to reestablish the United States in the eyes of the world as a friendly and peaceful power. His narrative is full of insights, from the unseen dangers of Gorbachev's first visit to the United States to Reagan's own personal correspondence with major foreign leaders, as well as his innermost feelings about life in the White House, the assassination attempt, his family—and the enduring love between himself and Mrs. Reagan. An American Life is a warm, richly detailed, and deeply human book, a brilliant self-portrait, a significant work of history.

Given the relationship between trauma, loss, and interpersonal bonds, the editors have assembled a noteworthy list of contributions discussing trauma associated with close relationships (divorce, infertility, widowhood). Certainly, trauma is closely associated with loss. This edited volume offers the perspective of over twenty leading scholars in the study of trauma and loss. Each chapter offers extensive coverage of contemporary issues (terror management, rational suicide, spirituality, stigmatization). Relationship issues within these topics are also explored.

American higher education is more expensive than ever and the rewards seem to be diminishing daily. Sociologist Tim Clydesdale's new book, however, offers some rare good news: when colleges and universities meaningfully engage their organizational histories to launch sustained conversations with students about questions of purpose, the result is a rise in overall campus engagement and recalibration of post-college trajectories that set graduates on journeys of significance and impact. The book is based on a study of programs launched at 88 colleges and universities that invited students, faculty, staff, and administrators to incorporate questions of meaning and purpose into the undergraduate experience. The results were so positive that Clydesdale came away from the study arguing that every campus (religious or not) should engage students in a broad conversation about what it means to live an examined life. This conversation needs to be creative, intentional, systematic, and wide-ranging, he says, because for too long this core liberal educational task has been relegated to the margins, and its attendant religious or spiritual discourse banished from classrooms and quads, to the detriment of higher education's virtually universal mission: graduates marked by thoughtfulness, productivity, and engaged citizenship."

#1 NEW YORK TIMES BESTSELLER • ONE OF ESSENCE'S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS In this iconic memoir of his early days, Barack Obama "guides us straight to the intersection of the most serious questions of identity, class, and race" (The Washington Post Book World). "Quite extraordinary."—Toni Morrison In this lyrical, unsentimental, and compelling memoir, the son of a black African father and a white American mother searches for a workable meaning to his life as a black American. It begins in New York, where Barack Obama learns that his father—a figure he knows more as a myth than as a man—has been killed in a car accident. This sudden death

inspires an emotional odyssey—first to a small town in Kansas, from which he retraces the migration of his mother's family to Hawaii, and then to Kenya, where he meets the African side of his family, confronts the bitter truth of his father's life, and at last reconciles his divided inheritance. Praise for *Dreams from My Father* "Beautifully crafted . . . moving and candid . . . This book belongs on the shelf beside works like James McBride's *The Color of Water* and Gregory Howard Williams's *Life on the Color Line* as a tale of living astride America's racial categories."—Scott Turow "Provocative . . . Persuasively describes the phenomenon of belonging to two different worlds, and thus belonging to neither."—The New York Times Book Review "Obama's writing is incisive yet forgiving. This is a book worth savoring."—Alex Kotlowitz, author of *There Are No Children Here* "One of the most powerful books of self-discovery I've ever read, all the more so for its illuminating insights into the problems not only of race, class, and color, but of culture and ethnicity. It is also beautifully written, skillfully layered, and paced like a good novel."—Charlayne Hunter-Gault, author of *In My Place* "Dreams from My Father is an exquisite, sensitive study of this wonderful young author's journey into adulthood, his search for community and his place in it, his quest for an understanding of his roots, and his discovery of the poetry of human life. Perceptive and wise, this book will tell you something about yourself whether you are black or white."—Marian Wright Edelman

Abnormal and clinical psychology courses are offered in psychology programs at universities worldwide, but the most recent major encyclopedia on the topic was published many years ago. Although general psychology handbooks and encyclopedias include essays on abnormal and clinical psychology, such works do not provide students with an accessible reference for understanding the full scope of the field. The SAGE Encyclopedia of Abnormal and Clinical Psychology, a 7-volume, A-Z work (print and electronic formats), is such an authoritative work. Its more than 1,400 entries provide information on fundamental approaches and theories, various mental health disorders, assessment tools and psychotherapeutic interventions, and the social, legal, and cultural frameworks that have contributed to debates in abnormal and clinical psychology. Key features include: 1,400 signed articles contained in 7 volumes and available in choice of print and/or electronic formats Although organized A-to-Z, front matter includes a Reader's Guide grouping related entries thematically Back matter includes a Chronology, Resource Guide, Bibliography, and detailed Index Entries conclude with References/Further Readings and Cross-References to related entries The Index, Reader's Guide themes, and Cross-References between and among entries all combine to provide robust search-and-browse features in the electronic version.

This book is the first comprehensive history of medical student culture and medical education in Ireland from the middle of the nineteenth century until the 1950s. Utilising a variety of rich sources, including novels, newspapers, student magazines, doctors' memoirs, and oral history accounts, it examines Irish medical student life and culture, incorporating students' educational and extra-curricular activities at all of the Irish medical schools. The book investigates students' experiences in the lecture theatre, hospital, dissecting room and outside their studies, such as in 'digs', sporting teams and in student societies, illustrating how representations of medical students changed in Ireland over the period and examines the importance of class, religious affiliation and the appropriate traits that students were expected to possess. It highlights religious divisions as well as the dominance of the middle classes in Irish medical schools while also exploring institutional differences, the students' decisions to pursue medical education, emigration and the experiences of women medical students within a predominantly masculine sphere. Through an examination of the history of medical education in Ireland, this book builds on our understanding of the Irish medical profession while also contributing to the wider scholarship of student life and culture. It will appeal to those interested in the history of medicine, the history of education and social history in modern Ireland.
