This book presents a selection of unusual neuroradiology cases, each documented with a short medical history, CT and MRI images, and one page with clinical features and radiological findings.

A total of 25 rare and peculiar cases were selected from the authors' clinical experience. Over time, the authors witnessed several of these cases - for which there is little or no information in the international literature - being misinterpreted, especially by residents, general radiologists who occasionally have to deal with neuroradiology cases, or young neuroradiologists. Written by experienced practitioners, this atlas, with its thoroughly documented collection of

rare neuroradiological cases, represents a valuable clinical tool for young radiologists and will encourage them to "think outside the box" and successfully find the correct diagnosis.

Annie Jacobsen, the untold USA Today bestselling story of the CIA's secret paramilitary units. Surprise . . . your target. Kill . . . your enemy. Vanish . . . without a trace. When diplomacy fails, and war is unwise, the president calls on the CIA's Special Activities Division, a highly-classified branch of the CIA and the most effective, black operations force in the world.

Originally known as the president's guerrilla warfare corps, SAD conducts risky and

ruthless operations that have evolved over time to defend America from its enemies. Almost every American president since World War II has asked the CIA to conduct sabotage, subversion and, yes, assassination. With unprecedented access to forty-two men and women who proudly and secretly worked on CIA covert operations from the dawn of the Cold War to the present day, along with declassified documents and deep historical research, Pulitzer Prize finalist Annie Jacobsen unveils -- like never before -- a complex world of individuals working in treacherous environments populated with killers, connivers, and saboteurs. Despite Hollywood notions of off-book operations and external secret hires, covert action is actually one piece in a colossal foreign policy machine. Written with the pacing of a thriller, *Surprise, Kill, Vanish* brings to vivid life the sheer pandemonium and chaos, as well as the unforgettable human will to survive and the intellectual challenge of not giving up hope that define paramilitary and intelligence work. Jacobsen's exclusive interviews -- with members of the CIA's

Senior Intelligence Service (equivalent to the Pentagon's generals), its counterterrorism chiefs, targeting officers, and Special Activities Division's Ground Branch operators who conduct today's close-quarters killing operations around the world -- reveal, for the first time, the enormity of this shocking, controversial, and morally complex terrain. Is the CIA's paramilitary army America's weaponized strength, or a liability to its principled standing in the world? Every operation reported in this book, however unsettling, is legal.

In 1884, the first of 68 prisoners convicted of terrorism and revolutionary activity were transferred to a new maximum security prison at Shlissel'burg Fortress near St Petersburg. The regime of indeterminate sentences in isolation caused severe mental and physical deterioration among the prisoners, over half of whom died. But the survivors fought back to reform the prison and improve the inmates' living conditions. The memoirs many survivors wrote enshrined their story in revolutionary

mythology, and acted as an indictment of the Tsarist autocracy's loss of moral authority. Writing Resistance features three of these memoirs, all translated into English for the first time. They show the process of transforming the regime as a collaborative endeavour that resulted in flourishing allotments, workshops and intellectual culture - and in the inmates running many of the prison's everyday functions. Sarah J. Young's introductory essay analyses the Shlissel'burg memoirs' construction of a collective narrative of resilience, resistance and renewal. It uses distant reading techniques to explore the communal values they inscribe, their adoption of a powerful group identity, and emphasis on overcoming the physical and psychological barriers of the prison. The first extended study of Shlissel'burg's revolutionary inmates in English, Writing Resistance uncovers an episode in the history of political imprisonment that bears comparison with the inmates of Robben Island in South Africa's apartheid regime and the Maze Prison in

Belfast during the Troubles. It will be of interest to scholars and students of the Russian revolution, carceral history, penal practice and behaviours, and prison and life writing. The Story of Holy Apostles College and Seminary is a yearbook of over sixty years of a Catholic seminary and college located in picturesque Cromwell, Connecticut. Dr. Toolin-Wilson and Prof. Hubbard begin with a brief overview of the first years of Holy Apostles, including its founder, Fr. Eusebe Menard, OFM. They next use words and pictures to describe the vibrant Holy Apostles community. This community is guided by bishops, rectors, faculty, and staff whose concern

is the development of Catholic ordained, religious, and lay faithful leaders. The authors emphasize the stability of Holy Apostles in its mission of forming Catholic leaders. They document its development from a small school with fewer than ten students to an institution serving a diverse student body composed of many ethnic and national groups globally through its online programs and residentially on its home campus. Among these groups are vocations to the priesthood, candidates to the permanent diaconate, religious sisters and brothers, and the laity. *Humanitarian Military Intervention* Haynes Manuals

Things have never been easy for Oscar. A ghetto nerd living with his Dominican family in New Jersey, he's sweet but disastrously overweight. He dreams of becoming the next J.R.R. Tolkien and he keeps falling hopelessly in love. Poor Oscar may never get what he wants, thanks to the Fukú - the curse that has haunted his family for generations. With dazzling energy and insight Díaz immerses us in the tumultuous lives of Oscar;

his runaway sister Lola; their beautiful mother Belicia; and in the family's uproarious journey from the Dominican Republic to the US and back.

Rendered with uncommon warmth and humour, *The Brief Wondrous Life of Oscar Wao* is a literary triumph, that confirms Junot Díaz as one of the most exciting writers of our time.

NEW YORK TIMES BESTSELLER • WINNER OF THE WILLIAM HILL SPORTS BOOK OF THE YEAR AWARD

The Secret Race is the book that rocked the world of professional cycling—and exposed, at long last, the doping culture surrounding the sport and its most iconic rider, Lance Armstrong. Former Olympic gold medalist Tyler Hamilton was once one of the world's top-ranked

cyclists—and a member of Lance Armstrong's inner circle. Over the course of two years, New York Times bestselling author Daniel Coyle conducted more than two hundred hours of interviews with Hamilton and spoke with numerous teammates, rivals, and friends. The result is an explosive page-turner of a book that takes us deep inside a shadowy, fascinating, and surreal world of unscrupulous doctors, anything-goes team directors, and athletes so relentlessly driven to win that they would do almost anything to gain an edge. For the first time, Hamilton recounts his own battle with depression and tells the story of his complicated relationship with Lance Armstrong. This edition features a new Afterword, in which the authors reflect on the developments within the sport, and involving Armstrong, over the past year. The Secret Race is a courageous, groundbreaking act of witness from a man who is as determined to reveal the hard truth about his sport as he once was to win the Tour de France. With a new Afterword by the authors. "Loaded with bombshells and revelations."—VeloNews

Traditional separation of powers theories assumed that governmental despotism will be prevented by dividing the branches of government which will check one another. Modern governments function with unexpected complicity among these branches. Sometimes one of the branches becomes overwhelming. Other governmental structures, however, tend to mitigate these tendencies to domination. Among other structures courts have achieved considerable autonomy vis-à-vis the traditional political branches of power. They tend to maintain considerable distance

from political parties in the name of professionalism and expertise. The conditions and criteria of independence are not clear, and even less clear are the conditions of institutional integrity. Independence (including depolitization) of public institutions is of particular practical relevance in the post-Communist countries where political partisanship penetrated institutions under the single party system. Institutional integrity, particularly in the context of administration of justice, became a precondition for accession to the European Union. Given this practical challenge the present volume is centered around three key areas of institutional integrity, primarily within the administration of justice: First, in a broader theoretical-interdisciplinary context the criteria of institutional independence are discussed. The second major issue is the relation of neutralized institutions to branches of government with reference to accountability. Thirdly, comparative experience regarding judicial independence is

discussed to determine techniques to enhance integrity.

Rand Corporation  
Set in the heart of Tuscan wine country, Camilla Trinchieri's new mystery introduces Nico Doyle, a former NYPD homicide detective who's just looking for space to grieve when he finds himself pulled into a local murder investigation. Mourning the loss of his wife, Rita, former NYPD homicide detective Nico Doyle moves to her hometown of Gravigna in the winesoaked region of Chianti. Half Italian and half Irish, Nico finds himself able to get by in the region with the help of Rita's relatives, but he still feels alone and out of place. He isn't sure if it's peace he's seeking, but it isn't what he finds. Early one morning, he hears a gunshot and a dog's cries near his new home and walks out to discover a dead body in the woods, flashily dressed in gold tennis shoes. When the police arrive, Nico hastily adopts the fluffy white dog as his own and wants nothing more to do with the murder. But Salvatore Perillo, the local maresciallo, discovers Nico's professional

background and enlists him to help with the case. It turns out more than one person in this idyllic corner of Italy knew the victim, and with a very small pool of suspects, including his own in-laws, Nico must dig up Gravigna's every last painful secret to get to the truth.

This publication examines the opportunities and challenges, for business and government, associated with technologies bringing about the "next production revolution". These include a variety of digital technologies (e.g. the Internet of Things and advanced robotics), industrial biotechnology, 3D printing, new materials and nanotechnology. Some of these technologies are already used in production, while others will be available in the near future. All are developing rapidly. As these technologies transform the production and the distribution of goods and services, they will have far-reaching consequences for productivity, skills, income distribution, well-being and the environment. The more that governments and

firms understand how production could develop in the near future, the better placed they will be to address the risks and reap the benefits.
