Anglo-Saxon England: Volume 32 Univ of North Carolina Press

South Yorkshire has some of the most varied countryside in England, ranging from the Pennine moors and the wooded hills and valleys in the west to the estate villages on the magnesian limestone escarpment and the lowlands in the east. Each of these different landscapes has been shaped by human activities over the centuries. This book tells the story of how the present landscape was created. It looks at buildings, fields, woods and moorland, navigable rivers and industrial remains, and the intriguing place-names that are associated with them.

Lyrical and compelling, *Spirit of Place* examines the British landscape as it's portrayed in literature and art. English landscape painting is often said to be an eighteenth-century invention, yet when we look for representations of the countryside in British art and literature, we find a story that begins with Old English poetry and winds its way through history, all the way up to the present day. In *Spirit of Place*, Susan Owens illuminates how the British landscape has been framed, reimagined, and reshaped by generations of creative thinkers. To offer a panoramic view of the countryside throughout history, Owens dives into the work of writers and artists from Bede and the Gawain Poet to Thomas Gainsborough, Jane Austen, J. M. W.

Turner, and John Constable, and from Paul Nash and Barbara Hepworth to Robert Macfarlane. Richly illustrated, including manuscript pages, early maps, paintings, film stills, and photographs, *Spirit of Place* is a compelling narrative of how we have been shown the British landscape.

Throughout the centuries of its existence, Anglo-Saxon society was highly, if not widely, literate: it was a society the functioning of which depended very largely on the written word. All the essays in this volume throw light on the literacy of Anglo-Saxon England, from the writs which were used as the instruments of government from the eleventh century onwards, to the normative texts which regulated the lives of Benedictine monks and nuns, to the runes stamped on an Anglo-Saxon coin, to the pseudorunes which deliver the coded message of a man to his lover in a well-known Old English poem, to the mysterious writing on an amulet which was apparently worn by a religious for a personal protection from the devil. The usual comprehensive bibliography of the previous year's publications in all branches of Anglo-Saxon studies rounds off the book.

'This volume on interdisciplinary work in mountain areas is an excellent compilation of examples as well as lessons learned. In effect it provides guidance on how best to approach such work. While different in training and backgrounds the [authors] clearly articulate the global conviction that interdisciplinary work is the only approach. This volume of case studies repeats this strong and important message.' Nikita Lopoukhine Chair of the IUCN World Commission on Protected Areas and former Director General of National Parks Canada 'Over the past twenty years the rhetoric surrounding inte.

"The Making of a Land - Geology of Norway" takes the reader on a journey in geological time, from primordial times to the present day. A fantastic journey from the summits of Norway's spectacular rugged and weather-beaten mountains to the riches concealed in the sedimentary rocks on the continental shelf. This book displays the treasures of Norwegian geology for everyone to see. Norway's geological resources represent the foundation of its welfare state. During several centuries first the mining, and then the oil industries have been economic mainstays, and this will continue in the future. The book presents a description both of Norway and the planet we inhabit and depend on for our survival. It is lavishly illustrated with photographs and maps from all over the country.

In the heart of Washington, D.C., a centuries-old landscape has come alive in the twenty-first century through a re-creation of the natural environment as the region's original peoples might have known it. Unlike most landscapes that surround other museums on the National Mall, the natural environment around the Smithsonian's National Museum of the American Indian (NMAI) is itself a living exhibit, carefully created to reflect indigenous ways of thinking about the land and its uses. Abundantly illustrated, The Land Has Memory offers beautiful images of the museum's natural environment in every season as well as the uniquely designed building itself. Essays by Smithsonian staff and others involved in the museum's creation provide an examination of indigenous peoples' long and varied relationship to the land in the Americas, an account of the museum designers' efforts to reflect traditional knowledge in the creation of individual landscape elements, detailed descriptions of the 150 native plant species used, and an exploration of how the landscape changes seasonally. The Land Has Memory serves not only as an attractive and informative keepsake for museum visitors, but also as a thoughtful representation of how traditional indigenous ways of knowing can be put into practice.

The late Middle Ages (c.1200-1500) was an age of transition. The major events of this period - the Black Death, the Hundred Years War, the rise of Parliament, the depositions of five English kings between 1327 and 1483 - are examined in detail in this book.
