What draws people to study abroad or volunteer in far-off communities? Often the answer is romance - the romance of landscapes, people, languages, the very sense of border-crossing - and longing for liberation, attraction to the unknown, yearning to make a difference. This volume explores the complicated and often fraught desires to study and volunteer abroad. In doing so, the book sheds light on how affect is managed by educators and mobilized by students and

volunteers themselves, and how these structures of feeling relate to broader social and economic forces.

With about \$450 billion in assets, funds of hedge funds are the most recent darling of investors. While hedge funds carry high risk for the promise of high returns they are designed for the very rich and for large institutional investors such as pension funds. A Fund of Hedge Funds (FOF) spreads investments among a number of hedge funds to reduce risk and provide diversification, while

maintaining the potential for higher than average returns. Odds are that some pension fund of yours is invested heavily in these products, and more recently these FOFs have been opened to more and more individual investors in offshore jurisdictions with lower minimum entry levels. Since this is a new and extremely fast-moving financial phenomenon, academic research has just begun in earnest, and this is the first book to present rigorous academic research by some of the leading lights in academic finance, carefully analyzing the broad array of issues involved in FOFs. * With over \$450 billion in assets, hedge funds of funds are the darling of investors * First book to present rigorous academic research about funds of funds * Leading lights in academic finance from around
