The Political Handbook of the World by Tom Lansford provides timely, thorough, and accurate political information, with more in-depth coverage of current political controversies than any other reference guide. The updated 2020-2021 edition will continue to be the most authoritative source for finding complete facts and analysis on each country's governmental and political makeup. Compiling in one place more than 200 entries on countries and territories throughout the world, this volume is renowned for its extensive coverage of all major and minor political parties and groups in each political system. *The Political Handbook of the World 2020-2021* also provides names of key ambassadors and

international memberships of each country, plus detailed profiles of more than 30 intergovernmental organizations and UN agencies. And this update will aim to include coverage of current events, issues, crises, and controversies from the course of the last two years.

Learning Medical Dispassion in Early Modern England Routledge This lucid guide meets the need, so often expressed in the 1990s, for an up-to-date assessment of the contemporary Commonwealth. It has a succinct section on its historical background and gives more attention than any previous works to symbols and to the 'People's Commonwealth' of voluntary organizations, sports and business. It highlights critical questions of balance that have emerged between the relative roles of governments and official agencies, voluntary associations, and private business.

The practice of medicine in the days before the development of anaesthetics could often be a brutal and painful experience. Many procedures, especially those involving surgery, must have proved almost as distressing to the doctor as to the patient. Yet in order to cure, the medical practitioner was often required to inflict pain and the patient to endure it. Some level of detachment has always been required of the doctor and especially, of the surgeon. It is the construction of this detachment, or dispassion, in early modern England, with which this work is concerned. The book explores the idea of medical dispassion and shows how practitioners developed the intellectual, verbal and manual skill of being able to replace passion with equanimity and distance. As the skill of 'dispassion' became more widespread it was both enthusiastically promoted and vehemently attacked by scientific and literary writers throughout the early modern period. To explain why the practice was so controversial and aroused such furor, this study takes into account not only patterns of medical education and clinical practice but wider debates concerning social, philosophical and religious ideas.

Universities for a New World takes the Centenary of the 'Association of Commonwealth Universities' (ACU) as its point of departure in exploring what a 2009 'United Nations Educational, Scientific and Cultural Organization' (UNESCO) Report has evocatively termed an 'academic revolution' in modern higher education. The book succinctly explores the rise of the ACU as the world's oldest network of universities, before focussing primarily on that protean 'revolution' in higher education provision - with a particular sampling of the diverse Commonwealth experience across the globe. Gains as well as losses are analysed through critical and interrelated essays. Transformation may have been inevitable, but progress towards greater participation rates has not always been manifested through quality provision for students or societies at large. Measuring those changes to universities is

inherently challenging as transformations are still proceeding apace. The volume accordingly concludes with informed perspectives on the potential future(s) of universities in the 21st century. Paradoxically, further change is now the only constant for higher education in an era of globalisation.

An Illustrated Guide SAGE Publications

Learning and Teaching in Early Childhood: Pedagogies of Inquiry and Relationships is an introduction for early childhood educators beginning their studies. Reflecting the fact that there is no single correct approach to the challenges of teaching, this book explores teaching through two lenses: teaching as inquiry and teaching as relating. The first part of the book focuses on inquiry, covering early childhood learning environments, learning theories, play pedagogies, approaches to teaching and learning, documentation and assessment, and the policy, curriculum and regulatory requirements in Australia. The second part explores relationships in early childhood contexts and covers topics such as fostering meaningful and respectful relationships with children, and working with families, staff and the wider community. Written by well-respected academics in the field, Learning and Teaching in Early Childhood is a vital resource for those entering the early childhood education and care profession.

This book examines the state of the Open and Distance Learning (ODL)-based secondary education in India. ODL-based education has been a key resource for children in India who can neither cope with nor avail of regular schooling opportunities due to economic, health and disability, or other constraints. The volume uses large-scale empirical data collected from various Indian states and a sensitive theoretical framework to study the equity, efficiency, and effectiveness of the National Institute of Open Schooling (NIOS) and the State Open School (SOS). Highlighting the roadblocks and barriers in terms of its reach, inclusion, and delivery, particularly to the marginalised, this book explores whether ODL has a potential of being a sustainable and effective option at the secondary and senior secondary level in India. Thus, it seeks to generate policy discourse around delivery mechanisms and effectiveness of ODL in developing countries. First of its kind, this comprehensive volume will be useful for scholars and researchers of education, education policy, public policy, and political studies.

Since the middle of the last century tourism has demonstrated almost continual growth, with international tourist arrivals now recorded in excess of one billion per annum. Given the global socio-economic significance of tourism, it is imperative to develop educational opportunities for those working in tourism-related industries. These opportunities should fulfil the changing needs of both industry, travellers, and the learners themselves. While the concept of lifelong learning in the tourism industry plays an important role, it has received little academic attention to date. This book provides a theoretical overview of lifelong learning for tourism, exploring its history, practice, and conceptualization. It demonstrates the importance of lifelong learning for tourism from a variety of perspectives, drawing on educational, industry, policy, and socio-economic insights. The book explores managerial and political implications, critical issues, best practice examples, and draws on a range of international case studies to demonstrate theory in practice. Finally, it offers a conceptual framework for future curriculum approaches. This book will be of interest to students, scholars, and practitioners of tourism studies, hospitality, business and management, and international development. It will also appeal to those interested in adult education, vocational training, professional development, and pedagogy.

As institutions and organisations around the world move to more open and flexible delivery of educational and training programmes, there is increasing need for effective forms of staff development to encourage and support change. Staff development is not only critical in helping teachers and trainers

acquire and improve their knowledge and skills in alternative modes of delivery, but in helping to shape the policies, procedures and attitudes that are needed for more learner-centred approaches. This book draws together the experiences, insights and findings of some of the world's leading staff developers in open and flexible education. It is designed to

provide an overview of the trends, influences and events which are shaping the work of these professionals, and the policy changes, processes and outcomes they are helping to bring about in this expanding field. The book offers various frameworks and strategies for staff development activities, with examples from commercial, professional and educational settings, and shows how these can be refined and adapted to more specific contexts.
