Lloyd's Register

Test Automation using HP Unified Functional Testing (UFT) 11.5, is the first book released globally on HP UFT 11.5, which is the latest and enhanced version of the HP test automation tool, Quick

Test Professional (QTP). This UFT book has been designed with the objectives of simplicity and ease of understanding. This book is recommended both for those who are beginning to learn test automation (using QTP) and for advanced automation users. Another major highlight of this book is that you will be learning on our custom developed web based application instead of windows based flight reservation application that comes by default with HP QTP/UFT. This application with enhanced test scenarios will bring you very close to real-time automation using HP QTP/UFT. With author's huge experience as corporate trainer on HP QTP/UFT, this book follows a unique training based approach instead of a regular text book approach. As a step by step guide, it guides the student through every step of the exercises with the help of snapshots. The book also covers the most common interview questions and answers for HP QTP/UFT. It covers new features of HP UFT 11.5 and also covers aspects of Integration of HP QTP/UFT with HP ALM (Quality Center) platform. It also discusses how to use VBscript in and working working with advanced scripting concepts in QTP/UFT. Author Navneesh Garg, has been a QTP/UFT expert, automation architect and corporate trainer on QTP/UFT for last 14+ years. He has worked on QTP versions, QTP 6.0, QTP 8.0, QTP.9.0, QTP 9.5, QTP10.0, QTP11.0 and UFT 11.5 for more than 10 years. Quotes from reviewers "A great hands-on guide on mastering automation using the new Unified Functional Testing(HP UFT) automation tool. An example custom build web based application used throughout the book ensures a quick grasp of key concepts. This book with its real life examples, is sure to benefit a novice beginner as well as seasoned automation professionals looking to step up to HP UFT 11.5, highly

recommended" - S. Constancio "Outstanding book on HP QuickTest Professional (HP QTP). Rather than a text book approach, a training based approach to explain UFT features is an amazing concept. Also learning the tool over web based application is fabulous as we have complete web based application environment" - Philip Smith

### The Amateur Photographer & Cinematographer

In the last few decades, health informaticians have established the knowledge base and practical expertise to facilitate the development of ever-more capable technical systems, increased connectivity, expanded access and the greater mobility of e-health and information management systems, and we have witnessed the evolution from simple computer-based records to systems allowing intra-organisational, national, and even international communication and information exchange. This book presents 20 of the papers delivered at the 24th Australian National Health Informatics Conference (HIC 2016), held in Melbourne, Australia in July 2016. The primary theme of the 2016 conference is Digital Health Innovation for Consumers, Clinicians, Connectivity and Community. The papers included here reflect this theme, and highlight the cutting edge research evidence, technology updates and innovations that are fuelling the digital transformation of the healthcare sector. They cover a wide spectrum of fields and encompass major theoretical concepts, examples of key applications of new technologies and important new developments in the field of health informatics. The book provides a current overview of trends in health informatics, and will be of interest to all those involved in the planning, design, implementation and delivery of healthcare today.

### *Technical Memorandums*

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the

world's largest global IT media network.

### *Lloyd's Register of Yachts 1925*

The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes, which are self-propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.

### *Resonant Tunneling*

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

#### **The Martindale-Hubbell Law Directory**

This book presents high-quality research papers presented at 4th International Conference on Sustainable and Innovative Solutions for Current Challenges in Engineering and Technology (ICSISCET 2022) held at Madhav Institute of Technology & Science (MITS), Gwalior, India, from November 19 to 20, 2022. The book extensively covers recent research in artificial intelligence (AI) that knit together nature-inspired algorithms, evolutionary computing, fuzzy systems, computational intelligence, machine learning, deep learning, etc., which is very useful while dealing with real problems due to their model-free structure, learning ability, and flexible approach. These techniques mimic human thinking and decision-making abilities to produce systems that are intelligent, efficient, cost-effective, and fast. The book provides a friendly and informative treatment of the topics which makes this book an ideal reference for both beginners and experienced researchers.

*Lloyd's Register of Shipping 1881*

This book studies electron resonant tunneling in two- and three-dimensional quantum waveguides of variable cross-sections in the time-independent approach. Mathematical models are suggested for the resonant tunneling and develop asymptotic and numerical approaches for investigating the models. Also, schemes are presented for several electronics devices based on the phenomenon of resonant tunneling. Compared to its first edition, this book includes four new chapters, redistributes the content between chapters and modifies the estimates of the remainders in the asymptotics of resonant tunneling characteristics. The book is addressed to mathematicians, physicists, and engineers interested in waveguide theory and its applications in electronics.

The Lloyd's Register of Yachts was first issued in 1878, and was issued annually until 1980, except during the years 1916-18 and 1940-46. Two supplements containing additions and corrections were also issued annually. The Register contains the names, details and characters of Yachts classed by the Society, together with the particulars of other Yachts which are considered to be of interest, illustrates plates of the Flags of Yacht and Sailing Clubs, together with a List of Club Officers, an illustrated List of the Distinguishing Flags of Yachtsmen, a List of the Names and Addresses of Yacht Owners, and much other information.
