Data integrity is the hottest topic in the pharmaceutical industry. Global regulatory agencies have issued guidance, after guidance after guidance in the past few years, most of which does not offer practical advice on how to implement policies, procedures and processes to ensure integrity. These guidances state what but not how. Additionally, key stages of analysis that impact data integrity are omitted entirely. The aim of this book is to provide practical and detailed help on how to implement data integrity and data governance for regulated analytical laboratories working in or for the pharmaceutical industry. It provides clarification of the regulatory issues and trends, and gives practical methods for meeting regulatory requirements and guidance. Using a data integrity model as a basis, the principles of data integrity and data governance are expanded into practical steps for regulated laboratories to implement. The author uses case study examples to illustrate his points and provides instructions for applying the principles of data integrity and data governance to individual laboratory needs. This book is a useful reference for analytical chemists and scientists, management and senior management working in regulated laboratories requiring either an understanding about data integrity or help in implementing practical solutions. Consultants will also benefit from the practical guidance provided.

Following The Art of Jewelry: Polymer Clay, this second book in the series takes an exciting look at one of the most popular materials in crafting today: paper. Artists have constantly pushed the envelope of this versatile medium; these pages showcase their innovative techniques along with gorgeous work that's sure to inspire. And no previous jewelry-making experience is needed! All the basics are beautifully laid out, from an overview of the variety of available papers to an exploration of techniques. Easy-to-follow how-to photos clarify each step. Best of all are the stunning projects, including Yael Friedman's simple "diamond" solitaire rings; K. Dana Kagrise's elegant white bracelet made from vellum; and Dorthea Hosom's brooches that feature sophisticated collages.
