TOWNSEND TATE

The Making of Anwar Ibrahim's "Humane Economy" International Monetary Fund
 The SME Policy Index is a benchmarking tool for emerging economies to monitor and evaluate progress in policies that support small and medium-sized enterprises. The ASEAN SME Policy Index 2018 is a joint effort between the Economic Research Institute for ASEAN and East-Asia (ERIA), the Organisation for Economic Co-operation and Development (OECD) and the ASEAN Coordinating Committee on Micro, Small and Medium Enterprises (ACCMSME). The report is the outcome of work conducted by the ten ASEAN Member States (Brunei Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia, Myanmar, the Philippines, Singapore, Thailand and Viet Nam). Divided into eight policy dimensions, it builds on the previous edition of the ASEAN SME Policy Index 2014. The current edition presents an updated methodology which makes this document a powerful tool to assess the strengths and weaknesses that exist in policy design, implementation, and monitoring and evaluation for SMEs, and allows for a benchmarking of the level to which the ASEAN Strategic Action Plan for SME Development (SAP SMED) 2016-2025 has been implemented. Its objective is to

enhance the capacity of policy makers to identify policy areas for future reform, as well as implement reforms in accordance with international good practices. The report provides a regional perspective on recent developments in SME-related policies in Southeast Asia as well as in individual ASEAN Member States. Based on this analysis the report provides a menu of concrete policy options for the region and for the individual countries.

SME Policy Index: ASEAN 2018 World Scientific

Fiscal Responsibility Laws (FRLs) appear to be more popular in middle-income countries than advanced countries, even though their success is limited. The reasons why few advanced countries have a FRL include: the existing legal framework for the budget system is adequate; supranational rules and political agreements in EU countries; failed attempts to include quantitative fiscal rules in laws; lack of consensus or interest in attaining the goals of FRL-type legislation; and lack of need for a law to regulate fiscal transparency, accountability and macro-fiscal stabilization. Without commitment to fiscal discipline, adoption of a FRL may not contribute to attaining fiscal consolidation goals.

Public Sector Debt Statistics McGraw-Hill Education (UK)

At this juncture in the history and development of education in the digital age, constituents of education systems across the globe are challenged with revising or rediscovering the purpose of educational institutions within societies. Institutions need to retool to include digital games-based and problem-based learning, and education itself must adapt to serve the needs of a diverse student population. Stagnancy Issues and Change Initiatives for Global Education in the Digital Age is a cutting-edge research publication that explores the complex discourse of trends, shifts, and changes happening in the field of education and to understand the implications for teaching,

learning, and professional development. The book helps educators understand how to make their pedagogy and andragogy relevant in the framework of constant technological shifts and changes in order to help students thrive in a global economy. Featuring a wide range of topics such as gamification, pedagogy, and intercultural learning, this book is ideal for curriculum designers, academicians, education professionals, researchers, policymakers, and students.

EBOOK: Reconceptualising Evaluation in Higher Education: The Practice Turn The University of Malaya Press

This volume focuses on the role of the private sector in diversifying the economics of Gulf countries in the post-petrodollar era, when fluctuating and declining oil prices are negatively impacting national expenditures. It explores current policies of countries in the Gulf Cooperation Council and their efforts to shift their economies away from heavy dependence on hydrocarbons. The structural changes will create favorable conditions for the private sector to flourish, shift production dependence from public to private sector, and allow for more efficient resource allocation. Such changes will also allow local banks to provide financial support to small and medium enterprises, boost entrepreneurship for job creation, and strengthen organizational structure and efficiency. This is the first volume in Economic Diversification in the Gulf Region.

ISLAMIC EDUCATION IN MALAYSIA. International Monetary Fund

The problem in many developing countries is that governments lack either the financial resources or the political will to meet their citizens' educational needs. In response, poor parents in some low income countries have organized and paid for their children's education themselves. It is true that school fees and other user payments are a heavy burden for some parents to bear. But, given the alternative - children receiving no education at all - such payments can represent a temporary, if less than ideal, solution to the problem.--Publisher's description.

Cash Waqf Univ of California Press

This book constitutes the refereed proceedings of the 5th International Conference on Soft Computing in Data Science, SCDS 2019, held in Iizuka, Japan, in August 2019. The 30 revised full papers presented were carefully reviewed and selected from 75 submissions. The papers are organized in topical sections on information and customer analytics; visual data science; machine and deep learning; big data analytics; computational and artificial intelligence; social network and media analytics.

Towards a Dynamic and Sustainable Economy Longman Publishing Group

"Giuseppe Di Palma's book could not be more timely, given the snowballing events that are gaining momentum in Eastern and Western Europe. . . . It represents a truly fresh look at the red-hot issue of transitions to democracy."—Joseph LaPalombara, Yale University

Should Advanced Countries Adopt a Fiscal Responsibility Law? IGI Global

This booklet express the theory of financial management which provides framework for investment and financing decision. The booklet aims to build an understanding to the central ideas and theories of modern finance, and will be helpful in financial decision making and present information about the institutions and environment relevant to business finance and corporate finance. As we are aware that financial management is an essential part of the economic and non-economic activities which leads to decide the efficient procurement and utilization of finance with profitable manner. Financial management also developed as a business finance and corporate finance. This booklet seeks to discuss the theory of finance which provides framework for investment and financing decision, also to build understanding the central ideas and theories of modern finance, and helpful in financial decision making and present information about the institutions and environment relevant to corporate finance.

E.E.C. Thuraisingham: a Malaysian patriot (UM Press) Marshall Cavendish International (Asia) Pte Limited

Who really creates wealth in our world? And how do we decide the value of what they do? At the

heart of today's financial and economic crisis is a problem hiding in plain sight. In modern capitalism, value-extraction - the siphoning off of profits, from shareholders' dividends to bankers' bonuses - is rewarded more highly than value-creation: the productive process that drives a healthy economy and society. We misidentify takers as makers, and have lost sight of what value really means. Once a central plank of economic thought, this concept of value - what it is, why it matters to us - is simply no longer discussed. Yet, argues Mariana Mazzucato in this penetrating and passionate new book, if we are to reform capitalism - to radically transform an increasingly sick system rather than continue feeding it - we urgently need to rethink where wealth comes from. Who is creating it, who is extracting it, and who is destroying it? Answers to these questions are key if we want to replace the current parasitic system with a type of capitalism that is more sustainable, more symbiotic: that works for us all. The Value of Everything will reignite a long-needed debate about the kind of world we really want to live in.

Malaysia's Trade Governance at a Crossroads Springer Nature

Strengthening fiscal frameworks, in particular fiscal rules, has emerged as a key response to the fiscal legacy of the crisis. This paper takes stock of fiscal rules in use around the world, compiles a dataset - covering national and supranational fiscal rules, in 81 countries from 1985 to end-March 2012 - and presents details about the rules' key design elements, particularly in support of enforcement. This information is summarized in a set of fiscal rules indices. Three key findings emerge: (i) many new fiscal rules have been adopted and existing ones strengthened in response to the crisis; (ii) the number of fiscal rules and the comprehensiveness of the design features in emerging economies has caught up to those in advanced economies; and (iii) the "next-generation" fiscal rules are increasingly complex as they combine the objectives of sustainability and with the need for flexibility in response to shocks, thereby creating new challenges for implementation, communication, and monitoring.

Women in the Changing World of Work Rudra Publications

This Manual deals with concepts, definitions, and procedures for the compilation of statistics on government finance. It is intended as a reference tool for those who are called upon to prepare or evaluate such statistics. Focusing on financial transactions such as taxing, borrowing, spending, and lending, the Manual emphasizes the summarization and organization of statistics appropriate for analysis, planning, and policy determination.

To Craft Democracies Penguin UK

This unique book focuses on the hybridization of grassroots participation in planning, implementing, and developing gender-responsive budgeting. It explores the possibilities for gender sensitive budgeting when implemented using techniques that have been popularized by participatory governance activists. A combination of the two allows for a whole new way of ensuring public budgets are used equitably.

Soft Computing in Data Science Jabatan Penerangan

This book provides an overview of the linguistic situation in Brunei, including a historical overview and a synopsis of the current education system. It investigates pronunciation, particularly the intelligibility of Brunei English and the vowels of Brunei Mandarin, and it also describes the acquisition of Malay grammar, Malay politeness strategies, the use of language online, language in the courts, a comparison of Malay and English newspapers, the language of shop signs, the status of Dusun, and lastly, English literature in Brunei.

Gender Responsive and Participatory Budgeting Springer

Pelaksanaan perancangan ini melihat

kesungguhan Kerajaan Baharu sangat komited dalam membangunkan semula negara dan meningkatkan kesejahteraan kepada rakyat

Economic Report International Monetary Fund

SCMP's reporting team looks back at Hong Kong's most wrenching political crisis since its return to Chinese rule in 1997. Anti-extradition bill protests that morphed rapidly into a wider anti-government movement in 2019 left no aspect of the city untouched, from its social compact to its body politic to its open economy. The demonstrations which continued well into 2020 have tested every institution of the city, from the civil service to the police to the courts and even its rail transport operator, and from offices and businesses to universities and schools, and from churches to families and even friends. This book is for anyone seeking to understand not just what Hong Kong has gone through but also the global phenomenon of increasingly leaderless protest movements. Fueled by profound angst about the place of millennial youth in society, widening income inequality, and the speed of digital communications, Hong Kong was in retrospect ripe to be the laboratory for a new-age protest movement, nearly a decade after the Middle East's Arab spring. The essays in the book collectively compose a picture of a society in trauma, bent and broken, but showing signs of an uncanny ability to bounce back. What shape it will be in a few years from now, however, is much harder to predict. Related Link(s)

The State, Ulama and Islam in Malaysia and Indonesia International Monetary Fund

This book gathers the latest research, innovations, and applications in the field of civil engineering, as presented by leading national and international academics, researchers, engineers, and postgraduate students at the AWAM International Conference on Civil Engineering 2019 (AICCE'19), held in Penang, Malaysia on August 21-22, 2019. The book covers highly diverse topics in the main fields of civil engineering, including structural and earthquake engineering, environmental engineering, geotechnical engineering, highway and transportation engineering, water resources engineering, and geomatic and construction management. In line with the conference theme, "Transforming the Nation for a Sustainable Tomorrow", which relates to the United Nations' 17 Global Goals for Sustainable Development, it highlights important elements in the planning and development stages to establish design standards beneficial to the environment and its surroundings. The contributions introduce numerous exciting ideas that spur novel research directions and foster multidisciplinary collaborations between various specialists in the field of civil engineering.

Companies Act 2016 (Act 777). Springer Nature

This author of this book argues that while generally ulamas, or religious teachers, had to support state ideologies, they sometimes succeeded in capturing the state by influencing policies in their favour.

Financial Management (Theory) Irwin Professional Publishing

The global financial crisis of recent years and the associated large fiscal deficits and debt levels that have impacted many countries underscores the importance of reliable and timely government statistics and, more broadly, public sector debt as a critical element in countries fiscal and external sustainability. Public Sector Debt Statistics is the first international guide of its kind, and its primary objectives are to improve the quality and timeliness of key debt statistics and promote a convergence of recording practices to foster international comparability and as a reference for national compilers and users for compiling and disseminating these data. Like other statistical guides published by the IMF, this one was prepared in consultation with countries and international agencies, including the nine organizations of the Inter-Agency Task Force on Finance Statistics (TFFS). The guide's preparation was based on the broad range of experience of our institutions and benefitted from consultation with national compilers of government finance and public sector debt statistics. The guide's concepts are harmonized with those of the System of National Accounts (2008) and the Balance of Payments and International Investment Position Manual, Sixth Edition.
