CONOR BRAUN

Indonesian Geographical Expedition, Bali, 2007 Doubleday Books

Following the Korean War, Air Force veteran Carl Wolf longs to replace the tortured memories of his fighter-pilot past with a quiet life dedicated to marine science. But despite the tranquility of his surroundings, his past always keeps him at arm's length from the emotional connections he so deeply desires. Then, a chance encounter on a scientific expedition to the island of Cozumel changes everything. A newfound soul mate reveals a startling coincidence relating to one of his most traumatic episodes from the war, and Carl gets a glimpse of the future he'd always hoped for. Then, just as quickly, he loses contact with her. In the interim, he finds companionship with a beautiful colleague. The dueling relationship compounds his struggles to come to grips with life, love, and his nagging torturous past. And beyond its beauty, this lovingly crafted period piece is a compelling reminder that the pain of hard choices can often be tempered by nature's miracles...like the green flash itself.

John Devoy's Catalpa Expedition CHANGDER OUTLINE

APOLOGUE A young painter, indulging a vein of pleasantry, sketched a kind of conversation piece, representing a bear, an owl, a monkey, and an ass; and to render it more striking, humorous, and moral, distinguished every figure by some emblem of human life. Bruin was exhibited in the garb and attitude of an old, toothless, drunken soldier; the owl perched upon the handle of a coffee-pot, with spectacle on nose, seemed to contemplate a newspaper; and the ass, ornamented with a huge tie-wig (which, however, could not conceal his long ears), sat for his picture to the monkey, who appeared with the implements of painting. This whimsical group afforded some mirth, and met with general approbation, until some mischievous wag hinted that the whole—was a lampoon upon the friends of the performer; an insinuation which was no sooner circulated than those very people who applauded it before began to be alarmed, and even to fancy themselves signified by the several figures of the piece. Among others, a worthy personage in years, who had served in the army with reputation, being incensed at the Supposed outrage, repaired to the lodging of the painter, and finding him at home, "Hark ye, Mr. Monkey," said he, "I have a good mind to convince you, that though the bear has lost his teeth, he retains his paws, and that he is not so drunk but he can perceive your impertinence." "Sblood! sir, that toothless jaw is a d—ned scandalous libel—but don't you imagine me so chopfallen as not to be able to chew the cud of resentment." Here he was interrupted by the arrival of a learned physician, who, advancing to the culprit with fury in his aspect, exclaimed, "Suppose the augmentation of the ass's ears should prove the diminution of the baboon's—nay, seek not to prevaricate, for, by the beard of Aesculapius! there is not one hair in this periwig that will not stand up in judgment to convict thee of personal abuse. Do but observe, captain, how this pitiful little fellow has copied the very curls—the colour, indeed, is different, but then the form and foretop are quite similar." While he thus remonstrated in a strain of vociferation, a venerable senator entered, and waddling up to the delinquent, "Jackanapes!" cried he, "I will now let thee see I can read something else than a newspaper, and that without the help of spectacles: here is your own note of hand, sirrah, for money, which if I had not advanced, you yourself would have resembled an owl, in not daring to show your face by day, you ungrateful slanderous knave!"

This is an outstanding treatise on one of America's most widely hunted and most important big-game animals. Although thousands of sportsmen take to the field each year in quest of trophies, the perpetuation of elk hunting in America depends entirely upon proper management of the herds. Whether management succeeds or fails in future years will depend upon how well the public understands the problems of the game administrators and of the animals themselves. Everything the sportsman or naturalist would wish to know about the elk is included in this new volume. Habits, food preferences, seasonal movements, anatomy, antler development, and management problems are interestingly and thoroughly discussed. Written by one of America's greatest field naturalists, this new book has behind it a lifetime spent in intimate study of the subject. Dr. Murie is recognized as the world's foremost authority on the American elk and his comprehensive research on elk in the Jackson Hole National Monument forms the basis for this book. Everyone interested in America's wildlife will want this volume in his library. The book is copiously illustrated with half-tone and original line drawings by the author.

The book is the product of a private Canadian expedition to China in 1992. Its members sought to gauge the potential cultural destruction of the daunting and controversial Three Gorges Dam project, which was actively supported by the Canadian government and by corporate sectors. What cultural losses will accompany the expected economic and political gains? What will China, Canada, and the world community lose? How might we, as Canadians, view the purpose and impact of the project, which is now well under way? Using a government-sponsored assessment of the cultural artifacts destined to be submerged by rising waters behind the dam project, our guides - a publisher (Caroline Walker), a heritage consultant (Robert Shipley), a travel writer (Ruth Lor Malloy), and a scholar (Fu Kailin) - lead us on a sometimes comical and frequently troubling tour of the Yangzi gorges region.
