Thinking of starting up
a business? Hoping it
will succeed beyond
your wildest dreams?
You could start with
advice from someone
who knows. R.S.
Agarwal, along with his
friend R.S. Goenka, has
built a business from
scratch, failed, picked
himself up and now
heads Emami - a
multinational brand
Made in India. His

wisdom on various business and personal aspects is distilled in an easy-to-read and insightful narrative about his life and business. It is a concise, compelling read for every entrepreneur, whether just starting out or well-established. Agarwal combines a pragmatic, down-to-earth approach to work and the rat race with a childlike wonder and the utopian daydreams of the eternal optimist. With rare sensitivity and humanity, good, old-fashioned ethics and cutting-edge technology, Agarwal has transformed a dream into the business giant it is today. This book tells the story of that odyssey with candour and sagacity. There are short stories that

deliver home truths, snippets that delight and quotes that enlighten. Business: The Emami Way is, in short, an MBA in an easy-to-understand handbook.

A Modern Approach to Logic Reasoning

Nelson Thornes
The unique feature of this book is problem-solving techniques that will help the students get top scores. The first part of this book deals with theory, examples, and

exercises. In the examples, wherever it is required, I have shown the problem-solving techniques that will help you tackle a problem and solve it in the shortest way. In addition, I have included many problems that are generally not given in GMAT guidebooks. The purpose is to equip you to face any situation in the actual test. The second part of this book is designed as a workbook to help you apply the problem-solving techniques that you have studied in the first part. Every problem solving has a technique, and a particular technique can be applied to different types of problems. You will have to study and master them. A successful student will

not only learn the techniques but also learn how to apply the appropriate technique for a particular problem.
