A New York Times Notable Book of 2020 A Bloomberg Best Non-Fiction Book of 2020 A Behavioral Scientist Notable Book of 2020 A Human Behavior & Evolution Society Must-Read Popular Evolution Book of 2020 A bold, epic account of how the co-evolution of psychology and culture created the peculiar Western mind that has profoundly shaped the modern world. Perhaps you are WEIRD: raised in a society that is Western, Educated, Industrialized, Rich, and Democratic. If so, you're rather psychologically peculiar. Unlike much of the world today, and most people who have ever lived, WEIRD people are highly individualistic, self-obsessed, control-oriented, nonconformist, and analytical. They focus on themselves—their attributes, accomplishments, and aspirations—over their relationships and social roles. How did WEIRD populations become so psychologically distinct? What role did these psychological differences play in the industrial revolution and the global expansion of Europe during the last few centuries? In *The WEIRDest People in the World*, Joseph Henrich draws on cutting-edge research in anthropology, psychology, economics, and evolutionary biology to explore these questions and more. He illuminates the origins and evolution of family structures, marriage, and religion, and the profound impact these cultural transformations had on human psychology. Mapping these shifts through ancient history and late antiquity, Henrich reveals that the most fundamental institutions of kinship and marriage changed dramatically under pressure from the Roman Catholic Church. It was these changes that gave rise to the WEIRD psychology that would coevolve with impersonal markets, occupational specialization, and free competition—laying the foundation for the modern world. Provocative and engaging in both its broad scope and its surprising details, *The WEIRDest People in the World* explores how culture, institutions, and psychology shape one another, and explains what this means for both our most personal sense of who we are as individuals and also the large-scale social, political, and economic forces that drive human history. Includes black-and-white illustrations.

Cumulated Index Medicus Springer Science & Business Media

Illustrations: 2 maps and 23 line drawings Description: The book focuses on the decline of the towns and their desertion in late ancient and early medieval India on the basis of archaeological evidence. The author has material remains to study crafts, commerce and coinage, and identifies and illustrates signs of growth and decay for more than 130 excavated sites. The strata with poor remains are taken to indicate decrease in construction, manufacturing and commercial activities, and are hence associated with de-urbanization. The reasons for the urban eclipse are sought not only in the fall of empires but also in social disorder and the loss of long-distance trade. The disintegration of the town life is seen not as social regression but as part of the social transformation

which generated classical feudalism and promoted rural expansion. The book explores the link between urban decay and land grants to officials, priests, temples and monasteries. It shows how the landed elements collected surplus and services directly from the peasants, and remunerated artisan servicing castes through land grants and grain supply. The monograph should interest students of pre-modern urban history and those who study processes of change in economy and society in Gupta and post-Gupta times. It may also provide basic information on the urban horizons of excavated sites during the second half of the first millennium BC and the following six centuries AD.

2024-25 IAS/UPSC General Studies General Science & Technology Solved Papers V&S Publishers

This paper examines the performance of Islamic banks (IBs) and conventional banks (CBs) during the recent global crisis by looking at the impact of the crisis on profitability, credit and asset growth, and external ratings in a group of countries where the two types of banks have significant market share. Our analysis suggests that IBs have been affected differently than CBs. Factors related to IBs' business model helped limit the adverse impact on profitability in 2008, while weaknesses in risk management practices in some IBs led to a larger decline in profitability in 2009 compared to CBs. IBs' credit and asset growth performed better than did that of CBs in 2008-09, contributing to financial and economic stability. External rating agencies' re-assessment of IBs' risk was generally more favorable.

New York Supplement CRC Press

A respected resource for decades, the *Guide for the Care and Use of Laboratory Animals* has been updated by a committee of experts, taking into consideration input from the scientific and laboratory animal communities and the public at large. The Guide incorporates new scientific information on common laboratory animals, including aquatic species, and includes extensive references. It is organized around major components of animal use: Key concepts of animal care and use. The Guide sets the framework for the humane care and use of laboratory animals. Animal care and use program. The Guide discusses the concept of a broad Program of Animal Care and Use, including

roles and responsibilities of the Institutional Official, Attending Veterinarian and the Institutional Animal Care and Use Committee. Animal environment, husbandry, and management. A chapter on this topic is now divided into sections on terrestrial and aquatic animals and provides recommendations for housing and environment, husbandry, behavioral and population management, and more. Veterinary care. The Guide discusses veterinary care and the responsibilities of the Attending Veterinarian. It includes recommendations on animal procurement and transportation, preventive medicine (including animal biosecurity), and clinical care and management. The Guide addresses distress and pain recognition and relief, and issues surrounding euthanasia. Physical plant. The Guide identifies design issues, providing construction guidelines for functional areas; considerations such as drainage, vibration and noise control, and environmental monitoring; and specialized facilities for animal housing and research needs. The Guide for the Care and Use of Laboratory Animals provides a framework for the judgments required in the management of animal facilities. This updated and expanded resource of proven value will be important to scientists and researchers, veterinarians, animal care personnel, facilities managers, institutional administrators, policy makers involved in research issues, and animal welfare advocates.

"Each Man Cried Out to His God" YOUTH COMPETITION TIMES

Software product lines are emerging as an important new paradigm for software development. Product lines are enabling organizations to achieve impressive time-to-market gains and cost reductions. In 1997, we at the Software Engineering Institute (SEI) launched a Product Line Practice Initiative. Our vision was that product line development would be a low-risk, high-return proposition for the entire software engineering community. It was our hope from the beginning that there would eventually be sufficient interest to hold a conference. The First Software Product Line Conference (SPLC1) was the realization of that hope. Since SPLC1, we have seen a growing interest in software product lines. Companies are launching their own software product line initiatives, product line technical and business practices are maturing, product line tool vendors are emerging, and books on product lines are being published. Motivated by the enthusiastic response to SPLC1 and the increasing number of software product lines and product line researchers and practitioners, the SEI is proud to sponsor this second conference dedicated to software product lines. We were gratified by the submissions to SPLC2 from all parts of the globe, from government and commercial organizations. From these submissions we were able to assemble a rich and varied conference program with unique opportunities for software product line novices, experts, and those in between.

This collection represents the papers selected from that response and includes research and experience reports.

LPIC-2 Cert Guide (201-400 and 202-400 Exams) is a best-of-breed exam study guide. Expert Linux/Unix instructor William "Bo" Rothwell shares preparation hints and test-taking tips, helping you identify areas of weakness and improve both your conceptual knowledge and hands-on skills. Material is presented in a concise manner, focusing on increasing your understanding and retention of exam topics. The book presents you with an organized test preparation routine through the use of proven series elements and techniques. Exam topic lists make referencing easy. Chapter-ending Exam Preparation Tasks help you drill on key concepts you must know thoroughly. Review questions help you assess your knowledge, and a final preparation chapter guides you through tools and resources to help you craft your final study plan. You get access to the powerful Pearson IT Certification Practice Test engine, complete with hundreds of exam-realistic questions. The assessment engine offers you a wealth of customization options and reporting features, laying out a complete assessment of your knowledge to help you focus your study where it is needed most. Well-regarded for its level of detail, assessment features, and challenging review questions and exercises, this study guide helps you master the concepts and techniques that will allow you to succeed on the exam the first time. The study guide helps you master all the topics on both LPIC-2 exams, including: Capacity planning Managing the kernel Managing system startup Managing filesystems and devices Administering advanced storage devices Configuring the network Performing system maintenance Administering Domain Name Server (DNS) Configuring web services Administering file sharing Managing network clients Administering e-mail services Administering system security Learn, prepare, and practice for LPIC-2 201-400 and 202-400 exam success with this Cert Guide from Pearson IT Certification, a leader in IT Certification. Master LPIC-2 Exam 201-400 and 202-400 exam topics Assess your knowledge with chapter-ending quizzes Review key concepts with exam preparation tasks Practice with realistic exam questions

Leaves from an Epigrapher's Notebook: Collected Papers in Hebrew and West Semitic Palaeography and Epigraphy Penn State Press

The important Early Bronze Age site of Bâb edh-Dhrâ', on the lisan near the Dead Sea in Jordan, was first excavated by Paul W. Lapp in the 1960s. The first volume of the Reports of the Expedition described the burial practices and artifacts revealed in the 1965-67 Bab edh-Dhra' excavations directed by Lapp. This second volume reports on the four seasons of excavation, from 1975-81, at the town site, directed by Walter E. Rast and R. Thomas Schaub. It focuses on the lifeways of the Early Bronze Age peoples who inhabited the site during the Early Bronze Age. The stratigraphy and changing architectural practices of five major phases are fully documented and interpreted, with extensive plans and sections. Alternating chapters trace the development of the ceramic sequences, accompanied by innovative statistical analyses of the wares, forms, types, and function of the town assemblage. The results of the ceramic studies are compared to the contemporary cemetery ceramic sequences and other important excavated Early Bronze Age sites such as Arad, Jericho, Ai,

Megiddo, and Tel Yarmuth. A series of integrated studies based on the town site sequences focuses on the adaptive agricultural practices of the Early Bronze Age people, revealed through the paleobotanical evidence, pollen analysis, and the ground stone industry. Specialized studies on the chert tools, metals, jewelry, and glyptic art offer new insights into the cultural patterns that distinguish this period. A new series of C14 dates helps to situate the Jordanian material within the contemporary cultural sequences of the fourth and third millennia in Egypt and Mesopotamia.
