This style guide is a product of the voting system standards and test methods research at NIST. The most recent version of the tech. standard, the Voluntary Voting System Guidelines of Aug. 2007, contains requirements for the usability of documentation used by poll workers and election support staff. The approach to testing these requirements has two components: (1) Style guide incorporating best practices for voting system documentation; (2) Test protocol for voting system test labs. to use to measure the usability of instructions supplied by voting system manufacturers for election workers. This style guide sets out guidelines for voting system manufacturers to use to implement best practices in their documentation for poll workers and election support staff.

In this stimulating collection of papers, leading researchers from Europe and North America demonstrate the theoretical and methodological importance of corpus studies of phraseology and show how data-intensive case studies provide new perspectives on language use. One of the main theoretical findings of recent linguistics is that phraseology is central to language organization. The authors show how software and statistical techniques can reveal phraseological patterns in different text types - literary, academic and commercial - and also typical paths of language change

across the last 200 years. These patterns are revealed only when computational methods are applied to corpora consisting of hundreds of millions of running words, collected from thousands of authentic texts. A major feature of the book is its critical comparison and evaluation of different quantitative and statistical tools, which readers can use for their own empirical work. Originally published in *International Journal of Corpus Linguistics*, Vol. 18:1 (2013).

Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today,

threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

This volume is composed of the best papers submitted to the HOIT2000 conference held in Wolverhampton, U. K. in June 2000. The conference, entitled "IT at home: Virtual influences on everyday life", and the papers reflect the wide variety of these influences that are coming to bear on our everyday experience, be it through the increasing use of computers or the rapid development of new telecommunications systems. The conference has been organised by IFIP Working Group 9. 3 - Home-Oriented Informatics and Telematics (HOIJ) , in association with IFIP Working Group 13. 2- Methodology for user-centred system design. This gives a broad range of topics that are within the sphere of interest of the participants and the authors of the papers. The disciplines involved in the study of this subject area are varied composing computing, telecommunications, psychology, sociology, business studies and others. The conference is the second in a series of HOIT conferences, the first being held in Copenhagen in 1994. The subject is now more mature with the various disciplines being increasingly interested in the home as a research domain. The various technical developments over the time since the first conference have also had a profound effect on the way in which people communicate both in the home and at work. The rise in the use of the Internet has changed the way in which many people view communication and access to information sources.

This book deals with Biblical Hebrew. Although it also relates to Old Testament interpretation, it is largely linguistic in character and is intended for linguists as well as scholars of Hebrew and Old testament. It discusses syntactic phenomena and correlations in the entire textual corpus of Deuteronomy 1-30 and is intended to contribute to a better insight into the Biblical Hebrew verbal system. A wide variety of grammatical variables, referred to as parameters [e.g. verb form, subject, objects, adjuncts, conjunctions, word order, clause content, clause type], and their categories are examined. In the clauses of Deuteronomy 1-30, co-occurrences and co-occurrence restrictions of categories of different parameters are found. It is taken for granted that the choice of the verb in a clause is influenced by characteristics of preceding and following clauses, especially the verb forms found in them. In order partly to account for these phenomena, connections have been made between clauses and their verb forms. This result in a consecutio temporum, the sequence of verb forms in a text. Not only qualitative aspects of parameters and their categories are important, but also their quantitative proportions in Deuteronomy 1-30. Patterns are deduced from the frequencies of parameter categories and of their relationships. The frequency tables are grouped together in the supplement separate to the book. In some tables, the categories of each parameter are listed with their frequencies and percentages. The other tables show the joint distribution of two parameters and their categories.

What sets Qualitative Research Methods for Second Language Education apart from existing books is its balance between theories and learning activities. The activities are designed to be interactive so that they provide a chance for both students and teachers to reinforce their understanding of the research topic. It is the author's belief that one learns research by conducting research rather than by talking about it. Thus, the activities created in the book provide opportunities for students to develop and sharpen their research skills. Developing these skills will be very useful when students later conduct their own research.

The volume starts with a -- posthumous -- paper by Alexander Kerns, written by Benjamins Schwartz, on the Indo-European tense system. This is followed by a rich array of papers on the reconstruction of older languages, ranging from Indo-European and Afroasiatic to Cretan.

Stylistics has become the most common name for a discipline which at various times has been termed 'literary linguistics', 'rhetoric', 'poetics', 'literary

philology' and 'close textual reading'. This Handbook is the definitive account of the field, drawing on linguistics and related subject areas such as psychology, sociology, anthropology, educational pedagogy, computational methods, literary criticism and critical theory. Placing stylistics in its intellectual and international context, each chapter includes a detailed illustrative example and case study of stylistic practice, with arguments and methods open to examination, replication and constructive critical discussion. As an accessible guide to the theory and practice of stylistics, it will equip the reader with a clear understanding of the ethos and principles of the discipline, as well as with the capacity and confidence to engage in stylistic analysis.

Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new *Suggestions for Further Reading* by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

This ebook is a selective guide designed to help scholars and students of the ancient world find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books, chapters, and journal articles to online archives, electronic data sets, and blogs. Written by a leading international authority on the subject, the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated. A reader will discover, for instance, the most reliable introductions and overviews to the topic, and the most important publications on various areas of scholarly interest within this topic. In classics, as in other disciplines, researchers at all levels are drowning in potentially useful scholarly information, and this guide has been created as a tool for cutting through that material to find the exact source you need. This ebook is just one of many articles from Oxford Bibliographies Online: Classics, a continuously updated and growing online resource designed to provide authoritative guidance through the scholarship and other materials relevant to the study of classics. Oxford Bibliographies Online covers most subject disciplines within the social science and humanities, for more information visit [www.aboutobo.com](http://www.aboutobo.com).
