Beginning with an introduction to why we do science, the Physical Science Student Text, 5th ed., gradually builds the student's understanding of physics concepts in a logical sequence. Beginning with classical mechanics, the text progresses through work and energy, wave phenomena, electricity and magnetism, and light and optics. These transition naturally into the chemistry topics, beginning with the atomic model, then to elements and compounds, chemical reactions, and finishing with solutions, and acids, bases, and salts. Every chapter shows by example why the subject matter is relevant to a Christian worldview of science. - Publisher.

This full-color reference offers practical, evidence-based guidance on using more than 120 medicinal plants, including how to formulate herbal remedies to treat common disease conditions. A body-systems based review explores herbal medicine in context, offering information on toxicology, drug interactions, quality control, and other key topics. More than 120 herbal monographs provide quick access to information on the historical use of the herb in humans and animals, supporting studies, and dosing information. Includes special dosing, pharmacokinetics, and regulatory considerations when using herbs for horses and farm animals. Expanded pharmacology and toxicology chapters provide thorough information on the chemical basis of herbal medicine. Explores the evolutionary relationship between plants and mammals, which is the basis for understanding the unique physiologic effects of herbs. Includes a body systems review of herbal remedies for common disease conditions in both large and small animals. Discusses special considerations for the scientific research of herbs, including complex and individualized interventions that may require special design and nontraditional outcome goals.
