In recent years, there have been many changes to the construction industry's standard form contracts, including the American Institute of Architects (AIA) and Engineer Joint Contract Documents Committee (EJCDC) documents. Additionally, a new family of contract documents, known as Consensus DOCS was created by agreement among various construction contractor, subcontractor, owner, and surety trade associations. *Alternative Clauses to Standard Construction Contracts, Fifth Edition* provides instant access to amendments to AIA, AGC, EJCDC and Consensus DOCS for owners, architects and contractors. This unique resource covers all major documents in use throughout the construction industry and enables you to compare between the different documents. It delivers practice-proven amendments clause-by-clause. It tells you specifically what to insert and delete in order to reach the ends your client desires. And it goes so deep, it even covers contractors amendments for agreements

with subcontractors. While it is absolutely essential to stay current with these standard agreements, it is imperative that everyone involved in negotiating and drafting construction contracts also have access to practice-proven modifications that strengthen the language on behalf of clients. If the other parties to your agreement have access to this book--and you don't--you're placed at a significant disadvantage every step of the way. Let the experts from Smith, Currie & Hancock provide you with invaluable support when negotiating or drafting construction contracts. Previous Edition: *Alternative Clauses to Standard Construction Contracts, Fourth Edition*, ISBN 9781454845157 [Standard Form Construction Contract Documents](#) Wiley-Interscience

This valuable reference, edited by one of the most respected names in construction law, presents the modifications and alternative clauses used by experienced attorneys in changing the most frequently discussed and controversial sections of the standard forms. In presenting selected alternative contract clauses to the AIA contracts, this book addresses the concerns of owners, developers, contractors, subcontractors and others who wish to supplement or modify the standard forms, and provides a complete rationale for each suggested modification. Attorneys for

the various parties, on a variety of construction projects, can now easily shift project risks and liabilities to better project client interests by employing proven alternative clauses for contracts between owners and architects, and owners and contractors are included, and certain improvements to AIA's cost-plus construction contract forms are presented. The outstanding contributors to this work also address payment disputes that delay damage issues and other frequently contested and amended 'hot spots.' The most comprehensive sourcebook of its kind, *Alternative Clauses to Standard Construction Contracts* points up the benefits and limitations of each clause as seen from the standpoint of each party involved.

This book provides readers with detailed coverage of the documents generated during the building construction process. Introducing readers to the major participants and their responsibilities to the documents commonly produced during the design and construction of a building, the First Edition focuses on the origin and format—which documents are used and why, how documents are used in the real world, and how they work together as a system, which ties the whole process together. For professionals with a career or interest in residential construction, construction law, commercial construction, construction claims, and/or construction management.

Construction Specifications Writing John Wiley & Sons

Construction Contract Administration for Project Owners is aimed at public and private owners of real estate and construction projects. The book is intended to assist owners in their contractual dealings with their designers and their contractors. Most owners are not primarily in the business of designing and building facilities. The fact that their primary business is not design and construction places them at a disadvantage when negotiating, drafting, and administering design agreements and construction contracts because their designers and contractors use these documents every day. This book is intended to assist owners to redress this imbalance by equipping owners to draft and administer contracts so as to protect their interests. The book is aimed at owner personnel with all levels of knowledge in the business of managing projects. It can serve as a comprehensive introduction to drafting and administering design agreements and construction contracts for beginners. For intermediate level personnel, it can serve as a manual to be read to enhance the reader's skills in this area. For the sophisticated project management professional, it can serve as a resource to be consulted in connection with very specific issues as they arise on a project.

The CSI Construction Specifications Practice Guide John Wiley & Sons

This third edition of the standard construction specifications writing guide has been updated to include new information on linking specifications to computer databases and to other parts of the design process. *Construction Specifications Writing* shows how to organize documents, consolidate the Federal government systems, generate well-researched mastertexts, automate specifications, write more condensed text, use full-time specifications consultants, and use the new knowledge-based specifying systems.

Annotated Analysis and Comparison of the AIA, ConsensusDocs, and EJCDC Contract Forms Aspen Publishers

This book provides an overall understanding of construction contracts, explaining a range of topics with in-depth examples, allowing engineers, site managers, architects, contractors, and other construction professionals in search of information on construction contracts to find it in one place. The volume further serves as a learning tool and a reference guide for students and

instructors. Adopting a primarily Canadian perspective, the book provides references from two Standard Contract Documents CCDC (Canadian Construction Document Committee) and FIDIC (International Federation of Consulting Engineers) and briefly describes other major contract documents used within USA and UK construction industries.

Although construction is one of the largest industries in the United States, it lags behind other industries in its implementation of modern management techniques such as those contained in the Standard for Program Management (the Standard) by the Project Management Institute (PMI®). *Construction Program Management* details the successful use of the PMI® approach for the construction of capital programs. It demonstrates, through case studies, how implementation of PMI's set of tools and techniques can improve the chances of program success. Exploring tactical and strategic management methods, the book outlines a structured, process-based approach to construction program management that leverages structure to bring order to what can otherwise feel like an overwhelming challenge. The opening chapter focuses on basic definitions of project management and program management—highlighting their similarities and differences. A summary review of the Standard describes how these management concepts can be applied to capital construction programs. Explains how to apply the principles of PMI's Standard for Program Management to construction programs. Describes the difference between leadership (strategic) and management (tactical) skills. Compares and contrasts the program management principles included in the PMI® Body of Knowledge with those of the Construction Management Association of America (CMAA®). Through the use of case studies this book provides students, practitioners, and stakeholders with a guided tour through each phase of the program management life cycle. Using language that is easy to understand, the book shows that with the right team, the right leader, and the proper implementation of the steps outlined, all programs can obtain true success.

The JCT standard forms of building contract require a thorough understanding of their procedural requirements, as well as their legal implications. They require both the contractor and the architect, on behalf of the employer, to send a wide range of notices and letters if each party is to protect its legitimate interests. The main contract forms are also supported by complex sub-contract documentation. Therefore, it is not surprising that when this book of specimen letters, notices and forms was first published, it was widely welcomed by the construction industry. The book provides examples of documentation likely to be required for a contract under the following JCT forms: ? the Standard Form of Building Contract ? the Intermediate Form of Building Contract ? the Agreement for Minor Building Works ? the Standard Form of Building Contract With Contractor's Design. It includes a commentary on the practical implications of the various documents and highlights the points to be watched. The new edition takes into account the wide range of amendments to the latest editions of the standard forms following the Housing Grants, Construction and Regeneration Act 1996, and in particular, the new payment and adjudication provisions. For the first time it features documentation for use with the JCT design and build form.

Whenever a contractor undertakes work using one of the standard building contracts, however small the job, writing a good many letters will be involved. Some will be formal notices it is necessary to give; others will be letters it is prudent to send. This book provides a set of over 300 standard letters for use with the standard forms of building contract and sub-contract and aims to cover all the common situations which contractors will encounter when involved in a contract. It has been substantially revised to take account of the 2005 suite of JCT contracts, together with changes in case law and the 2007 CDM Regulations. The letters are for use with the following contracts: ● JCT Standard Building Contract (SBC), ● JCT Intermediate Building Contract (IC) and 'with contractor's design' (ICD), ● JCT Minor Works Building Contract (MW) and 'with contractor's design' (MWD), ● JCT Design and Build Contract (DB), ● JCT Standard Building Sub-Contract Conditions (SBCSub/C) and 'with sub-contractor's design' (SBCSub/D/C), ● JCT Intermediate Named Sub-Contract Conditions (ICSub/NAM/C), ● JCT Intermediate Sub-Contract Conditions (ICSub/C) and 'with sub-contractor's design' (ICSub/D/C), and ● JCT Design and Build Sub-Contract Conditions (DBSub/C). There are also letters for use with GC/Works/1 and its subcontract. The book comes with a free CD which includes all the letters. It is compatible for use with Microsoft® Word and WordPerfect® on IBM-PC and Macintosh® machines.
