second- and third-year students at universities and universities of technology, as well as those following MBA courses in accounting and finance. The book covers undergraduate-appropriate topics from the management accounting syllabus of the South African Institute of Chartered Accountants (SAICA). In doing so, most aspects of the relevant papers' syllabi of the Chartered

Institute of Management Accountants (CIMA), as well as those of the Association of Chartered Certified Accountants (ACCA) are dealt with too. The contributors are from a range of South African tertiary institutions ensuring that the book is representative of the way management accounting is taught in this country and taking cognizance of the areas in which students have

difficulty. **Essentials of Cost Accounting for Health Care Organizations** S. Chand Publishing Current evidence points to management accountants using traditional software (such as spreadsheets) for budgeting, ABC, balanced scorecards and other performance management techniques independent of, rather than integrated with Enterprise Resource

Planning (ERP) Systems. While there has been some limited research on the effects of ERP systems on management accountants, this report provides a comprehensive analysis of the consequences of implementation of ERP systems for management accountants. • This report provides a theoretical basis for studying the impact of Enterprise Resource Planning (ERP) systems on management accounting and provides critical insights into the opportunities provided by ERP systems for the most efficient use of management accounting techniques. • The seven UK case studies of ERP implementations reveal the correlation between the success of the system implementation and the development of the role of management accountants in business partners thereby identifying the changes and skills required of management accountants. • The book provides guidance to management accountants on the changes they need to make in order to achieve the most from an ERP system implementation.

This textbook presents concepts and applications of Management Accounting, one of the main approaches used by management to support future organisational performance. It covers methods and instruments of management and cost accounting,

cost management, and management control and is based on the

German textbook "Interne Unternehmensrechnung" by Ralf Ewert and Alfred Wagenhofer (Springer). The authors describe the managerial uses of accounting information, both for decision-making and decision-influencing, and provide a broad perspective on the subject combining the academic

foundations of the field with recent cutting-edge research results.

Moreover, traditions of German accounting theory and practice that are little known outside of the German-speaking countries are reflected in the book. With its unique approach based on information economics, the textbook offers a comprehensive and innovative presentation to a global audience.

This book analyzes the impact of digitization on management accounting in five

manufacturing companies. It is one of the first in-depth empirical studies on the intersection of management accounting and digitization. The study suggests that there are two archetypes of digitization of the management accounting function. The first archetype emphasizes top-down-driven changes that aim to enhance efficiency, such as conducting tasks with a higher degree

of automation in a leaner structure with fewer resources. The second archetype is strongly driven and initiated by employees in the management accounting function (bottom-up). The focus is on improving the use of data by applying innovative analytics methods, integrating additional sources of data, and benefiting from new technologies like artificial

intelligence. The results of the study also indicate that digitization of the management accounting function is mostly in line with the overall company strategy. *Managerial Accounting for Undergraduates* Prentice Hall "Filled with crystal-clear examples, the book helps you understand: balance sheets and income/cash flow statements; annual reports; fixed-
