*The Routledge Handbook of Spanish in the Global City* BRILL  
 Regarding the controversial and thought-provoking assessments in this handbook, many software professionals might disagree with the authors, but all will embrace the debate. Glass identifies many of the key problems hampering success in this field. Each fact is supported by insightful discussion and detailed references. Actuaciones de Innovación Educativa en la Docencia Universitaria de Radiología y Medicina Física Dykinson  
 En esta obra, integrada por las ponencias y comunicaciones admitidas en la VI Jornada de la Asociación Española de Derecho Deportivo celebrada en Madrid el 21 de junio de 2019, se aborda el régimen jurídico del deporte practicado por personas con alguna discapacidad desde ópticas diversas y con distintos planteamientos, pero que, en conjunto, ofrecen una visión

completa del pasado, presente y futuro de este especial tipo de deporte. Así, partiendo de un trabajo destinado a establecer las bases conceptuales del deporte de las personas con discapacidad, se analiza su relevancia en el plano internacional, su tratamiento en varias leyes autonómicas, alguna referencia de Derecho comparado, su regulación en el Anteproyecto de Ley del Deporte y, específicamente, distintas cuestiones planteadas en este deporte: discriminación adicional por razón de género, seguros, mutualismo, su función en la incapacidad permanente, dopaje y violencia, entre otras. La obra, en la que colaboran trece expertos en Derecho del deporte, coordinados por A. Millán Garrido, está prologada por el profesor Gabriel Real Ferrer, quien destaca cómo estamos ante un trabajo colectivo en el que se ofrecen diversas visiones sobre aspectos esenciales del escenario jurídico en el que se mueve el deporte de las personas con discapacidad y, a través de ellas, un cabal conocimiento de los principales desafíos que presenta este sector. Estamos, en definitiva, ante una obra, ciertamente actual y novedosa, que

resultará de utilidad a los juristas y a los restantes profesionales interesados en el deporte practicado por personas con discapacidad.

**Transforming Higher Education** Springer Science & Business Media

"Addressing the unique social, political, and economic context for universities and academia in Vancouver, British Columbia, this publication is part of Muntada's residency through the Audain Visual Artist in Residence Program at the School for Contemporary Arts at Simon Fraser University and is realized in partnership with Line magazine and the Audain Gallery. About Academia adds to the work initiated by Muntadas' original project, About Academia, which was produced through the Art Forum program at the David Rockefeller Center for Latin American Studies at Harvard University in 2011."--Page 3.

*Metal-microbe Interactions* Dykinson

Extracellular Vesicles, Volume 645 in the Methods in Enzymology series, continues the legacy of this premier serial with quality chapters authored by leaders in the field. Chapters in this new release include Genetic labeling of extracellular vesicle exosomes for studying biogenesis and uptake in living mammalian cells, Fluorescent Labeling of Extracellular Vesicles, Isolation of extracellular vesicles from lymph, Transgenic rats for tracking body fluid/tissue-derived extracellular vesicles, Isolation of amniotic extracellular vesicles, Urinary extracellular vesicle isolation, Immunocapture-based ELISA to Characterize and Quantify Extracellular Vesicles in Both Cell Culture Supernatants and Body Fluids, and much more. Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in the Methods in Enzymology series

*Safe Cities* Springer Science & Business

This new title provides information on the relationships of such biological materials as yeasts, fungi, and plasmids with metals they come in contact with. Readers will find in-depth discussions by noted experts in their respective fields on the toxicity of heavy metals, accumulation and precipitation of sulphides, and the reactions of bacterial cell walls to the presence of metal ions. This volume is ideal for undergraduates and graduates, as well as researchers unfamiliar with metal-microbe interactions who are seeking a useful introduction to the field.

VI CONGRESO INTERNACIONAL DE SINESTESIA, CIENCIA Y ARTE 2018 + ACTIVIDADES PARALELAS Editorial Reus

*Translating Official Documents* Routledge

Most people use technology to help them keep track of their daily lives. Yet, we're constantly questioning if this is truly a useful 'crutch', or if we're merely damaging our own ability to think and remember. In Brain Gain, Marc Prensky argues that the power of technology improves natural cognitive abilities and benefits us.

CEB-FIP Model Code 1990 New York ; Toronto : Van Nostrand Reinhold

This design code for concrete structures is the result of a complete revision to the former Model Code 1978, which was produced jointly by CEB and FIP. The 1978 Model Code has had a considerable impact on the national design codes in many countries. In particular, it has been used extensively for the harmonisation of national design codes and as basic reference for Eurocode 2. The 1990 Model Code provides comprehensive guidance to the scientific and technical developments that have occurred over the past decade in the safety, analysis and design of concrete structures. It has already influenced the codification work that is being carried out both nationally and internationally and will continue so to do.

*Globalized Water* Springer Science & Business Media

Why do artists write novels? What impact does the artist's novel have on the visual arts? How should such a novel be experienced? In recent years, there has been a proliferation of visual artists who create novels as part of their broader art practice. They do so in order to address artistic issues by means of novelistic devices, favoring a sort of art predicated on process and subjectivity, introducing notions such as fiction, narrative, and imagination. In this sense, it is possible to see the novel as a new medium in the visual arts; yet very little is known about it. This two-volume publication is the first to explore in depth the subject of the artist's novel.00Part 2, 'The Fantasy of the Novel',

is a research project in the form of a novel; it examines the process of creating an artist's novel derived from five episodic performances and an exhibition. The creative process was affected by the circumstances of production, including intersubjective relationships usually invisible to audiences. The protagonist assumes the role of a detective who tries to understand the conditions under which an artist decides to write, and how this writing is possible within an artistic setting. Published with Part 1: 'A New Medium' (ISBN 9788867494224) as a two-volume publication.

#### **About Academia** OECD Publishing

Official translations are generally documents that serve as legally valid instruments. They include anything from certificates of birth, death or marriage through to academic transcripts or legal contracts. This field of translation is now as important as it is fraught with difficulties, for it is only in a few areas that the cultural differences are so acute and the consequences of failure so palpable. In a globalizing world, our official institutions increasingly depend on translations of official documents, but little has been done to elaborate the skills and dilemmas involved. Roberto Mayoral deals with the very practical problems of official translating. He points out the failings of traditional theories in this field and the need for revised concepts such as the virtual document, pragmatic constraints, and risk analysis. He details aspects of the social contexts, ethical norms, translation strategies, different formats, fees, legal formulas, and ways of solving the most frequent problems. Care is taken to address as wide a range of cultural contexts as possible and to stress the active role of the translator. This book is intended as a teaching text for the classroom, for self-learning, or for professionals who want to reflect on their practice. Activities and exercises are suggested for each chapter, and information is included on professional associations and societies across the globe.

#### **The Artist's Novel: The Fantasy of the Novel** Springer Nature

This history of African slavery from the fifteenth to the early twentieth centuries examines how indigenous African slavery developed within an international context. Paul E. Lovejoy discusses the medieval Islamic slave trade and the Atlantic trade as well as the enslavement process and the marketing of slaves. He considers the impact of European abolition and assesses slavery's role in African history. The book corrects the accepted interpretation that African slavery was mild and resulted in the slaves' assimilation. Instead, slaves were used extensively in production, although the exploitation methods and the relationships to world markets differed from those in the Americas. Nevertheless, slavery in Africa, like slavery in the Americas, developed from its position on the periphery of capitalist Europe. This new edition revises all statistical material on the slave trade demography and incorporates recent research and an updated bibliography.

#### *El país* Springer

The objective of this book is to provide a valuable compendium of problems as a reference for undergraduate and graduate students, faculty, researchers and practitioners of operations research and management science. These problems can serve as a basis for the development or study of assignments and exams. Also, they can be useful as a guide for the first stage of the model formulation, i.e. the definition of a problem. The book is divided into 11 chapters that address the following topics: Linear programming, integer programming, non linear programming, network modeling, inventory theory, queue theory, tree decision, game theory, dynamic programming and markov processes. Readers are going to find a considerable number of statements of operations research applications for management decision-making. The solutions of these problems are provided in a

concise way although all topics start with a more developed resolution. The proposed problems are based on the research experience of the authors in real-world companies so much as on the teaching experience of the authors in order to develop exam problems for industrial engineering and business administration studies.

#### **Extracellular Vesicles** Fundación Internacional artecittà

Neuro-symbolic AI is an emerging subfield of Artificial Intelligence that brings together two hitherto distinct approaches. "Neuro" refers to the artificial neural networks prominent in machine learning, "symbolic" refers to algorithmic processing on the level of meaningful symbols, prominent in knowledge representation. In the past, these two fields of AI have been largely separate, with very little crossover, but the so-called "third wave" of AI is now bringing them together. This book, Neuro-Symbolic Artificial Intelligence: The State of the Art, provides an overview of this development in AI. The two approaches differ significantly in terms of their strengths and weaknesses and, from a cognitive-science perspective, there is a question as to how a neural system can perform symbol manipulation, and how the representational differences between these two approaches can be bridged. The book presents 17 overview papers, all by authors who have made significant contributions in the past few years and starting with a historic overview first seen in 2016. With just seven months elapsed from invitation to authors to final copy, the book is as up-to-date as a published overview of this subject can be. Based on the editors' own desire to understand the current state of the art, this book reflects the breadth and depth of the latest developments in neuro-symbolic AI, and will be of interest to students, researchers, and all those working in the field of Artificial Intelligence.

#### **Edna O'Brien and the Art of Fiction** Oxford University Press

Ordinary people are natural experts on safety in their own communities. The key to creating a city where people feel safe is to give citizens input into developing safer environments for themselves. This book offers a set of easy-to-follow guidelines - well illustrated with photos - that can be used to improve urban safety. It also includes success stories on the ways that ordinary people, working in partnership with local governments and agencies have taken the initiative to fight back against violent crime in public housing, transit, parks and open places, underground parking, schools, houses and neighbourhoods.

#### **Transformations in Slavery** IOS Press

This volume is the first to focus solely on how specific individuals and groups in Byzantium and its borderlands were defined and distinguished from other individuals and groups from the mid-fourth to the close of the fifteenth century. It gathers chapters from both established and emerging scholars from a wide range of disciplines across history, art, archaeology, and religion to provide an accurate representation of the state of the field both now and in its immediate future. The handbook is divided into four subtopics that examine concepts of group and specific individual identity which have been chosen to provide methodologically sophisticated and multidisciplinary perspectives on specific categories of group and individual identity. The topics are Imperial Identities; Romanitas in the Late Antique Mediterranean; Macro and Micro Identities: Religious, Regional, and Ethnic Identities, and Internal Others; and Gendered Identities: Literature, Memory, and Self in Early and Middle Byzantium. While no single volume could ever provide a comprehensive vision of identities on the vast variety of peoples within Byzantium over nearly a millennium of its history, this handbook represents a milestone in offering a survey of the vibrant surge of scholarship examining the numerous and oft-times fluctuating codes of identity that shaped and transformed

Byzantium and its neighbours during the empire's long life.

*The Palace of Charles V in Granada* Contemporary Irish Writers

This book constitutes revised and selected papers from the Sixteenth International Conference on Information Processing, ICInPro 2021, held in Bangaluru, India in October 2021. The 33 full and 9 short papers presented in this volume were carefully reviewed and selected from a total of 177 submissions. The papers are organized in the following thematic blocks: Computing & Network Security; Data Science; Intelligence & IoT.

Muwaššah, Zajal, Kharja John Wiley & Sons

Artificial Intelligence is concerned with producing devices that help or replace human beings in their daily activities. Neural-symbolic learning systems play a central role in this task by combining, and trying to benefit from, the advantages of both the neural and symbolic paradigms of artificial intelligence. This book provides a comprehensive introduction to the field of neural-symbolic learning systems, and an invaluable overview of the latest research issues in this area. It is divided into three sections, covering the main topics of neural-symbolic integration - theoretical advances in knowledge representation and learning, knowledge extraction from trained neural networks, and inconsistency handling in neural-symbolic systems. Each section provides a balance of theory and practice, giving the results of applications using real-world problems in areas such as DNA sequence analysis, power systems fault diagnosis, and software requirements specifications. Neural-Symbolic Learning Systems will be invaluable reading for researchers and graduate students in Engineering, Computing Science, Artificial Intelligence, Machine Learning and Neurocomputing. It will also be of interest to Intelligent Systems practitioners and anyone interested in applications of hybrid artificial intelligence systems.

**Animal Behaviour** Bayreuth African Studies

The Description for this book, *The Palace of Charles V in Granada*,

will be forthcoming.

Neuro-Symbolic Artificial Intelligence: The State of the Art Academic Press

En el momento actual el feminismo se ha convertido en uno de los campos de conocimiento más fecundos, con más producción científica y desarrollos más originales, pues sus trabajos se incardinan en toda una corriente que proviene de múltiples sectores, una fuerza viva, como atestiguan las grandes protestas de mujeres que han tenido lugar en la última década. Los resultados de las investigaciones feministas suscitan indudable interés social, pues estos estudios nacen de la necesidad generada por la pervivencia de la discriminación estructural, el androcentrismo cultural y la violencia machista que no cesa. Los últimos años han estado marcados por el deterioro de las condiciones económicas, el intento de retroceso de los servicios públicos y el aislamiento a causa de la pandemia de Covid-19. Dicha situación ha acrecentado todas las formas de discriminación, violencia y subordinación experimentadas por las mujeres. Todo ello acredita la actualidad de este libro que desarrolla un análisis feminista de la sociedad y la cultura.

*Facts and Fallacies of Software Engineering* Open University Press

"The theme of the book is that the drive for quality in Britain and elsewhere, and the reform of teaching and learning processes have not been connected, organizationally or in practice: change has been driven by the search for efficiency and by a quest for greater bureaucratic accountability. Harvey and Knight argue that, whatever the merits of these developments, they have not been directly concerned to improve the quality of student learning. They argue not just that student learning ought to be at the centre of discussions about quality enhancement, but that the goal ought to be transformation: transformation of universities with a view to transforming learners."--BOOK JACKET. Title Summary field provided by Blackwell North America, Inc. All Rights Reserved
