Finding, funding, and using the right films and video equipment can be challenging for history teachers. Did you know that... The movie Prince of Egypt was banned in Egypt? In the movie Troy, ancient Trojans are shown using llamas that could only be found in the New World at that time? Oliver Stone's movie JFK was so controversial that he wrote a whole book defending it? The movie 300 is based on a comic book and not meant to show historical reality at all? No one in the West has ever made a major motion picture featuring the life of Vladimir Lenin?

Showing movies in the dark can damage your eyesight? Showing the wrong movie could get you fired or slapped with a heavy fine? There are ways to obtain free educational films? There are some great books and websites that allow you to learn about the objectionable content and historical accuracy of a film before you show it to your students? This book helps you get good films that are free from bias, anachronisms, or objectionable content. There are many great tips on how to use films more effectively in your classroom and interesting assignments to go with them. Chapter One: The Do's and Don'ts of Using Films in Your Classroom 4 Chapter Two: Should I Use a Drama or a Documentary? 9 Chapter Three: Finding the Right Films 11 Chapter Four: Funding Your Film Library 18 Chapter Five: Copyright Issues 25 Chapter Six: Choosing the Right Format of Films & Equipment 28 Chapter Seven: Anachronisms in Film 35 Chapter Eight: Bias in Film 38 Chapter Nine: Films with Violence and Bad Language 42 Chapter Ten: Film-related Assignments 44 Chapter Eleven: The Best and

Worst Dramatic Films for History Classes 67 Chapter Twelve: Recent Reviews 73 Chapter Thirteen: Films That I Think Should be Made 78 Chapter Fourteen: Recommended Reading 82 Chapter Fifteen: Dramatic Films Listed by Historical Era 85 **Flying Magazine** Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. *Radio News* With this consumer's guide, buyers of home theatre systems will be taken through the technology and components of home entertainment and learn how they suit their individual needs. Consumers will discover the best components for their needs, how to be a savvy shopper, how to avoid buying the wrong technology, and how to set up and fine tune a system. In addition, all the technologies behind home theatre are explained.

These technologies include DVD players, audio/video receivers, multichannel speaker systems, high-definition television (HDTV), and digital satellite systems. *A Practical Guide to Today's Home Entertainment Systems* You've probably seen home theaters in the pages of home improvement and technology magazines like Electronic House. You may have even encountered one at the home of a friend or colleague. Perhaps you've stopped at a home electronics store and have seen a home theater there. Have you ever wondered what it takes to create these elegant, high-performing A/V masterpieces? Our Complete Guide to Home Theater Planning will walk you through the process, step by step. As you'll learn, creating a home theater requires carefully planning to get right, some imagination and plenty of time and patience. It's hard work, but the results can be phenomenal—something that pleases every member of your family and adds real value to your house. And here's some really good news: Any room in your house

can function admirably as a home theater, as long as you design the space correctly and select and install the A/V equipment carefully. This book discusses the pros and cons of the morphing existing rooms into home theaters, as well as building a space from the ground up. The appropriate types of equipment for each type of space are suggested, and classic mistakes to avoid are divulged. And if being on the cutting edge is important to you, there's a complete chapter dedicated to a discussion about the new audio and video trends that are worth consideration. You can take your theater project a step further by adding features like dimmable lighting, specialty seating, fiber optic "star" ceilings and more. Although these amenities will add to your bottom line, they're an effect way to put your own personal stamp on your theater, making it a space that's uniquely yours. We'll introduce you to some of these unique home theaters—both ones that have been designed and installed entirely by the homeowners themselves and ones that have been created by seasoned home systems

professionals. You'll gain loads of advice and gather great inspiration for tackling your own home theater project. Good luck and happy home theater building!
