Reports on a new

generation of Internet  
controls that establish  
a new normative  
terrain in which  
surveillance and  
censorship are routine.  
Internet filtering,  
censorship of Web  
content, and online

surveillance are increasing in scale, scope, and sophistication around the world, in democratic countries as well as in authoritarian states. The first generation of Internet controls consisted largely of building firewalls at key Internet gateways; China's famous "Great Firewall of China" is one of the first national Internet filtering systems. Today the new tools for Internet controls that are emerging go beyond mere denial of information. These new techniques, which aim to normalize (or even legalize) Internet control, include targeted viruses and the strategically timed deployment of distributed denial-of-service (DDoS) attacks,

surveillance at key points of the Internet's infrastructure, take-down notices, stringent terms of usage policies, and national information shaping strategies. Access Controlled reports on this new normative terrain. The book, a project from the OpenNet Initiative (ONI), a collaboration of the Citizen Lab at the University of Toronto's Munk Centre for International Studies, Harvard's Berkman Center for Internet and Society, and the SecDev Group, offers six substantial chapters that analyze Internet control in both Western and Eastern Europe and a section of shorter regional reports and country profiles drawn from material gathered by the ONI around the

world through a combination of technical interrogation and field research methods.

This book is designed to offer a comprehensive high-level introduction to transhumanism, an international political and cultural movement that aims to produce a “paradigm shift” in our ethical and political understanding of human evolution. Transhumanist thinkers want the human species to take the course of evolution into its own hands, using advanced technologies currently under development – such as robotics, artificial intelligence, biotechnology, cognitive neurosciences, and

nanotechnology – to overcome our present physical and mental limitations, improve our intelligence beyond the current maximum achievable level, acquire skills that are currently the preserve of other species, abolish involuntary aging and death, and ultimately achieve a post-human level of existence. The book covers transhumanism from a historical, philosophical, and scientific viewpoint, tracing its cultural roots, discussing the main philosophical, epistemological, and ethical issues, and reviewing the state of the art in scientific research on the topics of most interest to transhumanists. The writing style is clear and accessible for the general reader, but the

book will also appeal to graduate and undergraduate students.

The diet that works faster and forever! SUPER SHRED Using the same principles—meal spacing, snacking, meal replacement and diet confusion—that made his SHRED a major #1 bestseller—Dr. Ian K. Smith has developed what dieters told him they needed: a quick-acting plan that is safe and easy to follow at home, at work, or on the road. SUPER SHRED It's a program with four week-long cycles: --Foundation, when you'll eat four meals and three snacks a day, start

shedding pounds and set yourself up for success --Accelerate, when you'll kick it up and speed up weight loss --Shape, the toughest week in the program, and the one that will get your body back by keeping it guessing --Tenacious, a final sprint that cements your improved eating habits and melts off those last stubborn pounds The SHRED system never leaves you hungry. It's a completely new way to lose weight, stay slender, and feel fantastic about your body, mind and spirit! Includes more than 50 all-new recipes for meal replacing smoothies and soups! **Jurassic Park** City Lights Books Jean Baudrillard's classic text was one of the first to focus on the

process and meaning of consumption in contemporary culture. Originally published in 1970, the book makes a vital contribution to current debates on consumption. The book includes Baudrillard's most organized discussion of mass media culture, the meaning of leisure, and anomie in affluent society. A chapter on the body demonstrates Baudrillard's extraordinary prescience for flagging vital subjects in contemporary culture long before others. This English translation begins with a new introductory essay.

but miserable. A high school math genius, he's secretly fascinated with a series of children's fantasy novels set in a magical land called Fillory, and real life is disappointing by comparison. When Quentin is unexpectedly admitted to an elite, secret college of magic, it looks like his wildest dreams have come true. But his newfound powers lead him down a rabbit hole of hedonism and disillusionment, and ultimately to the dark secret behind the story of Fillory. The land of his childhood fantasies turns out to be much darker and more dangerous than he ever could have imagined. . . . The prequel to the New York Times bestselling

book *The Magician King* and the #1 bestseller *The Magician's Land*, *The Magicians* is one of the most daring and inventive works of literary fantasy in years. No one who has escaped into the worlds of Narnia and Harry Potter should miss this breathtaking return to the landscape of the imagination. [Innovation and Entrepreneurship](#) McGraw-Hill/Irwin "Yemen is the dark horse of the Middle East. Every so often it enters the headlines for one alarming reason or another -- links with al-Qaeda, kidnapped Westerners, explosive population growth -- then sinks into obscurity again. But, as Victoria Clark argues in this riveting book, we ignore Yemen

at our peril. The poorest state in the Arab world, it is still dominated by its tribal makeup and has become a perfect breeding ground for insurgent and terrorist movements. Clark returns to the country where she was born to discover a perilously fragile state that deserves more of our understanding and attention. On a series of visits to Yemen between 2004 and 2009, she meets politicians, influential tribesmen, oil workers and jihadists as well as ordinary Yemenis. Untangling Yemen's history before examining the country's role in both al-Qaeda and the wider jihadist movement today, Clark presents a lively, clear, and up-to-date account of a little-

known state whose chronic instability is increasingly engaging the general reader"-- Publisher description.

The mega-bestseller with more than 2 million readers, soon to be a major television series From the #1 New York Times- bestselling author of The Lincoln Highway and Rules of Civility, a beautifully transporting novel about a man who

is ordered to spend the rest of his life inside a luxury hotel. In 1922, Count Alexander Rostov is deemed an unrepentant aristocrat by a Bolshevik tribunal, and is sentenced to house arrest in the Metropol, a grand hotel across the street from the Kremlin. Rostov, an indomitable man of erudition and wit, has never worked a day in his life, and must now live in an attic room while some of the most tumultuous decades in Russian history are unfolding outside the hotel's doors. Unexpectedly, his reduced circumstances provide him entry into a much larger world of emotional discovery. Brimming with humor, a glittering cast of characters, and one beautifully rendered scene after another,

this singular novel casts a spell as it relates the count's endeavor to gain a deeper understanding of what it means to be a man of purpose. A Novel Simon and Schuster Acclaimed as one of the most exciting books in the history of American letters, this modern epic became an instant bestseller upon publication in 1974, transforming a generation and continuing to inspire millions. This 25th Anniversary Quill Edition features a new introduction by the author; important typographical changes; and a Reader's Guide that includes discussion topics, an interview with the author, and letters and documents detailing how this extraordinary

book came to be. A narration of a summer motorcycle trip undertaken by a father and his son, the book becomes a personal and philosophical odyssey into fundamental questions of how to live. The narrator's relationship with his son leads to a powerful self-reckoning; the craft of motorcycle maintenance leads to an austere beautiful process for reconciling science, religion, and humanism. Resonant with the confusions of existence, Zen and the Art of Motorcycle Maintenance is a touching and transcendent book of life.

"Bruce Schneier's amazing book is the

best overview of privacy and security ever written."—Clay Shirky "Bruce Schneier's amazing book is the best overview of privacy and security ever written."—Clay Shirky Your cell phone provider tracks your location and knows who's with you. Your online and in-store purchasing patterns are recorded, and reveal if you're unemployed, sick, or pregnant. Your e-mails and texts expose your intimate and casual friends. Google knows what you're thinking because it saves your private searches. Facebook can determine your sexual orientation without you ever mentioning it. The powers that surveil us do more than simply store this information.

Corporations use surveillance to manipulate not only the news articles and advertisements we each see, but also the prices we're offered. Governments use surveillance to discriminate, censor, chill free speech, and put people in danger worldwide. And both sides share this information with each other or, even worse, lose it to cybercriminals in huge data breaches. Much of this is voluntary: we cooperate with corporate surveillance because it promises us convenience, and we submit to government surveillance because it promises us protection. The result is a mass surveillance society of our own making. But have we given up more than we've gained? In

Data and Goliath, security expert Bruce Schneier offers another path, one that values both security and privacy. He brings his bestseller up-to-date with a new preface covering the latest developments, and then shows us exactly what we can do to reform government surveillance programs, shake up surveillance-based business models, and protect our individual privacy. You'll never look at your phone, your computer, your credit cards, or even your car in the same way again. *All the Light We Cannot See* Super Shred: The Big Results Diet 4 Weeks, 20 Pounds, Lose It Faster! With the rise of web 2.0 and social media platforms taking over vast tracts of territory

on the internet, the media landscape has shifted drastically in the past 20 years, transforming previously stable relationships between media creators and consumers. The Social Media Reader is the first collection to address the collective transformation with pieces on social media, peer production, copyright politics, and other aspects of contemporary internet culture from all the major thinkers in the field. Culling a broad range and incorporating different styles of scholarship from foundational pieces and published articles to unpublished pieces, journalistic accounts, personal narratives from blogs, and whitepapers, The Social Media Reader

promises to be an essential text, with contributions from Lawrence Lessig, Henry Jenkins, Clay Shirky, Tim O'Reilly, Chris Anderson, Yochai Benkler, danah boyd, and Fred von Loehmann, to name a few. It covers a wide-ranging topical terrain, much like the internet itself, with particular emphasis on collaboration and sharing, the politics of social media and social networking, Free Culture and copyright politics, and labor and ownership. Theorizing new models of collaboration, identity, commerce, copyright, ownership, and labor, these essays outline possibilities for cultural democracy that arise when the formerly passive audience becomes active

cultural creators, while warning of the dystopian potential of new forms of surveillance and control.

From the first slave writings to contemporary hip hop, the canon of African American literature offers a powerful counter-narrative to dominant notions of American culture, history, and politics. Resonant with voices of prophecy and resistance, the African American literary tradition runs deep with emancipatory currents that have had an indelible impact on the United States and the world. Mumia Abu-Jamal has been one of our most important contributors to this

canon for decades, writing from the confines of the US prison system to give voice to those most silenced by chronic racism, impoverishment, and injustice. Writing on the Wall is a selection of one hundred previously unpublished essays that crystalize Mumia Abu-Jamal's essential perspectives on community, politics, power, social change, and US history. From discussions of Rosa Parks and Trayvon Martin to John Walker Lindh and Edward Snowden, Abu-Jamal articulates lucid, humorous, and often prescient insight into the past, present, and future of American politics and society. Written as radio commentaries from his prison cell in Death

Row, where he was held in solitary confinement for close to thirty years, Mumia's revolutionary perspective brims with hope, encouragement, and profound faith in the possibility of social change and redemption. MUMIA ABU-JAMAL is an award-winning journalist and author of two best-selling books, Live From Death Row and Death Blossoms, which address prison life from a critical and spiritual perspective. In 1981 he was elected president of the Association of Black Journalists (Philadelphia chapter). That same year he was arrested for allegedly killing a white police officer in Philadelphia. He was convicted and sentenced to death in 1982, in a process that

has been described as an epic miscarriage of justice. After spending more than 28 years on death row, in 2011 his death sentence was vacated when the Supreme Court allowed to stand the decisions of four federal judges who had earlier declared his death sentence unconstitutional. He is now serving a life sentence without the possibility of parole. In spite of his three-decade-long imprisonment, most of which was spent in solitary confinement on Death Row, Abu-Jamal has relentlessly fought for his freedom and for his profession. From prison he has written seven books and thousands of radio commentaries. He holds a BA from Goddard College and

an MA from California State University, Dominguez Hills. His books have sold more than 100,000 copies and have been translated into seven languages. JOHANNA FERNÁNDEZ is a former Fulbright Scholar to Jordan and Assistant Professor of History at Baruch College of the City University of New York where she teaches 20th Century US history and African American History. She is author of the forthcoming *When the World Was Their Stage: A History of the Young Lords Party, 1968-1976* (Princeton University Press). Fernandez is the writer and producer of the film, *Justice on Trial: the Case of Mumia Abu-Jamal* and she is featured in the

critically acclaimed documentary about Mumia Abu-Jamal, Long Distance Revolutionary. Her writings have been published internationally, from Al Jazeera to the Huffington Post. She gives interviews often and has appeared in a diverse range of print, radio, online and televised media including Democracy Now! with Amy Goodman, the Fox News shows Hannity and Megyn Kelley, Al Jazeera and The New York Times. She is a coordinator of the Campaign to Bring Mumia Home. CORNEL WEST is a scholar, philosopher, activist and author of over a dozen books including his bestseller, Race Matters. He appears frequently in the

media, and has appeared on the Bill Maher Show, Colbert Report, CNN and C-Span as well as on Tavis Smiley's PBS TV Show.

With a New Chapter and Updated Epilogue on Coronavirus A Financial Times Best Health Book of 2019 and a New York Times Book Review Editors' Choice "Honigsbaum does a superb job covering a century's worth of pandemics and the fears they invariably unleash."

—Howard Markel, MD, PhD, director of the Center for the History of Medicine, University of Michigan How can we understand the COVID-19 pandemic? Ever since the 1918

Spanish influenza pandemic, scientists have dreamed of preventing such catastrophic outbreaks of infectious disease. Yet despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. In *The Pandemic Century*, a lively account of scares both infamous and less known, medical historian Mark Honigsbaum combines reportage with the history of science and medical sociology to artfully reconstruct epidemiological mysteries and the ecology of infectious diseases. We meet dedicated disease detectives, obstructive or incompetent public health officials, and

brilliant scientists often blinded by their own knowledge of bacteria and viruses—and see how fear of disease often exacerbates racial, religious, and ethnic tensions. Now updated with a new chapter and epilogue. *History, Philosophy and Current Status* Vault Reports Incorporated What is fascism? By focusing on the concrete: what the fascists did, rather than what they said, the esteemed historian Robert O. Paxton answers this question. From the first violent uniformed bands beating up “enemies of the state,” through Mussolini’s rise to power, to Germany’s fascist radicalization in World War II, Paxton shows clearly why fascists came to power in some countries and

not others, and explores whether fascism could exist outside the early-twentieth-century European setting in which it emerged. "A deeply intelligent and very readable book. . . . Historical analysis at its best." -The Economist

The Anatomy of Fascism will have a lasting impact on our understanding of modern European history, just as Paxton's classic Vichy France redefined our

vision of World War II. Based on a lifetime of research, this compelling and important book transforms our knowledge of fascism—"the major political innovation of the twentieth century, and the source of much of its pain."
