Featuring interviews with topflight scholars discussing their work and that of their colleagues, this retrospective of the first hundred years of Columbia Business School recounts the role of the preeminent institution in transforming education, industry, and global society. From its early years as the birthplace of value investing to its seminal influence on Warren Buffett and Benjamin Graham, the school has been a profound incubator of ideas and talent, determining the direction of American business. In ten chapters, each representing a single subject of the school's research, senior faculty members recount the collaborative efforts and innovative approaches that led to revolutionary business methods in fields like finance, economics, and accounting. They describe the pioneering work that helped create new quantitative and stochastic tools to enhance corporate decision making, and they revisit the groundbreaking twentieth-century marketing and management paradigms that continue to affect the fundamentals of global business. The volume profiles several prominent centers and programs that have helped the school adapt to recent advancements in international business, entrepreneurship, and social enterprise. Columbia Business School has long offered its diverse students access to the best leaders and thinkers in the industry. This book not only reflects on these relationships but also imagines what might be accomplished in the next hundred years.

This volume discusses business disruptions as strategic to gain market competitiveness. It analyzes the convergence of innovation and technology, business practices, public policies, political ideologies, and consumer values to strengthen competitive business practices through disruptions. Bringing together contributions from global experts, the chapters add to knowledge on contemporary business models, business strategies, radical interventions in manufacturing, services, and marketing organizations. Disruptive innovations led by contemporary trends, tend to transform the market and consumers' landscape. These trends include shifts from closed to open models of innovation, servitization, and moving from conventional manufacturing and marketing paradigms to industry 4.0 business philosophy. Focused on the triadic themes of disruption, innovation, and management in emerging markets, this book serves as a valuable compendium for research in entrepreneurship development, regional business and development, contemporary political ideologies, and changing social values.

Entrepreneurship As Practice Edward Elgar Publishing

This second decade of the millennium finds the world changing at a once unimaginable pace. Businesses, tangled in the interwoven threads of galloping globalization, technological advances, cultural diversity, economic recession and deep-rooted human social evolution, struggle to keep up with incessant changes; consequently and inexorably experiencing severe difficulties and disorientation. Executives, much bewildered, habitually turn to conventional, time-honoured strategies and practices, which increasingly fail to offer the much-sought answers and means to survival, competitiveness and growth. We are currently experiencing a business era of turbulence and dynamic change – an era that inherently rejects conventionality and orthodox business theory to reward businesses embracing agility, reflex-style adaptability, innovation and creativity. This turbulence is, however, not a parenthesis or even a pattern, but the new reality in which each business must reinvent and redefine itself. This is a new reality of stakeholders that shift focus from the external to the internal, from the tangible to the intangible, and from fact to perception. This book presents research and paradigms that transcend classical theory in order to examine how business practice is positively affected by these conditions. Across a multitude of sectors and organisational types, scholars of different business specialisations set the theoretical foundations of contemporary thinking and present their practical implementations.

Barriers to Riches

The Fourth Industrial Revolution has disrupted businesses worldwide through the introduction of highly automated processes. This disruption has affected the way in which companies conduct business, impacting everything from managerial styles to resource allocations to necessary new skillsets. As the business world continues to change and evolve, it is imperative that business education strategies are continuously revised and updated in order to adequately prepare students who will be entering the workforce as future entrepreneurs, executives, and marketers, among other careers. The Research Anthology on Business and Technical Education in the Information Era is a vital reference source that examines the latest scholarly material on pedagogical approaches in finance, management, marketing, international business, and other fields. It also explores the implementation of curriculum development and instructional design strategies for technical education. Highlighting a range of topics such as business process management, skill development, and educational models, this multi-volume book is ideally designed for business managers, business and technical educators, entrepreneurs, academicians, upper-level students, and researchers.

The Academy of Management is proud to announce the inaugural volume of The Academy of Management Annals. This exciting new series follows one guiding principle: The advancement of knowledge is possible only by conducting a thorough examination of what is known and unknown in a given field. Such assessments can be accomplished through comprehensive, critical reviews of the literature—crafted by informed scholars who determine when a line of inquiry has gone astray, and how to steer the research back onto the proper path. The Academy of Management Annals provide just such essential reviews. Written by leading management scholars, the reviews are invaluable for ensuring the timeliness of advanced courses, for designing new investigative approaches, and for identifying faulty methodological or conceptual assumptions. The Annals strive each year to synthesize a vast array of primary research, recognizing past principal contributions while illuminating potential future avenues of inquiry. Volume 1 of the Annals explores a wide spectrum of research: corporate control; nonstandard employment; critical management; physical work environments; public administration team learning; emotions in organizations; leadership and health care; creativity at work; business and the environment; and bias in performance appraisals. Ultimately, academic scholars in management and allied fields (e.g., sociology of organizations and organizational psychology) will see The Academy of Management Annals as a valuable resource to turn to for comprehensive, up-to-date information—published in a single volume every year by the preeminent association for management research.

In handicrafts and artisanal products, industry has witnessed both a technological shift and a renewed interest among customers, especially after the challenges and limitations of mass production became evident under the COVID-19 pandemic. This book portrays the worldwide development of this trend, the nature of entrepreneurship in these industries, and the unique challenges and opportunities that entrepreneurs face. The book shows how these businesses are gaining a resurgence due to customers preferring ethical, regional, and climate-friendly options to fulfill their needs. The chapters focus on artisan entrepreneurs' contribution to society by not only creating businesses, but also in terms of tourism development. The book reiterates that artisan entrepreneurs enable crucial cultural connections with tradition due to their affinity to a region, city, village, or community. Small business and entrepreneurship researchers as well as policymakers in the cultural sector would benefit from this book.

This book discusses social entrepreneurship, especially in context of India. It focuses on understanding the whole process of social value creation, i.e. social entrepreneurship - opportunity identification, resource mobilisation, social value, capabilities of social entrepreneurs and innovation in three different types of social enterprises - (i) non-profit or charitable ones; (ii) non-profit social enterprise, sustainable with the combined income of grants, subsidies and own earned income; self-sustainable not-for-profit social enterprise; and hybrid social enterprise; and (iii) for-profit social enterprises. Sample cases of social entrepreneurs (Ashoka Fellows) were selected from three inter-linked sectors -- health, education and livelihood. To provide a comprehensive view, interviews were taken not only from the founders (social entrepreneurs), management personnel, and other employees, but also from the beneficiaries. The book comprises how, on the basis of cross-comparison between three types of social enterprises, several propositions and finally theoretical framework on social entrepreneurship have been developed. It proposes that social entrepreneurship can be acquired and that these social entrepreneurs can help solve the larger social problems faced both by developing and developed nations.

A third of the world's entrepreneurial activity is driven by women. With the mass movement of people now commonplace, the role of female entrepreneurs in immigrant communities has become an increasingly important component of the world economy, its productivity, and the struggle against poverty. Throwing light on the dynamics of entrepreneurship generally, and on immigrant and female entrepreneurship in particular, the global Female Immigrant Entrepreneurship (FIE) project is a huge and exciting research undertaking. Written by the project's team of researchers based in prestigious business schools and universities on almost every continent, this important book begins the process of discovering why and how

female driven business start-ups often seem to spontaneously emerge in adverse environments. Is it randomness, luck, or chance that determine success or failure, or vital critical forces and the inherent qualities of the women involved? The research emerging from the FIE project points to answers to questions about the integration of immigrant communities, their interaction with host economic and business environments, and the role of women in that interaction. With findings from more than fifteen countries, from the USA with some of the world's oldest and largest immigrant communities, to African countries that are the newest destination for Asian migrants, this book will help inform social and economic policy in communities and countries searching for prosperity. More than that, the book offers policy makers, business leaders, and those concerned with business development the chance to uncover some of the mystery around the complex phenomenon of entrepreneurship itself.

ÓThis exciting second volume of cutting-edge research on venture capital takes up where volume one leaves off, bringing greater depth to topics covered in the first volume (such as angel investing) and adding new topics and insights. It poses interesting questions such as 'Is venture capital in crisis? Are new models of early investing needed?' and offers carefully researched answers. Landström and Mason provide insightful commentary and skillfully pinpoint the contributions of a talented set of researchers. Both scholars and practitioners of venture capital will want to read this book.Ó

• Harry J. Sapienza, University of Minnesota, US ÓThe second edition of the Handbook of Research on Venture Capital provides an important guidepost for venture capital researchers. As Landström and Mason point out, the nature of venture capital has changed dramatically over the last ten years. The asset class as a whole has failed to return principal and the old model is under tremendous strain. The contributors nicely highlight many of these changes, especially how venture capital has scaled beyond the US. For those of us active in venture capital research, the chapters raise many interesting research questions that deserve further attention.Ó

• Andrew Zacharakis, Babson College, US This Handbook charts the

development of venture capital research in light of the global financial crisis, starting with an analysis of the current venture capital market and the changing nature of the business angel market. Looking at governance structures, the performance of venture capitalists in terms of investments, economic impact and human capital, and the geographical organization of business angels and venture capital global 'hotspots', this book also analyses the current state of venture capital research and offers a roadmap for the future.

A new venture or business always stands on the precarious ground of unpredictable challenges wherein it is constantly subjected to pressures from competition and the ever changing dynamics of the market. In this scenario, a venture can only be successful, if it is guided by an entrepreneur who measures situations insightfully and calculates the risks before taking a plunge. *Entrepreneurship: Creating and Leading an Entrepreneurial Organization* is about creating, managing, and leading an entrepreneurial organization. The contents would help in inculcating an entrepreneurial mindset, developing entrepreneurial skills, and equipping the reader with the basic knowledge and skills for launching and managing the growth of a venture. The teaching/learning of entrepreneurship require greater focus on experiential learning. Therefore, the book extensively emphasizes on experiential learning and a hands-on approach - 'learning by doing'. Book has cited a number of examples and given cases and exercises from Indian as also global contexts to make entrepreneurship learning an enjoyable experience.
