This volume offers a practical, accessible and thought-provoking guide to this Roman tragedy, surveying its major themes and critical reception. It also provides a detailed and up-to-date history of the play's performance, beginning with its earliest known staging in 1599, including an analysis of the 2013 film *Caesar Must Die* starring Italian inmates, and an assessment of why the play is now coming back into vogue on stage. Moving through to four new critical essays, it opens up cutting-edge perspectives on the work, and finishes with a guide to pedagogical approaches by the experienced teacher and leading academic Jeremy Lopez. Detailing web-based and production-related resources, and including an annotated bibliography of critical works, the guide will equip teachers and facilitate students' understanding of this challenging play.

This book tells a compelling story about love, friendship, and the Divine that took over a thousand years to unfold. It argues that mind and feeling are intrinsically connected in the thought of Plato, Aristotle, and Plotinus; that Aristotle developed his theology and physics primarily from Plato's Symposium (from the "Greater" and "Lesser Mysteries" of Diotima-Socrates' speech); and that the Beautiful and the Good are not coincident classes, but irreducible Forms, and the loving ascent of the Symposium must be interpreted in the light of the Republic, as the later tradition up to Ficino saw. Against the view that Platonism is an escape from the ambiguities of ordinary experience or opposed to loving individuals for their own sakes, this book argues that Plato dramatizes the ambiguities of ordinary experience, confronts the possibility of failure, and bequeaths erotic models for the loving of individuals to later thought. Finally, it examines the Platonic-Aristotelian heritage on the Divine to discover whether God can love us back, and situates the dramatic development of this legacy in Plotinus, Iamblichus, Proclus, and Dionysius the Areopagite.

Traumatic events happen in every age, yet there is a particularly cataclysmic feeling to our own epoch that is so attractive to some and so terrifying to others. The terrible events of September 11th 2001 still resonate and the repercussions continue to this day: the desperation of immigrants fleeing terror, the uncertainty of Brexit, Donald Trump in the White House, the rise of the alt-right and hard left, increasing fundamentalism, and terror groups intent on causing destruction to the Western way of life. If that were not enough, we also have to grapple with the enormity of climate change and the charge that if we do not act now, it will be too late. Is it any wonder many are left overwhelmed by the events they see on the news? Galvanised by the events outside of his consulting room, in 2015, David Morgan began The Political Mind seminars at the British Psychoanalytical Society and their successful run continues today. A series of superlative seminars, mostly presented by colleagues

from the British Society plus a few select external experts, that examine a dazzling array of relevant topics to provide a psychoanalytic understanding of just what is going on in our world. This book is the first in The Political Mind series to bring these seminars to a wider audience. The Unconscious in Political and Social Life contains compelling contributions from Christopher Bollas, Michael Rustin, Jonathan Sklar, David Bell, Philip Stokoe, Roger Kennedy, David Morgan, M. Fakhry Davids, Ruth McCall, R. D. Hinshelwood, Renée Danziger, Josh Cohen, Sally Weintrobe, and Margot Waddell. They investigate so many vital issues affecting us today: the evolution of democracy, right-wing populism, prejudice, the rise of the far right, attitudes to refugees and migrants, neoliberalism, fundamentalism, terrorism, the Palestine-Israel situation, political change, feminism, austerity in the UK, financial globalisation, and climate change. This book needs to be read by all who are concerned by the state of the world today. Psychoanalysis and psychoanalysts with their awareness of what motivates human beings bring clarity and fresh insight to these matters. A deeper understanding of humanity awaits the reader of The Unconscious in Political and Social Life.

This "captivating biography" of the great Roman general "puts Caesar's war exploits on full display, along with his literary genius" and more (The New York Times) Tracing the extraordinary trajectory of the Julius Caesar's life, Adrian Goldsworthy not only chronicles his accomplishments as charismatic orator, conquering general, and powerful dictator but also lesser-known chapters during which he was high priest of an exotic cult and captive of pirates, and rebel condemned by his own country. Goldsworthy also reveals much about Caesar's intimate life, as husband and father, and as seducer not only of Cleopatra but also of the wives of his two main political rivals. This landmark biography examines Caesar in all of these roles and places its subject firmly within the context of Roman society in the first century B.C. Goldsworthy realizes the full complexity of Caesar's character and shows why his political and military leadership continues to resonate thousands of years later.

Since about 1960, when five-act division in Shakespeare's plays was strongly disputed, most critics have focused on individual scenes rather than holistic form. This book argues for Shakespeare's use of five acts, arranged in three cycles to form a 2-1-2 pattern. It also examines the role of multiple plots and centers of consciousness, especially in the festive comedies and romances. Additionally, it traces Shakespeare's gradual mastery of the art of epiphany, compares it to Spenser's complementary focus on transcendent reality, and traces in Macbeth the dark mode of Shakespeare's dramaturgical pattern.

From the bestselling author of SPQR: A History of Ancient Rome, the fascinating story of how images of Roman autocrats have influenced art, culture, and the representation of power for more than 2,000 years. What does the face of power look like? Who gets commemorated in art and why? And how do we react to statues of politicians we deplore? In this book—against a background of today's

“sculpture wars”—Mary Beard tells the story of how for more than two millennia portraits of the rich, powerful, and famous in the western world have been shaped by the image of Roman emperors, especially the “Twelve Caesars,” from the ruthless Julius Caesar to the fly-torturing Domitian. Twelve Caesars asks why these murderous autocrats have loomed so large in art from antiquity and the Renaissance to today, when hapless leaders are still caricatured as Neros fiddling while Rome burns. Beginning with the importance of imperial portraits in Roman politics, this richly illustrated book offers a tour through 2,000 years of art and cultural history, presenting a fresh look at works by artists from Memling and Mantegna to the nineteenth-century American sculptor Edmonia Lewis, as well as by generations of weavers, cabinetmakers, silversmiths, printers, and ceramicists. Rather than a story of a simple repetition of stable, blandly conservative images of imperial men and women, Twelve Caesars is an unexpected tale of changing identities, clueless or deliberate misidentifications, fakes, and often ambivalent representations of authority. From Beard's reconstruction of Titian's extraordinary lost Room of the Emperors to her reinterpretation of Henry VIII's famous Caesarian tapestries, Twelve Caesars includes fascinating detective work and offers a gripping story of some of the most challenging and disturbing portraits of power ever created. After defeating enemies in battle, Roman citizens celebrate in the streets as Julius Caesar and his entourage make their way through the city. As Caesar passes a soothsayer, he receives an ominous warning: “Beware the ides of March,” which he immediately disregards. Meanwhile, some of his closest followers are convinced their leader has become too powerful and plot his removal. Plutarch's Lives of the Noble Grecians and Romans was Shakespeare's primary source for Julius Caesar. This Standard Ebooks edition is based on William George Clark and William Aldis Wright's 1887 Victoria edition, which is taken from the Globe edition. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Prolegomena to the Study of Greek Religion Everbind

This book argues that while the historiography of the development of scientific ideas has for some time acknowledged the important influences of socio-cultural and material contexts, the significant impact of traumatic events, life threatening illnesses and other psychotropic stimuli on the development of scientific thought may not have been fully recognised. Howard Carlton examines the available primary sources which provide insight into the lives of a number of nineteenth-century astronomers, theologians and physicists to study the complex interactions within their 'biocultural' brain-body systems which drove parallel changes of perspective in theology, metaphysics, and cosmology. In doing so, he also explores three topics of great scientific interest during this period: the question of the possible existence of life on other planets; the deployment of the nebular hypothesis as a theory of cosmogony; and the religiously charged debates about the ages of the earth and sun. From this body of evidence we gain a greater understanding of the underlying phenomena which actuated intellectual developments in the past and which are still relevant to today's knowledge-making processes.

This volume contains a selection of papers which have been revised and extended for publication from two working groups held at conferences at Galway (1992) and Göteborg (1993) which celebrated the quincentenary of Columbus' discovery of America in 1492. The pre-Columbian period of language contact is covered by articles on Old Norse in the Faroes, Scotland and Ireland, the Shetland dialect and Norn, and placenames in Iceland and Greenland. The articles on the post-Columbian period are wide-ranging and cover, in the Scandinavian context, the Scandinavian emigration, American Swedish, American Finnish, Swedish-Spanish and various aspects of Norwegian in America and also in Spitzbergen; in the British colonial context, English dialects in New England, Scottish Gaelic in Nova Scotia and Scots in North America (Maryland, the Appalachians and Virginia); in the context of the later continental mass emigration, American Dutch, Texas German, Croatian and Italian. Two papers deal with reverse emigration, that of Sicilian and Calabrian dialects, and the special case of Krio in Sierra Leone.
